MISSION

- To provide superior service and prompt response to our customers;
- To support economic growth within our communities;
- To provide for the professional growth and financial well-being of our employees; and
- To generate above average returns for our shareholders.

UNITED SECURITY BANCSHARES

Corporate Profile

Headquartered in Fresno, California, United Security Bancshares was formed in 2001 as a bank holding company to provide commercial banking services through its wholly owned subsidiary, United Security Bank. Founded in 1987, United Security Bank is a state-chartered community bank, which operates eleven full-service branches, construction, commercial and consumer lending operations, and a financial services office in Fresno, Madera, Kern, and Santa Clara counties. United Security is a customer-oriented financial institution engaged in providing a wide range of competitively priced commercial banking services primarily to the business community and individuals located in the central and southern San Joaquin Valley, as well as the Campbell area in Santa Clara County.

At United Security Bancshares, we are committed to improving shareholder value and delivering the highest quality products and services while being responsive to the changing needs of our customers and business markets. Our primary business strategy is to increase market share in the local communities we serve, as well as to expand into new markets when sound business opportunities present themselves.

United Security Bancshares' common stock is traded on NASDAQ under the symbol "UBFO". For more information, please visit us at www.unitedsecuritybank.com.

MESSAGE FROM THE PRESIDENT

To Our Shareholders, Customers and Friends:

The past year was one of significant progress for our company with improved earnings, reductions in problem assets, and increased capital.

For the year ended December 31, 2013, we generated net income of \$7.3 million or \$0.49 per share basic and diluted, as compared to \$6.1 million or \$0.41 per share basic and diluted during 2012. This represents an increase of nearly \$1.2 million between the two years and is the result of significant reductions in provisions for credit losses as well as a reversal of the valuation allowance for deferred taxes.

Between 2012 and 2013, we experienced nearly \$2.1 million in reductions in our provision for credit losses, resulting in a negative provision of \$1.1 million for the year ended December 31, 2013. As a result of improvements in levels of problem loans, reductions in net charge-offs, and the negative provisions made during 2013, the allowance for credit losses totaled \$11.0 million at December 2013, representing 2.78% of the total loan portfolio.

Problem asset levels continue to decline with total nonperforming assets, consisting of nonaccrual loans, troubled debt restructurings, and OREO, declining more than \$15.0 million between December 31, 2012 and December 31, 2013. Impaired loans, a key indicator of the well-being of the loan portfolio, also declined nearly \$3.4 million during 2013 to a balance of \$18.1 million or 4.5% of total loans at December 31, 2013. OREO declined \$10.0 million during 2013 to a balance of \$13.9 million at December 31, 2013, and we expect OREO levels to continue declining during 2014.

Although we again experienced impairment losses during 2013 on OREO assets, the number of impairment issues and the magnitude of those impairment losses were significantly less than experienced during previous

years. This is representative of a continued stabilization in the economic environment. Going forward, we expect asset impairment issues to have less of an impact than in previous years.

Real estate markets in our area continue to show signs of recovery with renewed interest in real estate property sales. Residential real estate prices have shown modest price increases during the past several years from Merced to Kern County, as well as other areas of the nation. With this recovery, we have experienced stabilization in OREO property values.

Core Earnings

Core earnings are defined as net interest income plus noninterest income less "normalized" noninterest expense and provision for credit losses. For the Company, the provision for credit losses and expenses associated with OREO and most legal expense have been directly impacted by the state of the economy and real estate prices. When the economy falters and real estate prices fall, these expenses tend to increase.

Net interest income before provision for credit losses totaled \$22.5 million for the year ended December 31, 2013 as compared to \$23.1 million for the year ended December 31, 2012. This equates to a net interest margin, or net yield on the Company's earning assets, of 3.86 % for the year ended December 31, 2013, as compared to 4.40% for the previous year. While we have experienced continued declines in yields on our earning assets as a result of the historically low interest rate environment, we have been able to reduce our cost of interest-bearing liabilities. Reductions in funding costs have primarily been the result of a strong core deposit base.

We reported a negative provision for credit losses totaling \$1.1 million for the year ended December 31, 2013, as compared to a provision of \$1.0 million for the year ended

December 31, 2012. Significant reductions in provision for credit losses during the last two years are representative of improvements in the economy and our market area, as real estate prices have stabilized.

Noninterest income is comprised primarily of customer service fees, but also includes other items such as income derived from the cash surrender value of bank-owned life insurance, rental income, as well as other gains or losses associated with the Company's assets. Customer service fees comprised \$3.5 million or nearly 87% of the \$4.0 million recorded in total noninterest income for the year ended December 31, 2013. This is consistent with customer service fees of \$3.6 million recorded during the year ended December 31, 2012.

Noninterest expense totaled \$19.0 million for the year ended December 31, 2013 as compared to \$20.6 million for the year ended December 31, 2012. During 2013, we experienced significant reductions in impairment charges and other expenses related to OREO, as well as reductions in professional fees and regulatory assessments. This is a trend we would expect to see continue as the economy recovers and the level of our problem assets declines further.

On the Horizon:

We are emerging from the greatest banking crisis since the Great Depression with better foresight and stronger vision. We are optimistic that economic conditions within our market area, as well as across the country, will continue to improve, which will bode well for our customers, our local communities, and the Company.

As we progress into 2014, we are confident that the year will bring positive results in terms of both earnings and a stronger balance sheet. We will continue to work through our problem assets, while providing superior customer service, and seeking to expand our markets when possible.

Our longstanding presence in our markets and our dedicated management team, along with an experienced and competent staff, are the keys to the Company's long-term success. We continue to take pride in our premier customer service and vision to grow the franchise in existing and new markets.

Thank you again for the confidence and trust you have shown in us.

Sincerely,

Dennis R. Woods
Chairman of the Board & President

Robert M. Mochizuki
Lead Director

SELECTED FINANCIAL HIGHLIGHTS

For the Year Ended December 31,

<i>(in thousands except per share data and ratios)</i>	2013	2012	2011	2010	2009

Notes to Consolidated Financial Statements

Years Ended December 31, 2013 and 2012

1. Organization and Summary of Significant Accounting and Reporting Policies

Basis of Presentation – The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States and with prevailing practices within the banking industry. The consolidated financial statements include the accounts of United Security Bancshares, and its wholly owned subsidiary, United Security Bank and subsidiary (the “Bank”). United Security Bancshares Capital Trust II (the “Trust”) is deconsolidated pursuant to ASC 810. As a result, the Trust Preferred Securities are not presented on the Company’s consolidated financial statements as equity, but instead the Company’s Subordinated Debentures are presented as a separate liability category. (see Note 8 to the Company’s consolidated financial statements). Intercompany accounts and transactions have been eliminated in consolidation. In the following notes, references to the Bank are references to United Security Bank. References to the Company are references to United Security Bancshares, (including the Bank). United Security Bancshares operates as one business segment providing banking services to commercial establishments and individuals primarily in the San Joaquin Valley of California.

Nature of Operations – United Security Bancshares is a bank holding company, incorporated in the state of California for the purpose of acquiring all the capital stock of the Bank through a holding company reorganization (the “Reorganization”) of the Bank. The Reorganization, which was accounted for in a manner similar to a pooling of interests, was completed on June 12, 2001. Management believes the Reorganization has provided the Company greater operating and financial flexibility and has permitted expansion into a broader range of financial services and other business activities.

During July 2007 the Company formed United Security Bancshares Capital Trust II and issued \$15.0 million in Trust Preferred Securities with terms similar to those originally issued under USB Capital Trust I. (See Note 8. “Junior Subordinated Debt/Trust Preferred Securities”).

USB Investment Trust Inc was incorporated effective December 31, 2001, as a special purpose real estate investment trust (“REIT”) under Maryland law. The REIT is a

subsidiary of the Bank and was funded with \$133.0 million in real estate-secured loans contributed by the Bank. USB Investment Trust was originally formed to give the Bank flexibility in raising capital, and reduce the expenses associated with holding the assets contributed to USB Investment Trust.

The Bank was founded in 1987 and currently operates eleven branches and one construction lending office in an area from eastern Madera County to western Fresno County, as well as Taft and Bakersfield in Kern County, and Campbell in Santa Clara County. The Bank also operates one financial services department located in Fresno, California. The Bank’s primary source of revenue is interest income through providing loans to customers, who are predominantly small and middle-market businesses and individuals. The Bank engages in a full compliment of lending activities, including real estate mortgage, commercial and industrial, real estate construction, agricultural and consumer loans, with particular emphasis on short and medium term obligations.

The Bank offers a wide range of deposit instruments. These include personal and business checking accounts and savings accounts, interest-bearing negotiable order of withdrawal (“NOW”) accounts, money market accounts and time certificates of deposit. Most of the Bank’s deposits are attracted from individuals and from small and medium-sized business-related sources.

The Bank also offers a wide range of specialized services designed to attract and service the needs of commercial customers and account holders. These services include cashiers checks, travelers checks, money orders, and foreign drafts. In addition, the Bank offers Internet banking services to its commercial and retail customers, and offers certain financial and wealth management services through its financial services department. The Bank does not operate a trust department, however it makes arrangements with its correspondent bank to offer trust services to its customers upon request.

Use of Estimates in the Preparation of Financial Statements – The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

Material estimates that are particularly susceptible to significant change, relate to the determination of the allowance for loan losses, determination of goodwill, fair value of junior subordinated debt and certain collateralized mortgage obligations, and the valuation of real estate acquired in connection with foreclosures or in satisfaction of loans.

Subsequent events—The Company has evaluated events and transactions for potential recognition or disclosure through the day the financial statements were issued.

Significant Accounting Policies – The Company follows accounting standards set by the Financial Accounting Standards Board, commonly referred to as the “FASB”. The FASB sets generally accepted accounting principles (GAAP) that the Company follows to ensure the consistent reporting of its consolidated financial condition, consolidated results of operations, and consolidated cash flows. References to GAAP issued by the FASB in these footnotes are to the *FASB Accounting Standards Codification*, sometimes referred to as the Codification or ASC. The following is a summary of significant policies:

- a. *Cash and cash equivalents* – Cash and cash equivalents include cash on hand, amounts due from banks, federal funds sold and repurchase agreements. At times throughout the year, balances can exceed FDIC insurance limits. Generally, federal funds sold and repurchase agreements are sold for one-day periods. The Bank did not have any repurchase agreements during 2013 or 2012, or at December 31, 2013 and 2012. All cash and cash equivalents have maturities when purchased of three months or less.
- b. *Securities* – Debt and equity securities classified as available for sale are reported at fair value, with unrealized gains and losses excluded from net income and reported, net of tax, as a separate component of comprehensive income and shareholders’ equity. Debt securities classified as held to maturity are carried at amortized cost. Gains and losses on disposition are reported using the specific identification method for the adjusted basis of the securities sold. Premiums and discounts are recognized in interest income using the interest method over the period to maturity.

The Company classifies its securities as available for sale or held to maturity, and periodically reviews its investment portfolio on an individual security basis. Securities that are to be held for indefinite periods of time (including, but not limited to, those that

management intends to use as part of its asset/liability management strategy, those which may be sold in response to changes in interest rates, changes in prepayments or any such other factors) are classified as securities available for sale. Securities which the Company has the ability and intent to hold to maturity are classified as held to maturity.

Investments with fair values that are less than amortized cost are considered impaired. Impairment may result from either a decline in the financial condition of the issuing entity or, in the case of fixed interest rate investments, from rising interest rates. At each financial statement date, management assesses each investment to determine if impaired investments are temporarily impaired or if the impairment is other-than-temporary based upon the positive and negative evidence available. Evidence evaluated includes, but is not limited to, industry analyst reports, credit market conditions, and interest rate trends. If negative evidence outweighs positive evidence that the carrying amount is recoverable within a reasonable period of time, the impairment is deemed to be other-than-temporary and the debt security is written down by the amount related to credit losses in the period in which such determination is made, or written down to fair value if the debt security is more than likely to be sold.

- c. *Loans* – Interest income on loans is credited to income as earned and is calculated by using the simple interest method on the daily balance of the principal amounts outstanding. Loans are placed on non-accrual status when principal or interest is past due for 90 days and/or when management believes the collection of amounts due is doubtful. For loans placed on nonaccrual status, the accrued and unpaid interest receivable may be reversed at management’s discretion based upon management’s assessment of collectibility, and interest is thereafter credited to principal to the extent necessary to eliminate doubt as to the collectibility of the net carrying amount of the loan.

Nonrefundable fees and related direct costs associated with the origination or purchase of loans are deferred and netted against outstanding loan balances. The net deferred fees and costs are generally amortized into interest income over the loan term using the interest method. Other credit-related fees, such as standby letter of credit fees, loan placement fees and annual

credit card fees are recognized as noninterest income during the period the related service is performed.

- d. *Allowance for Credit Losses and Reserve for Unfunded Loan Commitments* – The allowance for credit losses is maintained to provide for losses that can reasonably be anticipated. The allowance is based on ongoing quarterly assessments of the probable losses inherent in the loan portfolio, and to a lesser extent, unfunded loan commitments. The reserve for unfunded loan commitments is a liability on the Company's consolidated financial statements and is included in other liabilities. The liability is computed using a methodology similar to that used to determine the allowance for credit losses, modified to take into account the probability of a drawdown on the commitment.

The allowance for credit losses is increased by provisions charged to operations during the current period and reduced by negative provisions and loan charge-offs, net of recoveries. Loans are charged against the allowance when management believes that the collection of the principal is unlikely. The allowance is an amount that management believes will be adequate to absorb losses inherent in existing loans, based on evaluations of the probability of collection. In evaluating the probability of collection, management is required to make estimates and assumptions that affect the reported amounts of loans, allowance for credit losses and the provision for credit losses charged to operations. Actual results could differ significantly from those estimates. These evaluations take into consideration such factors as the composition of the portfolio, overall portfolio quality, loan concentrations, specific problem loans, and current economic conditions that may affect the borrowers' ability to pay. The Company's methodology for assessing the adequacy of the allowance for credit losses consists of several key elements, which include the formula allowance, specific allowances, and the unallocated allowance.

The formula allowance is calculated by applying loss factors to outstanding loans and certain unfunded loan commitments. Loss factors are based on the Company's historical loss experience and may be adjusted for significant factors that, in management's judgment, affect the collectibility of the portfolio as of the evaluation date. The Company determines the loss factors for problem-graded loans (substandard,

doubtful, and loss), special mention loans, and pass graded loans, based on a loss migration model. In performing the periodic migration analysis, management believes that historical loss factors used in the computation of the formula allowance need to be adjusted to reflect current changes in market conditions and trends in the Company's loan portfolio. There are a number of other factors which are reviewed when determining adjustments in the historical loss factors. Those factors include 1) trends in delinquent and nonaccrual loans, 2) trends in loan volume and terms, 3) effects of changes in lending policies, 4) concentrations of credit, 5) competition, 6) national and local economic trends and conditions, 7) experience of lending staff, 8) loan review and Board of Directors oversight, 9) high balance loan concentrations, and 10) other business conditions. For purposes of this analysis, loans are grouped by internal risk classifications, which are "pass", "special mention", "substandard", "doubtful", and "loss". Certain loans are homogeneous in nature and are therefore pooled by risk grade. These homogeneous loans include consumer installment and home equity loans.

Specific allowances are established based on management's periodic evaluation of loss exposure inherent in impaired loans. For impaired loans, specific allowances are determined based on the collateralized value of the underlying properties, the net present value of the anticipated cash flows, or the market value of the underlying assets.

A loan is considered impaired when management determines that it is probable that the Company will be unable to collect all amounts due according to the original contractual terms of the loan agreement. Impairment is measured by the difference between the original recorded investment in the loan and the estimated present value of the total expected future cash flows, discounted at the loan's effective rate, or the fair value of the collateral, less estimated selling costs, if the loan is collateral dependent.

The unallocated portion of the allowance is based upon management's evaluation of various conditions that are not directly measured in the determination of the formula and specific allowances. The conditions may include, but are not limited to, general economic and business conditions affecting the key lending areas of the Company, credit quality trends, collateral

values, loan volumes and concentrations, and other business conditions.

- e. *Premises and Equipment* – Premises and equipment are carried at cost less accumulated depreciation. Depreciation expense is computed principally on the straight-line method over the estimated useful lives of the assets. Estimated useful lives are as follows:

Buildings	31 years
Furniture and equipment	3-7 Years

- f. *Other Real Estate Owned* – Real estate properties acquired through, or in lieu of, loan foreclosure are to be sold and are initially recorded at fair value of the property, less estimated costs to sell. The excess, if any, of the loan amount over the fair value is charged to the allowance for credit losses. Subsequent declines in the fair value of other real estate owned, along with related revenue and expenses from operations, are charged to noninterest expense.

- g. *Intangible Assets and Goodwill* – Intangible assets are comprised of core deposit intangibles, other specific identifiable intangibles, and goodwill acquired in branch acquisitions where the consideration given exceeded the fair value of the net assets acquired. Intangible assets and goodwill are reviewed at least annually for impairment. Core deposit intangibles of \$62,000 and \$249,000 (net of accumulated amortization and impairment losses of \$6,934,000 and \$6,747,000) at December 31, 2013 and 2012, respectively, are amortized over the estimated useful lives of the existing deposit bases (average of 7 years) using a method which approximates the interest method. During 2013 and 2012, the Company recognized \$0 impairment losses on the core deposit intangible related to the deposits purchased in the Legacy merger consummated during February 2007.

The estimated aggregate amortization expense related to intangible assets for each of the five succeeding years is as follows (in 000's):

Year	Amortization expense
2014	62
Total	\$62

Goodwill amounts resulting from the acquisitions of Taft National Bank during April 2004, and Legacy

Bank during February 2007 are considered to have an indefinite life and are not amortized. At December 31, 2013, goodwill related to Taft National Bank totaled \$1.6 million, and goodwill related to Legacy Bank totaled \$2.9 million. Impairment testing of goodwill is performed at the reporting level during April of each year for Taft, and during March of each year for Legacy. During 2013 and 2012, the Company did not recognize impairment adjustments on the goodwill related to the Legacy or Taft Bank mergers (see Note 19 to the Company's consolidated financial statements contained herein for details of the goodwill impairment.)

- h. *Income Taxes* – Deferred income taxes are provided for the temporary differences between the financial reporting basis and the tax basis of the Company's assets and liabilities using the liability method, and are reflected at currently enacted income tax rates applicable to the period in which the deferred tax assets or liabilities are expected to be realized or settled.
- i. *Net Income per Share* – Basic income (loss) per common share is computed based on the weighted average number of common shares outstanding. Diluted income (loss) per share includes the effect of stock options and other potentially dilutive securities using the treasury stock method to the extent they have a dilutive impact. Net income (loss) per share has been retroactively adjusted for all stock dividends declared.
- j. *Cash Flow Reporting* – For purposes of reporting cash flows, cash and cash equivalents include cash on hand, noninterest-bearing amounts due from banks, federal funds sold and securities purchased under agreements to resell. Federal funds and securities purchased under agreements to resell are generally sold for one-day periods.
- k. *Transfers of Financial Assets* – Transfers of financial assets are accounted for as sales when control over the assets has been surrendered. Control over transferred assets is deemed to be surrendered when (1) the assets have been isolated from the Company, (2) the transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets, and (3) the Company does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity.

- l. *Advertising Costs* – The Company expenses marketing costs as they are incurred. Advertising expense was \$92,000 and \$86,000 for the years ended December 31, 2013 and 2012, respectively.
- m. *Stock Based Compensation* – The Company has a stock-based employee compensation plan, which is described more fully in Note 10. The Company accounts for all share-based payments to employees, including grants of employee stock options, to be recognized in the financial statements based on the grant-date fair value of the award. The fair value is amortized over the requisite service period (generally the vesting period). Included in salaries and employee benefits for the years ended December 31, 2013 and 2012 is \$29,000, and \$18,000, respectively, of share-based compensation. The related tax benefit, recorded in the provision for income taxes, was not significant. All share data contained within the financial statements has been retroactively restated for stock based transactions (i.e. stock splits and stock dividends.)
- n. *Federal Home Loan Bank stock and Federal Reserve Stock* – As a member of the Federal Home Loan Bank (FHLB), the Company is required to maintain an investment in capital stock of the FHLB. In addition, as a member of the Federal Reserve Bank (FRB), the Company is required to maintain an investment in capital stock of the FRB. The investments in both the FHLB and the FRB are carried at cost, which approximates their fair value, in the accompanying consolidated balance sheets under other assets and are subject to certain redemption requirements by the FHLB and FRB. Stock redemptions are at the discretion of the FHLB and FRB.

While technically these are considered equity securities, there is no market for the FHLB or FRB stock. Therefore, the shares are considered as restricted investment securities. Management periodically evaluates the stock for other-than-temporary impairment. Management's determination of whether these investments are impaired is based on its assessment of the ultimate recoverability of cost rather than by recognizing temporary declines in value. The determination of whether a decline affects the ultimate recoverability of cost is influenced by criteria such as (1) the significance of any decline in net assets of the FHLB or FRB as compared to the capital stock amount of the FHLB or FRB and the length of time this situation has persisted, (2) commitments by the

FHLB or FRB to make payments required by law or regulation and the level of such payments in relation to the operating performance of the FHLB or FRB, (3) the impact of legislative and regulatory changes on institutions and, accordingly, the customer base of the FHLB or FRB, and (4) the liquidity position of the FHLB or FRB.

- o. *Comprehensive Income* – Comprehensive income is comprised of net income and other comprehensive income. Other comprehensive income includes items recorded directly to equity, such as unrealized gains and losses on securities available-for-sale, unrecognized costs of salary continuation defined benefit plans. Comprehensive income is presented in the consolidated statement of Comprehensive Income.
- p. *Segment Reporting* – The Company's operations are solely in the financial services industry and include providing to its customers traditional banking and other financial services. The Company operates primarily in the San Joaquin Valley region of California. Management makes operating decisions and assesses performance based on an ongoing review of the Company's consolidated financial results. Therefore, the Company has a single operating segment for financial reporting purposes.
- q. *New Accounting Standards:*

In February 2013, The Financial Accounting Standards Board (FASB) today issued Accounting Standards Update No. 2013-2, Comprehensive Income (Topic 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income, to improve the transparency of reporting reclassifications out of accumulated other comprehensive income. ASU 2013-2 requires an organization to present (either on the face of the statement where net income is presented or in the notes) the effects on the line items of net income of significant amounts reclassified out of accumulated other comprehensive income—but only if the item reclassified is required under U.S. GAAP to be reclassified to net income in its entirety in the same reporting period. The amendments are effective for reporting periods beginning after December 15, 2012.

In January 2013, the FASB issued ASU No. 2013-01 *Balance Sheet (Topic 210) Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities*, which clarifies that ordinary trade receivables and receivables

are not in the scope of ASU 2011-11. It further clarifies that the scope of ASU No. 2011-11 applies to derivatives, repurchase agreements and reverse purchase agreements, and securities borrowing and securities lending transactions that are either offset in accordance with specific criteria contained in FASB Accounting Standards Codification® or subject to a master netting arrangement or similar agreement. Both ASU 2011-11 and ASU 2013-1 are effective for annual periods beginning on or after January 1, 2013, and interim periods within those annual periods. The Company adopted these ASUs during the first quarter of 2013 and they did not have a material impact on its financial statements.

In December 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2011-11 *Balance Sheet (Topic 210) Disclosures about Offsetting Assets and Liabilities*. The ASU enhances disclosures in order to improve the comparability of offsetting (netting) assets and liabilities reported in accordance with U.S. generally accepted accounting

principles (GAAP) and International Financial Reporting Standards (IFRS) by requiring entities to disclose both gross information and net information about both instruments and transactions eligible for offset in the statements of condition and instruments and transactions subject to an agreement similar to a master netting arrangement. This ASU did not have a significant impact on the Company's financial statements.

- r. *Reclassifications* – Certain reclassifications have been made to the 2012 financial statements to conform to the classifications used in 2013. During 2012, the Company reviewed and revised the definition of the reporting segments within its loan portfolio to ensure proper uniformity of risk among such segments and has made specific reclassifications to the 2012 segments as reported for consistency. However, any amounts reported for years prior to 2012 were not subject to this reclassification. None of the reclassifications had an impact on equity or net income.

2. Investment Securities

Following is a comparison of the amortized cost and approximate fair value of investment securities at December 31, 2013 and December 31, 2012:

<i>(In thousands)</i>	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value (Carrying Amount)
December 31, 2013:				
<i>Securities available for sale:</i>				
U.S. Government agencies	\$14,060	\$ 441	\$ —	\$14,501
U.S. Government sponsored entities & agencies collateralized by mortgage obligations	25,029	434	(78)	25,385
Mutual Funds	4,000	—	(270)	3,730
Total securities available for sale	\$43,089	\$ 875	\$(348)	\$43,616
December 31, 2012:				
<i>Securities available for sale:</i>				
U.S. Government agencies	\$ 6,113	\$ 487	\$ —	\$ 6,600
U.S. Government sponsored entities & agencies collateralized by mortgage obligations	20,586	697	—	21,283
Mutual Funds	4,000	—	(39)	3,961
Total securities available for sale	\$30,699	\$1,184	\$ (39)	\$31,844

There were no gross realized losses on available-for-sale securities and no gross gains during the year ended December 31, 2013. There were gross realized losses on sales of available-for-sale securities totaling \$195,000, but no gross realized gains during the year ended December 31, 2012.

The amortized cost and fair value of securities available for sale at December 31, 2013, by contractual maturity,

are shown below. Actual maturities may differ from contractual maturities because issuers have the right to call or prepay obligations with or without call or prepayment penalties. Contractual maturities on collateralized mortgage obligations cannot be anticipated due to allowed paydowns.

<i>(In thousands)</i>	December 31, 2013	
	Amortized Cost	Fair Value (Carrying Amount)
Due in one year or less	\$ 4,000	\$ 3,730
Due after one year through five years	69	74
Due after five years through ten years	—	—
Due after ten years	13,991	14,426
U.S. Government sponsored entities & agencies collateralized by mortgage obligations	25,029	25,386
	\$43,089	\$43,616

At December 31, 2013 and 2012, available-for-sale securities with an amortized cost of approximately \$23,935,000 and \$26,695,000 (fair value of \$24,739,000 and \$27,878,000) were pledged as collateral for FHLB borrowings and public funds balances, respectively.

The Company had no held-to-maturity or trading securities at December 31, 2013 and 2012.

Management periodically evaluates each available-for-sale investment security in an unrealized loss position to determine if the impairment is temporary or other-than-temporary.

The following summarizes temporarily impaired investment securities at December 31, 2013 and 2012:

(In thousands)	Less than 12 Months		12 Months or More		Total	
	Fair Value (Carrying Amount)	Unrealized Losses	Fair Value (Carrying Amount)	Unrealized Losses	Fair Value (Carrying Amount)	Unrealized Losses
December 31, 2013:						
<u>Securities available for sale:</u>						
U.S. Government agencies	\$ —	\$ —	\$ —	\$ —	\$ —	\$ —
U.S. Government sponsored entities & agencies collateralized by mortgage obligations	11,069	(78)	—	—	11,069	(78)
Mutual Funds	—	—	3,730	(270)	3,730	(270)
Total impaired securities	\$11,069	\$(78)	\$3,730	\$(270)	\$14,799	\$(348)
December 31, 2011:						
<u>Securities available for sale:</u>						
U.S. Government agencies	\$—	\$ —	\$ —	\$ —	\$ —	\$—
U.S. Government sponsored entities & agencies collateralized by mortgage obligations	—	—	—	—	—	—
Mutual Funds	3,961	(39)	—	—	3,961	(39)
Total impaired securities	\$ 3,961	\$(39)	\$ —	\$ —	\$ 3,961	\$(39)

Temporarily impaired securities at December 31, 2013, were comprised of five U.S. Government sponsored entities & agencies collateralized by mortgage obligations and one mutual fund. Temporarily impaired securities at December 31, 2012, were comprised of one mutual fund, with an undefined maturity date.

The Company evaluates investment securities for other-than-temporary impairment ("OTTI") at least quarterly, and more frequently when economic or market conditions warrant such an evaluation. The investment securities portfolio is evaluated for OTTI by segregating the portfolio into two general segments and applying the appropriate OTTI model. Investment securities of high credit quality are generally evaluated for OTTI under ASC Topic 320-10, "Investments – Debt and Equity Instruments." Certain purchased beneficial interests, including non-agency mortgage-backed securities, asset-backed securities, and collateralized debt obligations, are evaluated under ASC Topic 325-40, *Beneficial Interest in Securitized Financial Assets*.

In the first segment, the Company considers many factors in determining OTTI, including: (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer, (3) whether the market decline was affected by

macroeconomic conditions, and (4) whether the Company has the intent to sell the debt security or more likely than not will be required to sell the debt security before its anticipated recovery. The assessment of whether an other-than-temporary decline exists involves a high degree of subjectivity and judgment and is based on the information available to the Company at the time of the evaluation.

The second segment of the portfolio uses the OTTI guidance that is specific to purchased beneficial interests including private label mortgage-backed securities. Under this model, the Company compares the present value of the remaining cash flows as estimated at the preceding evaluation date to the current expected remaining cash flows. An OTTI is deemed to have occurred if there has been an adverse change in the remaining expected future cash flows.

Other-than-temporary-impairment occurs when the Company intends to sell the security or more likely than not will be required to sell the security before recovery of its amortized cost basis less any current-period credit loss. If an entity intends to sell or more likely than not will be required to sell the security before recovery of its amortized cost basis less any current-period credit loss, the other-than-temporary-impairment shall be recognized in earnings equal to the entire difference between the

investment's amortized cost basis and its fair value at the balance sheet date. If an entity does not intend to sell the security and it is not more likely than not that the entity will be required to sell the security before recovery of its amortized cost basis less any current-period loss, the other-than-temporary-impairment shall be separated into the amount representing the credit loss and the amount related to all other factors. The amount of the total other-than-temporary-impairment related to the credit loss is recognized in earnings, and is determined based on

the difference between the present value of cash flows expected to be collected and the current amortized cost of the security. The amount of the total other-than-temporary-impairment related to other factors shall be recognized in other comprehensive (loss) income, net of applicable taxes. The previous amortized cost basis less the other-than-temporary-impairment recognized in earnings shall become the new amortized cost basis of the investment.

3. Loans

Loans are comprised of the following:

<i>(In thousands)</i>	December 31, 2013	December 31, 2012
Commercial and Business loans	\$ 68,460	\$ 69,780
Government program loans	2,226	2,337
Total Commercial and Industrial	70,686	72,117
Real estate – mortgage:		
Commercial real estate	143,919	133,599
Residential mortgages	52,036	55,016
Home Improvement and Home Equity loans	1,410	1,319
Total Real Estate Mortgage	197,365	189,934
RE Construction and Development	87,004	90,941
Agricultural Loans	30,932	36,169
Installment	9,330	10,884
Commercial lease financing	—	12
Total Loans	\$395,317	\$400,057

The Company's loans are predominantly in the San Joaquin Valley, and the greater Oakhurst/East Madera County area, as well as the Campbell area of Santa Clara County, although the Company does participate in loans with other financial institutions, primarily in the state of California.

Commercial and industrial loans represent 17.9% of total loans at December 31, 2013, and are generally made to support the ongoing operations of small-to-medium sized commercial businesses. Commercial and industrial loans have a high degree of industry diversification and provide, working capital, financing for the purchase of manufacturing plants and equipment, or funding for growth and general expansion of businesses. A substantial portion of commercial and industrial loans are secured by accounts receivable, inventory, leases or

other collateral including real estate. The remainder are unsecured; however, extensions of credit are predicated upon the financial capacity of the borrower. Repayment of commercial loans is generally from the cash flow of the borrower.

Real estate mortgage loans, representing 49.9% of total loans at December 31, 2013, are secured by trust deeds on primarily commercial property, but are also secured by trust deeds on single family residences. Repayment of real estate mortgage loans is generally from the cash flow of the borrower.

- Commercial real estate mortgage loans comprise the largest segment of this loan category and are available on all types of income producing and commercial properties, including: office buildings, shopping centers;

apartments and motels; owner occupied buildings; manufacturing facilities and more. Commercial real estate mortgage loans can also be used to refinance existing debt. Although real estate associated with the business is the primary collateral for commercial real estate mortgage loans, the underlying real estate is not the source of repayment. Commercial real estate loans are made under the premise that the loan will be repaid from the borrower's business operations, rental income associated with the real property, or personal assets.

- Residential mortgage loans are provided to individuals to finance or refinance single-family residences. Residential mortgages are not a primary business line offered by the Company, and are generally of a shorter term than conventional mortgages, with maturities ranging from three to fifteen years on average.
- Home Equity loans comprise a relatively small portion of total real estate mortgage loans, and are offered to borrowers for the purpose of home improvements, although the proceeds may be used for other purposes. Home equity loans are generally secured by junior trust deeds, but may be secured by 1st trust deeds.

Real estate construction and development loans, representing 22.0% of total loans at December 31, 2013, consist of loans for residential and commercial construction projects, as well as land acquisition and development, or land held for future development. Loans in this category are secured by real estate including improved and unimproved land, as well as single-family residential, multi-family residential, and commercial properties in various stages of completion. All real estate loans have established equity requirements. Repayment on construction loans is generally from long-term mortgages with other lending institutions obtained at completion of the project.

Agricultural loans represent 7.8% of total loans at December 31, 2013, and are generally secured by land, equipment, inventory and receivables. Repayment is from the cash flow of the borrower.

In the normal course of business, the Company is party to financial instruments with off-balance sheet risk to meet the financing needs of its customers. At December 31, 2013 and 2012, these financial instruments include commitments to extend credit of \$63,271,000 and \$60,050,000, respectively, and standby letters of credit of \$2,001,000 and \$2,504,000, respectively. These instruments involve elements of credit risk in excess of the amount

recognized on the balance sheet. The contract amounts of these instruments reflect the extent of the involvement the Company has in off-balance sheet financial instruments.

The Company's exposure to credit loss in the event of nonperformance by the counterparty to the financial instrument for commitments to extend credit and standby letters of credit is represented by the contractual amounts of those instruments. The Company uses the same credit policies as it does for on-balance sheet instruments.

Commitments to extend credit are agreements to lend to a customer, as long as there is no violation of any condition established in the contract. Substantially all of these commitments are at floating interest rates based on the Prime rate. Commitments generally have fixed expiration dates. The Company evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary, is based on management's credit evaluation. Collateral held varies but includes accounts receivable, inventory, leases, property, plant and equipment, residential real estate and income-producing properties.

Standby letters of credit are generally unsecured and are issued by the Company to guarantee the performance of a customer to a third party. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loans to customers.

Loans to directors, officers, principal shareholders and their affiliates are summarized below:

<i>(In thousands)</i>	December 31,	
	2013	2012
Aggregate amount outstanding, beginning of year	\$3,330	\$3,244
New loans or advances during year	1,098	2,043
Repayments during year	(1,512)	(1,957)
Aggregate amount outstanding, end of year	<u>\$2,916</u>	<u>\$3,330</u>
Loan commitments	<u>\$3,930</u>	<u>\$2,916</u>

Past Due Loans

The Company monitors delinquency and potential problem loans on an ongoing basis through weekly reports to the Loan Committee and monthly reports to the Board of Directors. The following is a summary of delinquent loans at December 31, 2013 (in thousands):

December 31, 2013	Loans			Total Past Due Loans	Current Loans	Total Loans	Accruing Loans 90 or More Days Past Due
	Loans 30-60 Days Past Due	Loans 61-89 Days Past Due	Loans 90 or More Days Past Due

Nonaccrual Loans

Commercial, construction and commercial real estate loans are placed on non-accrual status under the following circumstances:

- When there is doubt regarding the full repayment of interest and principal.
- When principal and/or interest on the loan has been in default for a period of 90-days or more, unless the asset is both well secured and in the process of collection that will result in repayment in the near future.
- When the loan is identified as having loss elements and/or is risk rated "8" Doubtful.

Other circumstances which jeopardize the ultimate collectability of the loan including certain troubled debt restructurings, identified loan impairment, and certain loans to facilitate the sale of OREO.

Loans meeting any of the preceding criteria are placed on non-accrual status and the accrual of interest for financial statement purposes is discontinued. Previously accrued but unpaid interest is reversed and charged against interest income.

All other loans where principal or interest is due and unpaid for 90 days or more are placed on non-accrual and the accrual of interest for financial statement purposes is discontinued. Previously accrued but unpaid interest is reversed and charged against interest income.

When a loan is placed on non-accrual status and subsequent payments of interest (and principal) are received, the interest received may be accounted for in two separate ways.

Cost recovery method: If the loan is in doubt as to full collection, the interest received in subsequent payments is diverted from interest income to a valuation reserve and treated as a reduction of principal for financial reporting purposes.

Cash basis: This method is only used if the recorded investment or total contractual amount is expected to be fully collectible, under which circumstances the subsequent payments of interest is credited to interest income as received.

Loans on non-accrual status are usually not returned to accruing status unless and until all delinquent principal and/or interest has been brought current, there is no identified element of loss, and current and continued satisfactory performance is expected (loss of the contractual amount not the carrying amount of the loan). Repayment ability is generally demonstrated through the timely receipt of at least six monthly payments on a loan with monthly amortization.

Nonaccrual loans totaled \$12,341,000 and \$13,425,000 at December 31, 2013 and 2012, respectively. There were no remaining undisbursed commitments to extend credit on nonaccrual loans at December 31, 2013 and 2012.

The following is a summary of nonaccrual loan balances at December 31, 2013 and 2012 (in thousands).

Impaired Loans

A loan is considered impaired when based on current information and events, it is probable that the Company will be unable to collect all amounts due, including principal and interest, according to the contractual terms of the loan agreement.

The Company applies its normal loan review procedures in making judgments regarding probable losses and loan impairment. The Company evaluates for impairment those loans on non-accrual status, graded doubtful, graded substandard or those that are troubled debt restructures. The primary basis for inclusion in impaired status under generally accepted accounting pronouncements is that it is probable that the Bank will be unable to collect all amounts due according to the contractual terms of the loan agreement.

A loan is not considered impaired if there is merely an insignificant delay or shortfall in the amounts of payments and the Company expects to collect all amounts due, including interest accrued, at the contractual interest rate for the period of the delay.

Review for impairment does not include large groups of smaller balance homogeneous loans that are collectively evaluated to estimate the allowance for loan losses. The Company's present allowance for loan losses methodology, including migration analysis, captures required reserves for these loans in the formula allowance.

For loans determined to be impaired, the Company evaluates impairment based upon either the fair value of underlying collateral, discounted cash flows of expected payments, or observable market price.

- For loans secured by collateral including real estate and equipment, the fair value of the collateral less selling costs will determine the carrying value of the loan. The difference between the recorded investment in the loan and the fair value, less selling

costs, determines the amount of impairment. The Company uses the measurement method based on fair value of collateral when the loan is collateral dependent and foreclosure is probable.

- The discounted cash flow method of measuring the impairment of a loan is used for unsecured loans or for loans secured by collateral where the fair value cannot be easily determined. Under this method, the Company assesses both the amount and timing of cash flows expected from impaired loans. The estimated cash flows are discounted using the loan's effective interest rate. The difference between the amount of the loan on the Bank's books and the discounted cash flow amounts determines the amount of impairment to be provided. This method is used for most of the Company's troubled debt restructurings or other impaired loans where some payment stream is being collected.
- The observable market price method of measuring the impairment of a loan is only used by the Company when the sale of loans or a loan is in process.

The method for recognizing interest income on impaired loans is dependent on whether the loan is on nonaccrual status or is a troubled debt restructuring. For income recognition, the existing nonaccrual and troubled debt restructuring policies are applied to impaired loans. Generally, except for certain troubled debt restructurings which are performing under the restructure agreement, the Company does not recognize interest income received on impaired loans, but reduces the carrying amount of the loan for financial reporting purposes.

Loans other than certain homogeneous loan portfolios are reviewed on a quarterly basis for impairment. Impaired loans are written down to estimated realizable values by the establishment of specific reserves or charge-offs when required.

The following is a summary of impaired loans at December 31, 2013 (in thousands).

In most cases, the Company uses the cash basis method of income recognition for impaired loans. In the case of certain troubled debt restructuring for which the loan is performing under the current contractual terms for a reasonable period of time, income is recognized under the accrual method.

Troubled Debt Restructurings

Under the circumstances, when the Company grants a concession to a borrower as part of a loan restructuring, the restructuring is accounted for as a troubled debt restructuring (TDR). TDRs are reported as a component of impaired loans.

A TDR is a type of restructuring in which the Company, for economic or legal reasons related to the borrower's financial difficulties, grants a concession (either imposed by court order, law, or agreement between the borrower and the Bank) to the borrower that it would not otherwise consider. Although the restructuring may take different forms, the Company's objective is to maximize recovery of its investment by granting relief to the borrower.

A TDR may include, but is not limited to, one or more of the following:

- A transfer from the borrower to the Company of receivables from third parties, real estate, other assets, or an equity interest in the borrower is granted to fully or partially satisfy the loan.

- A modification of terms of a debt such as one or a combination of:
 - The reduction (absolute or contingent) of the stated interest rate.
 - The extension of the maturity date or dates at a stated interest rate lower than the current market rate for new debt with similar risk.
 - The reduction (absolute or contingent) of the face amount or maturity amount of debt as stated in the instrument or agreement.
 - The reduction (absolute or contingent) of accrued interest.

For a restructured loan to return to accrual status there needs to be, among other factors, at least 6 months successful payment history. In addition, the Company performs a financial analysis of the credit to determine whether the borrower has the ability to continue to meet payments over the remaining life of the loan. This includes, but is not limited to, a review of financial statements and cash flow analysis of the borrower. Only after determination that the borrower has the ability to perform under the terms of the loans, will the restructured credit be considered for accrual status. Although the Company does not have a policy which specifically addresses when a loan may be removed from TDR classification, as a matter of practice, loans classified as TDRs generally remain classified as such until the loan either reaches maturity or its outstanding balance is paid off.

The following tables illustrate TDR activity for the periods indicated (dollars in thousands):

The Company makes various types of concessions when structuring TDR's including rate reductions, payment extensions, and forbearance. At December 31, 2013, the Company had 35 restructured loans totaling \$9,059,000, as compared to 58 restructured loans totaling \$16,773,000 at December 31, 2012.

Credit Quality Indicators

As part of its credit monitoring program, the Company utilizes a risk rating system which quantifies the risk the Company estimates it has assumed during the life of a loan. The system rates the strength of the borrower and the facility or transaction, and is designed to provide a

program for risk management and early detection of problems.

For each new credit approval, credit extension, renewal, or modification of existing credit facilities, the Company assigns risk ratings utilizing the rating scale identified in this policy. In addition, on an on-going basis, loans and credit facilities are reviewed for internal and external influences impacting the credit facility that would warrant a change in the risk rating. Each loan credit facility is to be given a risk rating that takes into account factors that materially affect credit quality.

When assigning risk ratings, the Company evaluates two risk rating approaches, a facility rating and a borrower rating as follows.

Facility Rating:

The facility rating is determined by the analysis of positive and negative factors that may indicate that the quality of a particular loan or credit arrangement requires that it be rated differently from the risk rating assigned to the borrower. The Company assesses the risk impact of these factors:

Collateral – The rating may be affected by the type and quality of the collateral, the degree of coverage, the economic life of the collateral, liquidation value and the Company's ability to dispose of the collateral.

Guarantees – The value of third party support arrangements varies widely. Unconditional guaranties from persons with demonstrable ability to perform are more substantial than that of closely related persons to the borrower who offer only modest support.

Unusual Terms – Credit may be extended on terms that subject the Company to a higher level of risk than indicated in the rating of the borrower.

Borrower Rating:

The borrower rating is a measure of loss possibility based on the historical, current and anticipated financial characteristics of the borrower in the current risk environment. To determine the rating, the Company considers at least the following factors:

- Quality of management
- Liquidity
- Leverage/capitalization
- Profit margins/earnings trend
- Adequacy of financial records
- Alternative funding sources
- Geographic risk
- Industry risk
- Cash flow risk
- Accounting practices
- Asset protection
- Extraordinary risks

The Company assigns risk ratings to loans other than consumer loans and other homogeneous loan pools based on the following scale. The risk ratings are used when determining borrower ratings as well as facility ratings. When the borrower rating and the facility ratings differ, the lowest rating applied is:

- *Grades 1 and 2* – These grades include loans which are given to high quality borrowers with high credit

quality and sound financial strength. Key financial ratios are generally above industry averages and the borrower's strong earnings history or net worth. These may be secured by deposit accounts or high-grade investment securities.

- *Grade 3* – This grade includes loans to borrowers with solid credit quality with minimal risk. The borrower's balance sheet and financial ratios are generally in line with industry averages, and the borrower has historically demonstrated the ability to manage economic adversity. Real estate and asset-based loans assigned this risk rating must have characteristics, which place them well above the minimum underwriting requirements for those departments. Asset-based borrowers assigned this rating must exhibit extremely favorable leverage and cash flow characteristics, and consistently demonstrate a high level of unused borrowing capacity.
- *Grades 4 and 5* – These include "pass" grade loans to borrowers of acceptable credit quality and risk. The borrower's balance sheet and financial ratios may be below industry averages, but above the lowest industry quartile. Leverage is above and liquidity is below industry averages. Inadequacies evident in financial performance and/or management sufficiency are offset by readily available features of support, such as adequate collateral, or good guarantors having the liquid assets and/or cash flow capacity to repay the debt. The borrower may have recognized a loss over three or four years, however recent earnings trends, while perhaps somewhat cyclical, are improving and cash flows are adequate to cover debt service and fixed obligations. Real estate and asset-borrowers fully comply with all underwriting standards and are performing according to projections would be assigned this rating. These also include grade 5 loans which are "leveraged" or on management's "watch list." While still considered pass loans (loans given a grade 5), the borrower's financial condition, cash flow or operations evidence more than average risk and short term weaknesses, these loans warrant a higher than average level of monitoring, supervision and attention from the Company, but do not reflect credit weakness trends that weaken or inadequately protect the Company's credit position. Loans with a grade rating of 5 are not normally acceptable as new credits unless they are adequately secured or carry substantial endorser/guarantors.

- *Grade 6* – This grade includes “special mention” loans which are loans that are currently protected but are potentially weak. This generally is an interim grade classification and should usually be upgraded to an Acceptable rating or downgraded to Substandard within a reasonable time period. Weaknesses in special mention loans may, if not checked or corrected, weaken the asset or inadequately protect the Company’s credit position at some future date. Special mention loans are often loans with weaknesses inherent from the loan origination, loan servicing, and perhaps some technical deficiencies. The main theme in special mention credits is the distinct probability that the classification will deteriorate to a more adverse class if the noted deficiencies are not addressed by the loan officer or loan management.
- *Grade 7* – This grade includes “substandard” loans which are inadequately supported by the current sound net worth and paying capacity of the borrower or of the collateral pledged, if any. Substandard loans have a well-defined weakness or weaknesses that may impair the regular liquidation of the debt. Substandard loans exhibit a distinct possibility that the Company will sustain some loss if the deficiencies are not corrected. Substandard loans also include impaired loans.
- *Grade 8* – This grade includes “doubtful” loans which exhibit the same characteristics as the Substandard loans with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable. The possibility of loss is extremely high, but because of certain important and reasonably specific pending factors, which may work to the advantage and strengthening of the loan, its classification as an estimated loss is deferred until its more exact status may be determined. Pending factors include a proposed merger, acquisition, or liquidation procedures, capital injection, perfecting liens on additional collateral and refinancing plans.
- *Grade 9* – This grade includes loans classified “loss” which are considered uncollectible and of such little value that their continuance as bankable assets is not warranted. This classification does not mean that the asset has absolutely no recovery or salvage value, but rather it is not practical or desirable to defer writing off the asset even though partial recovery may be achieved in the future.

The following tables summarize the credit risk ratings for commercial, construction, and other non-consumer related loans for December 31, 2013 and 2012. The Company did not carry any loans graded as loss at December 31, 2013 and 2012.

The Company follows consistent underwriting standards outlined in its loan policy for consumer and other homogeneous loans but, does not specifically assign a risk rating when these loans are originated. Consumer loans are monitored for credit risk and are considered “pass” loans until some issue or event requires that the credit be downgraded to special mention or worse.

The following tables summarize the credit risk ratings for consumer related loans and other homogeneous loans for December 31, 2013 and 2012 (in thousands).

Allowance for Loan Losses

The Company analyzes risk characteristics inherent in each loan portfolio segment as part of the quarterly review of the adequacy of the allowance for loan losses. The following summarizes some of the key risk characteristics for the eleven segments of the loan portfolio (Consumer loans include three segments):

Commercial and business loans – Commercial loans are subject to the effects of economic cycles and tend to exhibit increased risk as economic conditions deteriorate, or if the economic downturn is prolonged. The Company considers this segment to be one of higher risk given the size of individual loans and the balances in the overall portfolio.

Government program loans – This is a relatively a small part of the Company’s loan portfolio, but has historically had a high percentage of loans that have migrated from pass to substandard given their vulnerability to economic cycles.

Commercial real estate loans – This segment is considered to have more risk in part because of the vulnerability of commercial businesses to economic cycles as well as the exposure to fluctuations in real estate prices because most of these loans are secured by real estate. Losses in this segment have however been historically low because most of the loans are real estate secured.

Residential mortgages – This segment is considered to have low risk factors both from the Company and peer statistics. These loans are secured by first deeds of trust. The losses experienced over the past twelve quarters are isolated to approximately seven loans and are generally the result of short sales.

Home improvement and home equity loans – Because of their junior lien position, these loans have an inherently higher risk level. Because residential real estate has been

severely distressed in the recent past, the anticipated risk for this loan segment has increased.

Real estate construction and development loans – In a normal economy, this segment of loans is considered to have a higher risk profile due to construction and market value issues in conjunction with normal credit risks. In the current distressed residential real estate markets the risk has increased.

Agricultural loans – This segment is considered to have risks associated with weather, insects, and marketing issues. In addition, concentrations in certain crops or certain agricultural areas can increase risk.

Installment loans (Includes consumer loans, overdrafts, and overdraft protection lines) – This segment is higher risk because many of the loans are unsecured.

Commercial lease financing – This segment of the portfolio is small, but is considered to be vulnerable to economic cycles given the nature of the leasing relationship where businesses are relatively small or have minimal cash flow. This lending program was terminated in 2005.

The following summarizes the activity in the allowance for credit losses by loan category for the years ended December 31, 2013 and 2012 (in thousands).

December 31, 2013	RE			Commercial			Unallocated	Total

4. Premises and Equipment

The components of premises and equipment are as follows:

<i>(In thousands)</i>	December 31,	
	2013	2012
Land	\$ 968	\$ 968
Buildings and improvements	14,613	14,573
Furniture and equipment	11,077	9,956
	26,658	25,497
Less accumulated depreciation and amortization	(14,536)	(13,235)
Total premises and equipment	\$12,122	\$12,262

Total depreciation expense on Company premises and equipment totaled \$1,316,000 and \$1,200,000 for the years ended December 31, 2013 and 2012, respectively, and is included in occupancy expense in the accompanying consolidated statements of income.

5. Investment in Limited Partnership

The Bank owns limited interests in private limited partnerships that acquire affordable housing properties in California that generate Low Income Housing Tax Credits under Section 42 of the Internal Revenue Code of 1986, as amended. The Bank's limited partnership investment is accounted for under the equity method. The Bank's noninterest expense associated with the utilization and expiration of these tax credits for the years ended December 31, 2013 and 2012 was \$253,000 and \$39,000, respectively. These limited partnership investments are expected to generate tax credits of approximately \$1.8 million over the life of the investment. The tax credits expire between 2014 and 2015. Tax credits available for income tax purposes for the years ended December 31, 2013 and 2012 totaled \$0 and \$87,000, respectively.

The Bank owns a 9.14% interest in a limited partnership which provides private capital for small to mid-sized businesses used to finance later stage growth, strategic acquisitions, ownership transitions, and recapitalizations, or

mezzanine capital. The Company also owns a 36% interest in a commercial real estate partnership. At December 31, 2013, the total investment in these partnerships was \$390,000 and \$3,559,000, respectively.

6. Deposits

Deposits include the following:

<i>(In thousands)</i>	December 31, 2013	December 31, 2012
Noninterest-bearing deposits	\$214,317	\$217,014
Interest-bearing deposits:		
NOW and money market accounts	198,928	203,771
Savings accounts	45,758	43,117
Time deposits:		
Under \$100,000	28,825	32,532
\$100,000 and over	54,661	66,853
Total interest-bearing deposits	328,172	346,273
Total deposits	\$542,489	\$563,287

At December 31, 2013, the scheduled maturities of all certificates of deposit and other time deposits are as follows:

<i>(In thousands)</i>	December 31, 2013
One year or less	\$68,343
More than one year, but less than or equal to two years	10,554
More than two years, but less than or equal to three years	2,019
More than three years, but less than or equal to four years	2,198
More than four years, but less than or equal to five years	358
More than five years	14
	\$83,486

The Company may utilize brokered deposits as an additional source of funding. At December 31, 2013 and 2012, the Company held brokered time deposits totaling \$11,500,000 and \$17,984,000, respectively. Of this balance at December 31, 2013, \$11,157,000 is included in time deposits of \$100,000 or more, and the remaining \$343,000 is included in time deposits of less than \$100,000. Included in brokered time deposits at December 31, 2013 are balances totaling \$3,900,000 maturing in three months or less, \$7,215,000 maturing in 3 months to a year, and the remaining \$385,000 maturing in 1 to 3 years.

Deposit balances representing overdrafts reclassified as loan balances totaled \$157,000 and \$155,000 as of December 31, 2013 and 2012, respectively.

Deposits of directors, officers and other related parties to the Bank totaled \$6,943,000 and \$6,505,000 at December 31, 2013 and 2012, respectively. The rates paid on these

deposits were similar to those customarily paid to the Bank's customers in the normal course of business.

7. Short-term Borrowings/Other Borrowings

At December 31, 2013, the Company had collateralized lines of credit with the Federal Reserve Bank of San Francisco totaling \$254,761,000, as well as Federal Home Loan Bank ("FHLB") lines of credit totaling \$7,094,000. At December 31, 2013, the Company had an uncollateralized line of credit with Pacific Coast Bankers Bank ("PCBB") totaling \$10,000,000. At December 31, 2013, the Company had no outstanding borrowing balances. The weighted average cost of borrowings for the year ended December 31, 2013 was 0.00%. These lines of credit generally have interest rates tied to the Federal Funds rate or are indexed to short-term U.S. Treasury rates or LIBOR. FHLB advances are collateralized by all of the Company's stock in the FHLB,

investment securities, and certain qualifying mortgage loans. As of December 31, 2013, \$7,468,000 in investment securities at FHLB were pledged as collateral for FHLB advances. Additionally, \$334,299,000 in real estate-secured loans were pledged at December 31, 2013, as collateral for used and unused borrowing lines with the Federal Reserve Bank totaling \$254,761,000. All lines of credit are on an "as available" basis and can be revoked by the grantor at any time.

The Company had collateralized lines of credit with the Federal Reserve Bank of San Francisco totaling \$217,841,000, as well as Federal Home Loan Bank ("FHLB") lines of credit totaling \$10,493,000 at December 31, 2012. At December 31, 2012, the Company had no outstanding borrowing balances. The weighted average cost of borrowings for the year ended December 31, 2012 was 0.00%.

8. Junior Subordinated Debt/Trust Preferred Securities

During July 2007, the Company formed USB Capital Trust II, a wholly-owned special purpose entity, for the purpose of issuing Trust Preferred Securities. USB Capital Trust II is a Variable Interest Entity (VIE) and a deconsolidated entity pursuant to ASC 810. On July 23, 2007, USB Capital Trust II issued \$15 million in Trust Preferred securities. The securities have a thirty-year maturity and bear a floating rate of interest (repricing quarterly) of 1.29% over the three-month LIBOR rate (initial coupon rate of 6.65%). Interest will be paid quarterly. Concurrent with the issuance of the Trust Preferred securities, USB Capital Trust II used the proceeds of the Trust Preferred securities offering to purchase a like amount of junior subordinated debentures of the Company. The Company will pay interest on the junior subordinated debentures to USB Capital Trust II, which represents the sole source of dividend distributions to the holders of the Trust Preferred securities. The Company may redeem the junior subordinated debentures at any time at par.

The Company elected the fair value measurement option for all the Company's new junior subordinated debentures issued under USB Capital Trust II.

Effective September 30, 2009 and beginning with the quarterly interest payment due October 1, 2009, the Company elected to defer interest payments on the Company's \$15.0 million of junior subordinated debentures relating to its trust preferred securities. The terms of the debentures and trust indentures allow for the Company to defer interest payments for up to

20 consecutive quarters without default or penalty. During the period that the interest deferrals are elected, the Company will continue to record interest expense associated with the debentures. Upon the expiration of the deferral period, all accrued and unpaid interest will be due and payable. During the deferral period, the Company is precluded from paying cash dividends to shareholders or repurchasing its stock. At December 31, 2013 and 2012, the Company had \$1,172,000 and \$891,000, respectively, in accrued and unpaid interest on the junior subordinated debt.

At December 31, 2013, as with previous periods, the Company performed a fair value measurement analysis on its junior subordinated debt using a discounted cash flow valuation model approach to determine the present value of those cash flows. The cash flow model utilizes the forward 3-month Libor curve to estimate future quarterly interest payments due over the life of the debt instrument, adjusted for deferrals of interest payments per the Company's election at September 30, 2009 expected to be paid cumulatively during the third quarter of 2014. These cash flows were discounted at a rate which incorporates a current market rate for similar-term debt instruments, adjusted for additional credit and liquidity risks associated with the junior subordinated debt. Although there is little market data in the current relatively illiquid credit markets, we believe the 8.19% discount rate used represents what a market participant would consider under the circumstances based on current market assumptions.

The fair value calculation performed resulted in a realized losses of \$776,000 and \$774,000 for the years ended December 31, 2013 and 2012, respectively. Fair value gains and losses are reflected as a component of noninterest income.

9. Taxes on Income

The tax effects of significant items comprising the Company's net deferred tax assets (liabilities) are as follows:

<i>(In thousands)</i>	December 31,	
	2013	2012
Deferred tax assets:		
Credit losses not currently deductible	\$ 4,927	\$ 4,391
Deferred compensation	1,920	1,912
Net operating losses	9,074	7,773
Depreciation	231	518
Accrued reserves	63	194
Write-down on other real estate owned	(97)	3,283
Capitalized OREO expenses	1,079	793
Other	2,555	1,908
Total deferred tax assets	19,752	20,772
Deferred tax liabilities:		
State Tax	(2,640)	(1,889)
FHLB dividend	(53)	(103)
Loss on limited partnership investment	(1,808)	(1,695)
Unrealized gain on AFS	(211)	(458)
Deferred gain SFAS No. 159 – fair value option	(2,471)	(2,819)
Fair value adjustments for purchase accounting	(167)	(123)
Interest on nonaccrual loans	36	(368)
Deferred loan costs	(570)	(602)
Prepaid expenses	(238)	(305)
Total deferred tax liabilities	(8,122)	(8,362)
Valuation Allowance	—	(2,686)
Net deferred tax assets	\$11,630	\$9,724

The Company periodically evaluates its deferred tax assets to determine whether a valuation allowance is required based upon a determination that some or all of the deferred assets may not be ultimately realized. At December 31, 2013 and 2012, the Company had a recorded valuation allowance of \$0 and \$2,686,000, respectively.

Income tax expense (benefit) for the years ended December 31, consist of the following:

<i>(In thousands)</i>			
	Federal	State	Total
2013:			
Current	\$1,059	\$ 819	\$ 1,878
Deferred	(1,055)	(718)	(1,773)
	\$4	\$ 101	\$105
2012:			
Current	\$719	\$(416)	\$303
Deferred	466	764	1,230
	\$1,185	\$ 348	\$ 1,533

A reconciliation of the statutory federal income tax rate to the effective income tax rate is as follows:

	Years Ended December 31,	
	2013	2012
Statutory federal income tax rate	34.0%	34.0%
State franchise tax, net of federal income tax benefit	0.9	3.0
Low Income Housing – federal credits	0.0	(1.1)
Cash surrender value of life insurance	(2.4)	(2.4)
Valuation Allowance	(33.0)	(13.2)
Other	1.9	(0.1)
	1.4%	20.2%

During the years ended December 31, 2013 and 2012, the valuation allowance decreased \$2,686,000 and \$1,000,000, respectively. At December 31, 2013, the Company has remaining federal net operating loss carry-forwards totaling \$8,123,000, and remaining state net operating loss carry-forwards totaling \$58,074,000 which expire between 2014 and 2032. The Company anticipates that it will utilize the net operating loss carry-forwards expiring in 2014.

The Company periodically reviews its tax positions under the accounting standards related to uncertainty in income taxes, which defines the criteria that an individual tax position would have to meet for some or all of the income tax benefit to be recognized in a taxable entity's financial statements. Under the guidelines, an entity should recognize the financial statement benefit of a tax position if it determines that it is more likely than not that the position will be sustained on examination. The term, "more likely than not", means a likelihood of more than 50 percent. In assessing whether the more-likely-than-not criterion is met, the entity should assume that the tax position will be reviewed by the applicable taxing authority and all available information is known to the taxing authority.

The Company and its subsidiary file income tax returns in the U.S federal jurisdiction, and several states within the U.S. There are no filings in foreign jurisdictions. During 2010, the Company amended its federal tax returns for the year 2004 through 2009 to utilize the five-year NOL carry-back provisions allowed by the IRS for 2009. These amended tax returns were audited by the IRS and the examination was finalized during the first quarter of 2013 and the settlement resulted in interest income of \$95,000 and \$0 for the years ended December 31, 2013 and 2012, respectively. The Company is no longer subject to examination by taxing authorities for years endings before

2010 for federal purposes and 2003 for California purposes. The Company's policy is to recognize any interest or penalties related to uncertain tax position in income tax expense.

The Company is not currently aware of any other tax jurisdictions where the Company or any subsidiary is subject to examination by federal, state, or local taxing authorities.

10. Stock Based Compensation

Options have been granted to officers and key employees at an exercise price equal to estimated fair value at the date of grant as determined by the Board of Directors. All options granted are service awards, and as such are based solely upon fulfilling a requisite service period (the vesting period). In May 2005, the Company's shareholders approved the adoption of the United Security Bancshares 2005 Stock Option Plan (2005 Plan). At the same time, all previous plans, including the 1995 Plan, were terminated. The 2005 Plan provides for the granting of up to 622,358 shares of authorized and unissued shares of common stock at option prices per share which must not be less than 100% of the fair market value per share at the time each option is granted.

The options granted (incentive stock options for employees and non-qualified stock options for Directors) have an exercise price at the prevailing market price on the date of grant. All options granted are exercisable 20% each year commencing one year after the date of grant and expire ten years after the date of grant.

Under the 2005 Plan, 193,082 granted shares are outstanding (163,210 incentive stock options and 29,872 nonqualified stock options) as of December 31, 2013, of which 153,179 are vested.

Options outstanding, exercisable, exercised and forfeited are as follows:

	2005 Plan	Weighted Average Exercise Price
Options outstanding December 31, 2012	194,224	\$10.27
Granted during the year	25,502	4.16
Exercised during the year	5,202	2.29
Forfeited during the year	21,442	2.29
Options outstanding December 31, 2013	193,082	\$10.57

Included in total outstanding options at December 31, 2013, are 153,179 exercisable shares at a weighted average price of \$12.27, a weighted average remaining contract term of 2.50 years and intrinsic value of \$15,000.

Included in salaries and employee benefits for the years ended December 31, 2013 and 2012, is \$29,000 and \$18,000 of share-based compensation, respectively. The related tax benefit on share-based compensation recorded in the provision for income taxes was not material to either year.

As of December 31, 2013 and 2012, there was \$64,000 and \$42,000, respectively, of total unrecognized compensation expense related to nonvested stock options. This cost is expected to be recognized over a weighted average period of approximately 3.0 years. No options were exercised during 2012, while 5,202 options were exercised during 2013.

	December 31, 2013	December 31, 2012
Weighted average grant-date fair value of stock options granted	\$ 2.80	\$ 1.33
Total fair value of stock options vested	\$24,310	\$26,246
Total intrinsic value of stock options exercised	\$ 9,665	n/a

The Bank determines fair value at grant date using the Black-Scholes-Merton pricing model that takes into account the stock price at the grant date, the exercise price, the expected life of the option, the volatility of the underlying stock and the expected dividend yield and the risk-free interest rate over the expected life of the option.

The weighted average assumptions used in the pricing model are noted in the table below. The expected term of options granted is derived using the simplified method, which is based upon the average period between vesting term and expiration term of the options. The risk free rate for periods within the contractual life of the option is based on the U.S. Treasury yield curve in effect at the time of the grant. Expected volatility is based on the historical volatility of the Bank's stock over a period commensurate with the expected

term of the options. The Company believes that historical volatility is indicative of expectations about its future volatility over the expected term of the options.

The Bank expenses the fair value of the option on a straight-line basis over the vesting period for each separately vesting portion of the award. The Bank estimates forfeitures and only recognizes expense for those shares expected to vest. Based upon historical evidence, the Company has determined that because options are granted to a limited number of key employees rather than a broad segment of the employee base, expected forfeitures, if any, are not material. The Company granted 25,502 shares and 25,757 shares in incentive stock options during 2013 and 2012, respectively. The assumptions used for the 2013 and 2012 stock option grant are as follows:

	Year Ended December 31, 2013	Year Ended December 31, 2012
Risk Free Interest Rate	1.20%	1.02%
Expected Dividend Yield	—%	—%
Expected Life in Years	5.5 years	5.5 years
Expected Price Volatility	78.88%	79.43%

The Black-Scholes-Merton option valuation model requires the input of highly subjective assumptions, including the expected life of the stock based award and stock price volatility. The assumptions listed above represent management's best estimates, but these estimates involve inherent uncertainties and the application of management judgment. As a result, if other assumptions had been used, the Bank's recorded stock-based compensation expense could have been materially different from that previously reported in proforma disclosures. In addition, the Bank is required to estimate the expected forfeiture rate and only recognize expense for those shares expected to vest. If the Bank's actual forfeiture rate is materially different from the estimate, the share-based compensation expense could be materially different.

11. Employee Benefit Plans

401K Plan

The Company has a Cash or Deferred 401(k) Stock Ownership Plan (the "401(k) Plan") organized under Section 401(k) of the Code. All employees of the Company are initially eligible to participate in the 401(k) Plan upon the first day of the month after date of hire. Under the terms of the plan, the participants may elect to make contributions to the 401(k) Plan as determined by the Board of Directors. Participants are automatically vested 100% in all employee contributions. Participants may direct the investment of their contributions to the 401(k) Plan in any of several authorized investment vehicles. The Company contributes funds to the Plan up to 4% of the employees' eligible annual compensation. Company contributions are immediately 100% vested at the time of contribution. During 2013 and 2012, the Company made matching contributions of \$256,000 and \$229,000 to the 401(k) Plan, respectively.

Salary Continuation Plan

The Company has an unfunded, non-qualified Salary Continuation Plan for senior executive officers and

certain other key officers of the Company, which provides additional compensation benefits upon retirement for a period of 15 years. Future compensation under the Plan is earned by the employees for services rendered through retirement and vests over a period of 12 to 15 years. The Company accrues for the salary continuation liability based on anticipated years of service and vesting schedules provided under the Plan. The Company's current benefit liability is determined based upon vesting and the present value of the benefits at a corresponding discount rate. The discount rate used is an equivalent rate for high-quality investment-grade bonds with lives matching those of the service periods remaining for the salary continuation contracts, which averages approximately 20 years. At December 31, 2013 and 2012, \$4,031,000 and \$4,298,000, respectively, had been accrued to date, based on a discounted cash flow using an average discount rate of 3.39% and 2.55%, respectively, and is included in other liabilities. In connection with the implementation of the Salary Continuation Plans, the Company purchased single premium universal life insurance policies on the life of each of the key employees covered under the Plan. The Company is the owner and beneficiary of these insurance policies. The cash surrender value of the policies was \$4,421,000 and \$4,297,000 at December 31, 2013 and 2012, respectively, and is included on the consolidated balance sheet in cash surrender value of life insurance. Income on these policies, net of expense, totaled approximately \$124,000 and \$120,000 for the years ended December 31, 2013 and 2012, respectively. Although the Plan is unfunded, the Company intends to utilize the proceeds of such policies to settle the Plan obligations. Under Internal Revenue Service regulations, the life insurance policies are the property of the Company and are available to satisfy the Company's general creditors.

Pursuant to the guidance contained in ASC Topic 715 "Compensation," the Company is required to recognize in accumulated other comprehensive (loss) income,

the amounts that have not yet been recognized as components of net periodic benefit costs. These unrecognized costs arise from changes in estimated interest rates used in the calculation of net liabilities under the plan.

As of December 31, 2013 and 2012, the Company had approximately \$436,000 and \$598,000, respectively in unrecognized net periodic benefit costs arising from changes in interest rates used in calculating the current post-retirement liability required under the plan. This amount represents the difference between the plan liabilities calculated under net present value calculations, and the net plan liabilities actually recorded on the Company's books at December 31, 2013 and 2012.

Salary continuation expense is included in salaries and benefits expense, and totaled \$160,000 and \$90,000 for the years ended December 31, 2013 and 2012, respectively.

Officer Supplemental Life Insurance Plan

The Company owns single premium Bank-owned life insurance policies (BOLI) on certain officers with a portion of the death benefits available to the officers' beneficiaries. The BOLI's initial net cash surrender value is equivalent to the premium paid, and it adds income through non-taxable increases in its cash surrender value, net of the cost of insurance, plus any death benefits ultimately received by the Company. The cash surrender value of these insurance policies totaled \$12,782,000 and \$12,384,000 at December 31, 2013 and 2012, and is included on the consolidated balance sheet in cash surrender value of life insurance. Income on these policies, net of expense, totaled approximately \$398,000 and \$411,000 for the years ended December 31, 2013 and 2012, respectively.

12. Commitments and Contingent Liabilities

Lease Commitments: The Company leases land and premises for its branch banking offices and administration facilities. The initial terms of these leases expire at various dates through 2023. Under the provisions of most of these leases, the Company has the option to extend the leases beyond their original terms at rental rates adjusted for changes reported in certain economic indices or as reflected by market conditions. The total expense on land and premises leased under operating leases was \$652,000 and \$636,000 during 2013 and 2012, respectively. Total rent expense for the years ended December 31, 2013 and 2012 included approximately \$18,000 and \$8,000 in reductions, respectively, related to adjustments made pursuant to ASC Topic 840, "Leases." The adjustments represent the difference between contractual rent amounts paid and rent amounts actually expensed under the straight-line method pursuant to ASC 840.

Future minimum rental commitments under existing non-cancelable leases as of December 31, 2013 are as follows:

<i>(In thousands):</i>	
2014	\$ 530
2015	457
2016	310
2017	274
2018	270
Thereafter	347
	<u>\$2,188</u>

Financial Instruments with Off-Balance Sheet Risk: The Company is party to financial instruments with off-balance sheet risk which arise in the normal course of business. These instruments may contain elements of credit risk, interest rate risk and liquidity risk, and include commitments to extend credit and standby letters of credit. The credit risk associated with these instruments is essentially the same as that involved in extending credit to customers and is represented by the contractual amount indicated in the table below:

<i>(in thousands)</i>	Contractual amount – December 31,	
	2013	2012
Commitments to extend credit	\$63,271	\$60,050
Standby letters of credit	2,001	2,504

Commitments to extend credit are agreements to lend to a customer, as long as there is no violation of any condition established in the contract. Substantially all of these commitments are at floating interest rates based on the Prime rate, and most have fixed expiration dates. The Company evaluates each customer's creditworthiness on a case-by-case basis, and the amount of collateral obtained, if deemed necessary, is based on management's credit evaluation. Collateral held varies but includes accounts receivable, inventory, leases, property, plant and equipment, residential real estate and income-producing properties. Many of the commitments are expected to expire without being drawn upon and, as a result, the total commitment amounts do not necessarily represent future cash requirements of the Company.

Standby letters of credit are generally unsecured and are issued by the Company to guarantee the performance of a customer to a third party. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loans to customers. The Company's letters of credit are short-term guarantees and generally have terms from less than one month to approximately 3 years. At December 31, 2013, the maximum potential amount of future undiscounted payments the Company could be required to make under outstanding standby letters of credit totaled \$2,001,000.

13. Fair Value Measurements and Disclosure

The following summary disclosures are made in accordance with the guidance provided by ASC Topic 825 "Fair Value Measurements and Disclosures" (formerly Statement of Financial Accounting Standards No. 107, "Disclosures about Fair Value of Financial Instruments,") which requires the disclosure of fair value information about both on- and off-balance sheet financial instruments where it is practicable to estimate that value.

Generally accepted accounting guidance clarifies the definition of fair value, describes methods used to appropriately measure fair value in accordance with generally accepted accounting principles and expands fair value disclosure requirements. This guidance applies whenever other accounting pronouncements require or permit fair value measurements.

The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three broad levels (Level 1, Level 2, and Level 3). Level 1 inputs are unadjusted quoted prices in active markets (as defined) for identical assets or liabilities that the reporting entity has the ability to access at the measurement date. Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. Level 3 inputs are unobservable inputs for the asset or liability, and reflect the reporting entity's own assumptions about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk).

The table below is a summary of fair value estimates for financial instruments and the level of the fair value hierarchy within which the fair value measurements are categorized at the periods indicated:

December 31, 2013					
<i>(In thousands)</i>	Carrying Amount	Estimated Fair Value	Quoted Prices In Active Markets for Identical Assets Level 1	Significant Other Observable Inputs Level 2	Significant Unobservable Inputs Level 3
Financial Assets:

The Company performs fair value measurements on certain assets and liabilities as the result of the application of current accounting guidelines. Some fair value measurements, such as available-for-sale securities

(AFS) and junior subordinated debt are performed on a recurring basis, while others, such as impairment of loans, other real estate owned, goodwill and other intangibles, are performed on a nonrecurring basis.

The following tables summarize the Company's assets and liabilities that were measured at fair value on a recurring and non-recurring basis as of December 31, 2013 (in 000's):

Description of Assets	December 31, 2013	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
AFS Securities (2):				
U.S. Government agencies	\$14,501	\$ —	\$14,500	\$ —

Total	\$38,669	\$13,593	\$18,251	\$6,825

Description of Liabilities	December 31, 2012	Quoted Prices in	Significant Other	Significant
		Active Markets for Identical Assets (Level 1)	Observable Inputs (Level 2)	Unobservable Inputs (Level 3)
Junior subordinated debt (2)	\$10,068	\$—	\$—	\$10,068
Total	\$10,068	\$—	\$—	\$10,068

(1) Nonrecurring
(2) Recurring

The following table presents quantitative information about Level 3 fair value measurements for the Company's assets measured at fair value on a non-recurring basis at December 31, 2013:

Financial Instrument	Fair Value	December 31, 2013		
		Valuation Technique	Unobservable Input	Range, Weighted Average
Impaired Loans:				
Real estate mortgage	\$1,388	Sales Comparison Approach	Adjustment for difference between comparable sales	1%-32%, 17.5%
Other real estate owned:				
Real estate construction	3,889	Discounted cash flow	Discount rate	1%-10%, 8.49%

The following methods and assumptions were used in estimating the fair values of financial instruments:

Cash and Cash Equivalents – The carrying amounts reported in the balance sheets for cash and cash equivalents approximate their estimated fair values.

Interest-bearing Deposits – Interest bearing deposits in other banks consist of fixed-rate certificates of deposits. Accordingly, fair value has been estimated based upon interest rates currently being offered on deposits with similar characteristics and maturities.

Investments – Available for sale securities are valued based upon open-market price quotes obtained from reputable third-party brokers that actively make a market in those securities. Market pricing is based upon specific CUSIP identification for each individual security. To the extent there are observable prices in the market, the mid-point of the bid/ask price is used to determine fair value of individual securities. If that data is not available for the last 30 days, a Level 2-type matrix pricing approach based on comparable securities in the market is utilized. Level-2 pricing may include using a forward spread from the last observable trade or may use a proxy bond like a TBA mortgage to come up with a price for the security being valued. Changes in fair market value are recorded through other comprehensive loss as the securities are available for sale.

Loans – Fair values of variable rate loans, which repriced frequently and with no significant change in credit risk, are based on carrying values adjusted for credit risk. Fair values for all other loans, except impaired loans, are estimated using discounted cash flows over their remaining maturities, using interest rates at which similar loans would currently be offered to borrowers with similar credit ratings and for the same remaining maturities.

Impaired Loans – Fair value measurements for impaired loans are performed pursuant to authoritative accounting guidance and are based upon either collateral values supported by appraisals, observed market prices, or discounted cash flows. Changes are not recorded directly as an adjustment to current earnings or comprehensive income, but rather as an adjustment component in determining the overall adequacy of the loan loss reserve. Such adjustments to the estimated fair value of impaired loans may result in increases or decreases to the provision for credit losses

recorded in current earnings. Collateral dependent loans are measured for impairment using the fair value of the collateral.

Other Real Estate Owned – Nonrecurring adjustments to certain commercial and residential real estate properties classified as other real estate owned (OREO) are measured at the lower of carrying amount or fair value, less costs to sell. Fair values are generally based on third party appraisals of the property, resulting in a Level 3 classification. In cases where the carrying amount exceeds the fair value, less costs to sell, an impairment loss is recognized.

Bank-owned Life Insurance – Fair values of life insurance policies owned by the Company approximate the insurance contract's cash surrender value.

Deposits – In accordance with authoritative accounting guidance, fair values for transaction and savings accounts are equal to the respective amounts payable on demand at December 31, 2013 and 2012 (i.e., carrying amounts). The Company believes that the fair value of these deposits is clearly greater than that prescribed under authoritative accounting guidance. Fair values of fixed-maturity certificates of deposit were estimated using the rates currently offered for deposits with similar remaining maturities.

Borrowings – Borrowings consist of federal funds sold, securities sold under agreements to repurchase, and other short-term borrowings. Fair values of borrowings were estimated using the rates currently offered for borrowings with similar remaining maturities.

Junior Subordinated Debt – The fair value of the junior subordinated debt was determined based upon a discounted cash flows model utilizing observable market rates and credit characteristics for similar debt instruments. In its analysis, the Company used characteristics that market participants generally use, and considered factors specific to (a) the liability, (b) the principal (or most advantageous) market for the liability, and (c) market participants with whom the reporting entity would transact in that market. For the year ended December 31, 2013, cash flows were discounted at a rate which incorporates a current market rate for similar-term debt instruments, adjusted for credit and liquidity risks associated with similar junior subordinated debt and circumstances unique to the Company. The Company believes that the subjective nature of these inputs, due primarily to the current economic environment, require

the junior subordinated debt to be classified as a Level 3 fair value.

Accrued Interest Receivable and Payable – The carrying value of these instruments is a reasonable estimate of fair value.

Off-Balance Sheet Instruments – Off-balance sheet instruments consist of commitments to extend credit, standby letters of credit and derivative contracts. The contract amounts of commitments to extend credit and standby letters of credit are disclosed in Note 12. Fair values of commitments to extend credit are estimated using the interest rate currently charged to enter into similar agreements, taking into account the remaining

terms of the agreements and the present counterparties' credit standing. There was no material difference between the contractual amount and the estimated value of commitments to extend credit at December 31, 2013 and 2012.

Fair values of standby letters of credit are based on fees currently charged for similar agreements. The fair value of commitments generally approximates the fees received from the customer for issuing such commitments. These fees are not material to the Company's consolidated balance sheet and results of operations.

The following tables provide a reconciliation of assets and liabilities at fair value using significant unobservable inputs (Level 3) on a recurring basis during the period (in 000's):

Reconciliation of Assets:

Beginning balance	
Total gains or (losses) included in earnings (or other comprehensive loss)	
Transfers in and/or out of Level 3	
Ending balance	

The amount of total gains or (losses) for the period included in earnings (or other comprehensive loss) attributable to the change in unrealized gains or losses relating to assets still held at the reporting date

December 31, 2013	December 31, 2012
Private label residential mortgage obligations	Private label residential mortgage obligations
\$—	\$ 7,972
—	(468)
—	(7,504)
\$—	\$ —
\$—	\$ —

Reconciliation of Liabilities:

Beginning balance	
Total gains (losses) included in earnings (or changes in net assets)	
Transfers in and/or out of Level 3	
Ending balance	

The amount of total gains (losses) for the period included in earnings (or changes in net assets) attributable to the change in unrealized gains or losses and accrued interest relating to liabilities still held at the reporting date

December 31, 2013	December 31, 2012
Junior Subordinated Debt	Junior Subordinated Debt
\$10,068	\$ 9,027
776	774
281	267
\$11,125	\$10,068
\$ 776	\$ 774

The following table provides a description of the valuation technique, unobservable input, and qualitative information about the unobservable inputs for the Company's liabilities classified as Level 3 and measured at fair value on a recurring basis at December 31, 2013 and 2012:

December 31, 2013				December 31, 2012			
Financial Instrument	Valuation Technique	Unobservable Input	Weighted Average	Financial Instrument	Valuation Technique	Unobservable Input	Weighted Average
Subordinated Debt	Discounted cash flow	Discount Rate	8.19%	Subordinated Debt	Discounted cash flow	Discount Rate	7.23%

Management believes that the credit risk adjusted spread utilized in the fair value measurement of the junior subordinated debentures carried at fair value is indicative of the nonperformance risk premium a willing market participant would require under current market conditions, that is, the inactive market. Management attributes the change in fair value of the junior subordinated debentures during the period to market changes in the nonperformance expectations and pricing of this type of debt, and not as a result of changes to our entity-specific credit risk. The narrowing of the credit risk adjusted spread above the Company's contractual spreads has primarily contributed to the negative fair value adjustments. Generally, an increase in the credit risk adjusted spread and/or a decrease in the three month LIBOR swap curve will result in positive fair value adjustments (and decrease the fair value measurement). Conversely, a decrease in the credit risk adjusted spread and/or an increase in the three month LIBOR swap curve will result in negative fair value adjustments (and increase the fair value measurement).

14. Regulatory Matters

Regulatory Agreement with the Federal Reserve Bank of San Francisco

Effective March 23, 2010, United Security Bancshares (the "Company") and its wholly owned subsidiary, United Security Bank (the "Bank"), entered into a written agreement (the "Agreement") with the Federal Reserve Bank of San Francisco. Under the terms of the Agreement, the Company and the Bank agreed, among other things, to strengthen board oversight of management and the Bank's operations; submit an enhanced written plan to strengthen credit risk management practices and improve the Bank's position on the past due loans, classified loans, and other real estate owned; maintain a sound process

for determining, documenting, and recording an adequate allowance for loan and lease losses; improve the management of the Bank's liquidity position and funds management policies; maintain sufficient capital at the Company and Bank level; and improve the Bank's earnings and overall condition. The Company and Bank have also agreed not to increase or guarantee any debt, purchase or redeem any shares of stock, declare or pay any cash dividends, or pay interest on the Company's junior subordinated debt or trust preferred securities, without prior written approval from the Federal Reserve Bank. The Company generates no revenue of its own and as such, relies on dividends from the Bank to pay its operating expenses and interest payments on the Company's junior subordinated debt. The inability of the Bank to pay cash dividends to the Company may hinder the Holding Company's ability to meet its ongoing operating obligations.

This Agreement entered into with the Federal Reserve Bank of San Francisco was a result of a regulatory examination that was conducted by the Federal Reserve and the California Department of Financial Institutions in June 2009 ("Report of Examination"). The Agreement was the result of significant increases in nonperforming assets, both classified loans and OREO, during 2008 and 2009 increasing the overall risk profile of the Bank. The increased risk profile of the Bank included heightened concerns about the Bank's use of brokered and other wholesale funding sources which had been used to fund loan growth and reduce the Company's overall cost of interest bearing liabilities. With loan growth funded to some degree by wholesale funding sources, liquidity risk increased, and higher levels of nonperforming assets increased risk to equity capital and potential volatility in earnings.

Regulatory Order from the California Department of Business Oversight

- During May of 2010, the California Department of Business Oversight (formerly known as the California Department of Financial Institutions) issued a written order (the "Order") pursuant to section 1913 of the California Financial Code to the Bank as a result of a regulatory examination that was conducted by the Federal Reserve and the California Department of Business Oversight in June 2009. The Order issued by the California Department of Business Oversight was similar to the agreement with the Federal Reserve Bank of San Francisco, except for certain additional requirements.
- On September 24, 2013, the Bank entered into a Memorandum of Understanding (the "MOU") with the California Department of Business Oversight (formerly known as the California Department of Financial Institutions). Effective October 15, 2013, the California Department of Business Oversight terminated the Order issued in May 2010. One additional requirement is that the Bank must maintain a ratio of tangible shareholders' equity to total tangible assets equal to or greater than 9.0%.

As of December 31, 2013, the Bank is compliance with the requirements of the Agreement and the MOU including its deadlines.

Capital Adequacy – The Company (on a consolidated basis) and the Bank are subject to various regulatory capital requirements adopted by the Board of Governors of the Federal Reserve System ("Board of Governors"). Failure to meet minimum capital requirements can initiate certain mandates and possible additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company's consolidated financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the consolidated Company and the Bank must meet specific capital guidelines that involve quantitative measures of their assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors. Prompt corrective action provisions are not applicable to bank holding companies.

Pursuant to the March 2010 Agreement with the Federal Reserve Bank, the Company and the Bank are required

to maintain sufficient capital to support current and future capital needs, including compliance with Capital Adequacy Guidelines taking into account the volume of classified assets, concentrations of credit, the level of the allowance for loan losses, current and projected growth, and projected retained earnings. Pursuant to the MOU issued by the California Department of Business Oversight in October 2013, the Bank is required to maintain a ratio of tangible shareholders' equity to total tangible assets equal to or greater than 9.0%. For purposes of the MOU, "tangible shareholders' equity" is defined as shareholders' equity minus intangible assets. The Bank's ratio of tangible shareholders' equity to total tangible assets was 13.2% and 11.7% at December 31, 2013 and 2012, respectively.

As part of the March 2010 Agreement, the Company has written, and submitted to the Federal Reserve Bank, a capital plan that includes guidelines and trigger points to ensure sufficient capital is maintained at the Bank and the Company, and that capital ratios are maintained at a level deemed appropriate under regulatory guidelines given the level of classified assets, concentrations of credit, ALLL, current and projected growth, and projected retained earnings. The capital plan also contains contingency strategies to obtain additional capital as required to fulfill future capital requirements for both the Bank as a separate legal entity, and the Company on a consolidated basis. The capital plan also addresses the requirement of both the Bank and the Company to comply with the Federal Banks' Capital Adequacy Guidelines, and contingency plans to ensure the maintenance of adequate capital levels under those guidelines.

Quantitative measures established by regulation to ensure capital adequacy require insured institutions to maintain a minimum leverage ratio of Tier 1 capital (the sum of common stockholders' equity, noncumulative perpetual preferred stock and minority interests in consolidated subsidiaries, minus intangible assets, identified losses and investments in certain subsidiaries, plus unrealized losses or minus unrealized gains on available for sale securities) to total assets. Institutions which have received the highest composite regulatory rating and which are not experiencing or anticipating significant growth are required to maintain a minimum leverage capital ratio of 3% of Tier 1 capital to total assets. All other institutions are required to maintain a minimum leverage capital ratio of at least 100 to 200 basis points above the 3% minimum requirement.

<i>(In thousands)</i>	Actual		For Capital Adequacy Purposes		To Be Well Capitalized Under Prompt Corrective Action Provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
As of December 31, 2013 (Company):						
Total Capital (to Risk Weighted Assets)	\$77,530	17.20%	\$36,061	8.00%	N/A	N/A
Tier 1 Capital (to Risk Weighted Assets)	71,827	15.93%	18,031	4.00%	N/A	N/A
Tier 1 Capital (to Average Assets)	71,827	11.19%	25,672	4.00%	N/A	N/A
As of December 31, 2013 (Bank):						
Total Capital (to Risk Weighted Assets)	\$78,499	17.41%	\$36,061	8.00%	\$45,077	10.00%
Tier 1 Capital (to Risk Weighted Assets)	72,796	16.15%	18,031	4.00%	27,046	6.00%
Tier 1 Capital (to Average Assets)	72,796	11.43%	25,484	4.00%	31,855	5.00%
As of December 31, 2012 (Company):						
Total Capital (to Risk Weighted Assets)	\$71,436	15.49%	\$36,892	8.00%	N/A	N/A
Tier 1 Capital (to Risk Weighted Assets)	65,742	14.26%	18,446	4.00%	N/A	N/A
Tier 1 Capital (to Average Assets)	65,742	10.66%	24,671	4.00%	N/A	N/A
As of December 31, 2012 (Bank):						
Total Capital (to Risk Weighted Assets)	\$73,296	15.77%	\$37,175	8.00%	\$46,468	10.00%
Tier 1 Capital (to Risk Weighted Assets)	67,558	14.54%	18,587	4.00%	27,168	6.00%
Tier 1 Capital (to Average Assets)	67,558	10.95%	24,671	4.00%	30,838	5.00%

The Board of Governors has also adopted a statement of policy, supplementing its leverage capital ratio requirements, which provides definitions of qualifying total capital (consisting of Tier 1 capital and Tier 2 supplementary capital, including the allowance for loan losses up to a maximum of 1.25% of risk-weighted assets) and sets forth minimum risk-based capital ratios of capital to risk-weighted assets. Insured institutions are required to maintain a ratio of qualifying total capital to risk weighted assets of 8%, at least one-half of which must be in the form of Tier 1 capital.

Under the regulatory Prompt Corrective Action Provisions within the Agreement and the MOU, the Bank cannot be considered "Well Capitalized". However, as of December 31, 2013, the Company and the Bank meets all capital adequacy requirements to which they are subject.

Under regulatory guidelines, the \$15 million in Trust Preferred Securities issued by USB Capital Trust II in July of 2007 qualifies as Tier 1 capital up to 25% of

Tier 1 capital. Any additional portion of Trust Preferred Securities qualifies as Tier 2 capital.

Dividends – Cash dividends, if any, paid to shareholders are paid by the bank holding company, subject to restrictions set forth in the California General Corporation Law. All dividends paid during 2013 and 2012 were in the form of stock dividends rather than cash dividends.

The primary source of funds with which cash dividends are paid to shareholders comes from cash dividends received by the Company from the Bank. The Company received no cash dividends from the Bank during the years ended December 31, 2013 and 2012.

Under California state banking law, the Bank may not pay cash dividends in an amount which exceeds the lesser of the retained earnings of the Bank or the Bank's net income for the last three fiscal years (less the amount of distributions to shareholders during that period of time). If the above test is not met, cash dividends may only be paid with the prior approval of the California

Department of Business Oversight, in an amount not exceeding the greater of: (i) the Bank's retained earnings; (ii) its net income for the last fiscal year; or (iii) its net income for the current fiscal year. As noted above, the terms of the regulatory agreement with the Federal Reserve prohibit both the Company and the Bank from paying dividends without prior approval of the Federal Reserve.

Cash Restrictions – The Bank is required to maintain average reserve balances with the Federal Reserve Bank. In prior years, the Company implemented a deposit reclassification program, which allows the Company to reclassify a portion of transaction accounts to non-transaction accounts for reserve purposes. The deposit reclassification program was provided by a third-party vendor, and has been approved by the Federal Reserve Bank.

15. Supplemental Cash Flow Disclosures

<i>(In thousands)</i>	Year Ended December 31,	
	2013	2012
Cash paid (received) during the period for:		
Interest	\$1,356	\$2,101
Income Taxes	(3,679)	(89)
Noncash investing activities:		
Loans transferred to foreclosed property	437	1,999
Financed OREO	2,328	508
Extinguishment of Note Payable	—	83

16. Common Stock Dividend

The Company declared one-percent (1)% common stock dividends during each of the four quarters ended December 31, 2013, September 30, 2013, June 30, 2013, and March 31, 2013. All 1% stock dividends were considered "small stock dividends" resulting in a transfer between retained earnings and common stock an amount equal to the number of shares issued in the stock dividend multiplied by the stock's closing price at the date of declaration. Other than for earnings-per-share calculations, shares issued for the stock dividend have been treated prospectively for financial reporting purposes. For purposes of earnings per share calculations, the Company's weighted average shares outstanding and potentially dilutive shares used in the computation of earnings per share have been restated after giving retroactive effect to a 1% stock dividend to shareholders for all periods presented.

The Company declared one-percent (1)% common stock dividends during each of the four quarters ended December 31, 2012, September 30, 2012, June 30, 2012, and March 31, 2012. All 1% stock dividends were considered "small stock dividends" resulting in a transfer

between retained earnings and common stock an amount equal to the number of shares issued in the stock dividend multiplied by the stock's closing price at the date of declaration. Other than for earnings-per-share calculations, shares issued for the stock dividend have been treated prospectively for financial reporting purposes. For purposes of earnings per share calculations, the Company's weighted average shares outstanding and potentially dilutive shares used in the computation of earnings per share have been restated after giving retroactive effect to a 1% stock dividend to shareholders for all periods presented.

17. Net Income Per Share

The following table provides a reconciliation of the numerator and the denominator of the basic EPS computation with the numerator and the denominator of the diluted EPS computation. (Weighted average shares have been adjusted to give retroactive recognition for the 1% stock dividend for each of the quarters since the third quarter ended September 30, 2008):

<i>(In thousands, except earnings per share data)</i>	Year Ended December 31,	
	2013	2012
Net income available to common shareholders	\$7,269	\$6,069
Weighted average shares outstanding	14,798,135	14,789,001
Add: dilutive effect of stock options	902	—
Weighted average shares outstanding adjusted for potential dilution	14,799,037	14,789,001
Basic earnings per share	\$0.49	\$0.41
Diluted earnings per share	\$0.49	\$0.41
Anti-dilutive shares excluded from earnings per share calculation	189,000	192,000

18. Common Stock Repurchase Plan

On May 16, 2007, the Company's Board of Directors approved a plan to repurchase, as conditions warrant, up to 750,895 shares of the Company's common stock on the open market or in privately negotiated transactions. The repurchase plan represents approximately 5.00% of the Company's currently outstanding common stock. The duration of the program is open-ended and the timing of purchases will depend on market conditions. As of December 31, 2013, there were 650,106 shares available for repurchase.

As a condition of the Written Agreement entered into with the Federal Reserve Bank of San Francisco (FRB) on May 23, 2010, and the MOU entered into with the California Department of Business Oversight (DBO) on September 24, 2013, the Company may not repurchase any of its common stock without prior approval of the FRB and the DBO. The Company did not repurchase any common shares during the years ended December 31, 2013 and 2012.

19. Goodwill and Intangible Assets

At December 31, 2013, the Company had \$4,488,000 of goodwill and \$62,000 of core deposit intangibles. The following table summarizes the carrying value of those assets at December 31, 2013 and 2012.

<i>(In thousands)</i>	December 31, 2013	December 31, 2012
Goodwill	\$4,488	\$4,488
Core deposit intangible assets	62	249
Total goodwill and intangible assets	\$4,550	\$4,737

Core deposit intangibles and other identified intangible assets are amortized over their useful lives, while goodwill is not amortized. The Company conducts periodic impairment analysis on goodwill and intangible assets and goodwill at least annually or more often as conditions require. The following table summarizes the amortization expense and impairment losses recorded on the Company's intangible assets and goodwill for the years ended December 31, 2013 and 2012.

<i>(In thousands)</i>	December 31, 2013	December 31, 2012
Amortization expense – core deposit intangibles	\$187	\$198
Amortization expense – other intangibles	—	106
Total amortization expense	\$187	\$304
Impairment losses – core deposit intangibles	\$—	\$—
Impairment losses – goodwill	—	—
Total impairment losses	\$—	\$—

Goodwill: The largest component of goodwill is related to the Legacy merger (Campbell reporting unit) completed during February 2007 and totaled approximately \$2.9 million at December 31, 2013. The Company conducted its annual impairment testing of the goodwill related to the Campbell reporting unit effective March 31, 2013. Impairment testing for goodwill is a two-step process.

The first step in impairment testing is to identify potential impairment, which involves determining and comparing the fair value of the operating unit with its carrying value. If the fair value of the reporting unit exceeds its carrying value, goodwill is not impaired. If the carrying value exceeds fair value, there is an indication of possible impairment and the second step is performed to determine the amount of the impairment, if any. The fair value determined in the step one testing is determined based on a discounted cash flow methodology using estimated market discount rates and projections of future cash flows for the Campbell reporting unit. In addition to projected cash flows, the Company also utilizes other market metrics including industry multiples of earnings and price-to-book ratios

to estimate what a market participant would pay for the operating unit in the current business environment. Determining the fair value involves a significant amount of judgment, including estimates of changes in revenue growth, changes in discount rates, competitive forces within the industry, and other specific industry and market valuation conditions. If at the conclusion of the step 1 analysis, the Company concludes that the potential for goodwill impairment exists, step-two testing will be required to determine goodwill impairment and the amount of goodwill that might be impaired, if any. The second step in impairment analysis compares the fair value of the Campbell reporting unit to the aggregate fair values of its individual assets, liabilities and identified intangibles. Based on the results of the first step of the impairment analysis at December 31, 2013, the Company concluded that the fair value of the reporting unit exceeds its carrying value; therefore, goodwill was not impaired.

Core Deposit Intangibles: The core deposit intangible asset, which totaled \$3.0 million at the time of merger, is being amortized over an estimated life of approximately seven years. The Company recognized no amortization

expense related to the Legacy operating unit during the year ended December 31, 2013. At December 31, 2013, there was no remaining carrying value of the core deposit intangible related to the Legacy Bank merger.

At December 31, 2013 and December 31, 2012, there was \$62,000 and \$249,000, respectively, in remaining carrying value of core deposit intangible related to the Taft branch acquisitions completed in April, 2004.

20. Parent Company Only Financial Statements

The following are the condensed financial statements of United Security Bancshares and should be read in conjunction with the consolidated financial statements:

United Security Bancshares – (parent only) Balance Sheets – December 31, 2013 and 2012.

(In thousands)

21. Subsequent Events

Subsequent events are events or transactions that occur after the balance sheet date but before financial statements are issued. Recognized subsequent events are events or transactions that provide additional evidence about conditions that existed at the date of the balance sheet, including the estimates inherent in the process of preparing financial statements. Nonrecognized subsequent events are events that provide evidence about conditions that did not exist at the date of the balance sheet but arose after that date. Management has reviewed events occurring through the date the financial statements were issued and no subsequent events occurred requiring accrual or disclosure.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders United Security Bancshares and Subsidiary

We have audited the accompanying consolidated balance sheets of United Security Bancshares and Subsidiary (Company) as of December 31, 2013 and 2012, and the related consolidated statements of income, comprehensive income, changes in shareholders' equity and cash flows for each of the two years in the period ended December 31, 2013. These consolidated financial statements are the responsibility of Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal

control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall consolidated financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of United Security Bancshares and Subsidiary as of December 31, 2013 and 2012, and the consolidated results of their operations and their cash flows for each of the two years in the period ended December 31, 2013, in conformity with accounting principles generally accepted in the United States of America.

Moss Adams LLP

Stockton, California
March 21, 2014

Management's Report on Internal Control Over Financial Reporting

Management of United Security Bancshares and Subsidiaries (the "Company") is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, and for performing an assessment of the effectiveness of internal control over financial reporting as of December 31, 2013. The Company's internal control over financial reporting is a process designed under the supervision of the Company's management, including the Chief Executive Officer and Chief Financial Officer, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States.

The Company's system of internal control over financial reporting includes policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect transactions and dispositions of assets of the Company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Management recognizes that there are inherent limitations in the effectiveness of any system of internal control, and accordingly, even effective internal control can provide only reasonable assurance with respect to financial statement preparation and fair presentation. Further, because of changes in conditions, the effectiveness of internal control may vary over time.

Under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, the Company performed an assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2013 based upon criteria in Internal Control — Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). As a result of this assessment, management has concluded that the Company's internal control over financial reporting was effective as of December 31, 2013.

As a result of the enactment in our third quarter of the Dodd-Frank Wall Street Reform and Consumer Protection Act, "Exemption for Non-accelerated Filers," and in accordance with section 989G of the act, we are not required to provide an attestation report of our independent registered public accounting firm regarding internal control over financial reporting for this fiscal year or thereafter, until such time as we are no longer eligible for the exemption set forth therein.

Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

Certain matters discussed or incorporated by reference in this Annual Report on Form 10-K are forward-looking statements that are subject to risks and uncertainties that could cause actual results to differ materially from those projected in the forward-looking statements. Such risks and uncertainties include, but are not limited to, those described in Management's Discussion and Analysis of Financial Condition and Results of Operations. Such risks and uncertainties include, but are not limited to, the following factors: i) competitive pressures in the banking industry and changes in the regulatory environment; ii) exposure to changes in the interest rate environment and the resulting impact on the Company's interest rate sensitive assets and liabilities; iii) decline in the health of the economy nationally or regionally which could reduce the demand for loans or reduce the value of real estate collateral securing most of the Company's loans; iv) credit quality deterioration that could cause an increase in the for loan losses; v) Asset/Liability matching risks and liquidity risks; volatility and devaluation in the securities markets, vi) failure to comply with the regulatory agreement under which the Company is subject, vii) expected cost savings from recent acquisitions are not realized, and, viii) potential impairment of goodwill and other intangible assets.. Therefore, the information set forth therein should be carefully considered when evaluating the business prospects of the Company.

The Company

On June 12, 2001, the United Security Bank (the "Bank") became the wholly owned subsidiary of United Security Bancshares (the "Company") through a tax-free holding company reorganization, accounted for on a basis similar to the pooling of interest method. In the transaction, each share of Bank stock was exchanged for a share of Company stock on a one-to-one basis. No additional equity was issued as part of this transaction. In the following discussion, references to the Bank are references to United Security Bank. References to the Company are references to United Security Bancshares (including the Bank).

On June 28, 2001, United Security Bancshares Capital Trust I (the "Trust") was formed as a Delaware business trust for the sole purpose of issuing Trust Preferred securities. On July 16, 2001, the Trust completed the issuance of \$15 million in Trust Preferred securities, and concurrently, the Trust used the proceeds from that offering to purchase Junior Subordinated Debentures of the Company. The Company contributed \$13.7

million of the \$14.5 million in net proceeds received from the Trust to the Bank to increase its regulatory capital and used the rest for the Company's business. Effective January 1, 2007, the Company adopted the fair value option for its junior subordinated debt issued by the Trust. As a result of the adoption of the accounting standards related to the fair value option, the Company recorded a fair value adjustment of \$1.3 million, reflected as an adjustment to beginning retained earnings. On July 25, 2007, the Company redeemed the \$15.0 million in subordinated debentures plus accrued interest of \$690,000 and a 6.15% prepayment penalty totaling \$922,500. Concurrently, the Trust Preferred securities issued by Capital Trust I were redeemed. The prepayment penalty of \$922,500 had previously been a component of the fair value adjustment for the junior subordinated debt at the initial adoption of the fair value option.

Effective December 31, 2001, United Security Bank formed a subsidiary Real Estate Investment Trust ("REIT") through which preferred stock was offered to private investors, to raise capital for the bank in accordance with the laws and regulations in effect at the time. The principal business purpose of the REIT was to provide an efficient and economical means to raise capital. The REIT also provided state tax benefits beginning in 2002. On December 31, 2003, the California Franchise Tax Board (FTB) announced certain tax transactions related to real estate investment trusts (REITs) and regulated investment companies (RICs) will be disallowed pursuant to Senate Bill 614 and Assembly Bill 1601, which were signed into law in the 4th quarter of 2003 (For further discussion see Income Taxes section of Results of Operations contained in this Management's Discussion and Analysis of Financial Condition and Results of Operations).

Effective April 23, 2004, the Company completed a merger with Taft National Bank headquartered in Taft, California. Taft National Bank ("Taft") was merged into United Security Bank and Taft's two branches, one located Taft and the other located in Bakersfield, California, began operating as branches of United Security Bank. The merger was accounted for using the purchase method of accounting, and resulted in the purchase price being allocated to the assets acquired and liabilities assumed from Taft based on the fair value of those assets and liabilities, with resultant goodwill of \$1.6 million and core deposits intangibles of \$1.9 million. Goodwill is not amortized but is reviewed at least annually for impairment, while core deposit intangibles were amortized over a period

of 7 years. The Company has recognized no impairment on either the goodwill or core deposit intangible related to the Taft merger.

On February 16, 2007, the Company completed its merger of Legacy Bank, N.A. with and into United Security Bank, a wholly owned subsidiary of the Company. Legacy Bank which began operations in 2003 operated one banking office in Campbell, California serving small business and retail banking clients. With its small business and retail banking focus, Legacy Bank provides a unique opportunity for United Security Bank to serve a loyal and growing small business niche and individual client base in the San Jose area. Upon completion of the merger, Legacy Bank's branch office began operating as a branch office of United Security Bank. The merger transaction was accounted for using the purchase accounting method, and resulted in the purchase price being allocated to the assets acquired and liabilities assumed from Legacy based on the fair value of those assets and liabilities. Fair value adjustments and intangible assets totaled approximately \$12.9 million, including \$8.8 million in goodwill. Goodwill is not amortized but is reviewed at least annually for impairment, while core deposit intangibles are being amortized over a period of 7 years. The Company did not recognize any impairment charges related to goodwill or core deposit intangibles for the years ended December 31, 2013 and 2012.

During July 2007, the Company formed USB Capital Trust II, a wholly-owned special purpose entity, for the purpose of issuing Trust Preferred Securities. Like USB Capital Trust I formed in July 2001, USB Capital Trust II is a Variable Interest Entity (VIE) and a deconsolidated entity pursuant current accounting standards related to variable interest entities. On July 23, 2007, USB Capital Trust II issued \$15 million in Trust Preferred securities. The securities have a thirty-year maturity and bear a floating rate of interest (repricing quarterly) of 1.29% over the three-month LIBOR rate. Interest is payable quarterly. Concurrent with the issuance of the Trust Preferred securities, USB Capital Trust II used the proceeds of the Trust Preferred securities offering to purchase a like amount of junior subordinated debentures of the Company. The Company is to pay interest on the junior subordinated debentures to USB Capital Trust II, which represents the sole source of dividend distributions to the holders of the Trust Preferred securities. The Company elected at September 30, 2009, to defer quarterly payments of interest on the junior subordinated debentures beginning with the quarterly payment due October 1, 2009. In addition, the Agreement entered into with the Federal Reserve Bank of San Francisco during March 2010 prohibits the Bank from making

distributions, including dividends and interest payments, without prior written approval. The terms of the debentures permit the deferment of payment of interest for up to 20 consecutive quarters. Interest continues to accrue while interest payments are deferred. Under the terms of the trust preferred securities the Company is prohibited from paying dividends on its capital stock (including common stock) during the deferral period. The Company may redeem the junior subordinated debentures at anytime at par.

Regulatory Agreement with the Federal Reserve Bank of San Francisco

Effective March 23, 2010, United Security Bancshares (the "Company") and its wholly owned subsidiary, United Security Bank (the "Bank"), entered into a formal written agreement (the "Agreement") with the Federal Reserve Bank of San Francisco. The Agreement was a result of a regulatory examination that was conducted by the Federal Reserve and the California Department of Financial Institutions in June 2009 and is intended to improve the overall condition of the Bank through, among other things, increased Board oversight; formal plans to monitor and improve processes related to asset quality, liquidity, funds management, capital, and earnings; and the prohibition of certain actions that might reduce capital, including the distribution of dividends or the repurchase of the Company's common stock. The Board of Directors and management believe that as of the filing of the fourth quarter written response to the Agreement, Company is in compliance with the terms of the Agreement. *(For more information on the terms of the Agreement see the "Regulatory Matters" section included in this Management's Discussion and Analysis of Financial Condition and Results of Operations.)*

The Agreement entered into with the Federal Reserve Bank of San Francisco during March 2010 was a result of a regulatory examination conducted by the Federal Reserve and the California Department of Financial Institutions in June 2009. The following issues related to the June 2010 examination led to the agreement between the Federal Reserve Bank and the Company that corrective action was required:

- Asset quality continued to deteriorate as adversely classified assets increased over four consecutive target and full-scope examinations conducted from 2006 through the June 2009 exam. The dollar volume of adversely classified assets increased by 16.7% during the six months prior to the exam to \$142.1 million at the June 2009 examination.

- Below investment grade investment securities classified substandard at the previous examination totaling \$9.1 million increased to \$17.1 million at the June 2010 examination, representing 18.6% of tier 1 capital and reserves as of March 31, 2009. The classified investment securities are comprised of three private-label residential mortgage backed securities that are below investment grade as graded by a national rating agency, were divided between \$16.9 million in substandard and \$163,000 in loss. The portion listed as loss represented the amount identified as other-than-temporary-impairment (OTTI) and had been recognized as loss as of March 31, 2009.
- During the June 2009 examination, it was the opinion of the Federal Reserve Bank that the Bank's methodology related to the allowance for loan and leases losses was flawed, leading the Federal Reserve Bank to conclude that additional provisions were required to raise reserves to an appropriate level. In addition, weaknesses in the ALLL policy were identified and needed to be addressed, which included improvements in documentation related to identification and analysis of loans under SFAS No. 114 and SFAS No. 5, and more detailed justification for the qualitative factors used in the ALLL process. During the six months ended June 30, 2010, several large lending relationships to developers in the San Joaquin Valley deteriorated significantly, requiring an additional \$1.8 million in ALLL. In addition, during that period, the Bank experienced increases in other problem loans or potentially problem loans including nonaccrual loans and special mention loans, and real estate valuations continued to decline. Regulators required an increase in the reserves as calculated by the Federal Reserve Bank using a model they call the "Atlanta Model." The Atlanta Model calculated an estimated range of allowance for loan losses using a blend of national, regional, and local peer bank data. The reserve calculated by the Bank for June 30, 2009 under GAAP included additions to ALLL required for increases in adversely classified and special mention loans experienced during the first half of 2009, and although at the lower range of ALLL as estimated by the Federal Reserve, corresponded favorably with the Federal Reserve's "Atlanta Model." The reserve adjustment required for the second quarter of 2009 totaled \$6.8 million bringing the ALLL level to \$15.8 million (including reserve for unfunded commitments) at June 30, 2009. The ALLL findings of the Federal Reserve Bank included recommendations to better align actual practices with the regulatory governing policy as well as to provide a more specific framework for analyzing, determining, and supporting the factors used in the ALLL methodology.
- Earnings performance declined as of June 30, 2009, due in large part to the additional \$6.8 million provision recorded for the second quarter (\$8.2 million year-to-date) resulting in a net loss for the Company of \$4.8 million for the six months ended June 30, 2009. Earnings for the period were also adversely impacted by: a goodwill impairment loss of \$3.0 million (pre-tax and net); year-to-date pre-tax impairment losses of \$403,000 on the real estate mortgage-backed securities; year-to-date pre-tax operating expenses and impairment losses of \$1.3 million related to other real estate owned through foreclosure.
- Although the Bank's Tier 1 leverage capital, Tier 1 risk-based capital, and total risk-based capital ratios remained above regulatory Prompt Corrective Action guidelines of adequately capitalized banks at 10.8%, 11.3%, and 12.6%, respectively, at June 30, 2009, the Federal Reserve concluded that capital levels were less than adequate to support the Bank's high risk profile resulting primarily from the continued decline in asset quality. At the June 2009 examination adversely classified assets were in excess of 150.0% of Tier 1 capital and reserves.
- The Bank's liquidity position had tightened since the last examination and was considered marginal at the June 2009 examination. The Bank's tight liquidity position was the result of low levels of liquid assets, high percentage of investment securities pledged against borrowing lines, and higher levels of wholesale borrowings including \$64.0 million borrowed from the Federal Home Loan Bank line and \$71.3 million borrowed from the Federal Reserve Bank discount window. Brokered deposits total \$99.3 million, 19.4% of total deposits at June 30, 2009, and compared unfavorably with the peer group at 6.3%.
- The Federal Reserve concluded in the June 2009 examination that oversight by the Board of Directors and senior management was not adequate given the escalating risk profile of the Bank's activities. Although the severe economic downturn was a significant factor in the decline in asset quality, the Board of Directors and senior management were deemed responsible for implementing a business strategy which allowed concentrations in higher-risk speculative residential

construction lending. The Board of Directors and senior management had taken measures to maintain asset quality, capital, earnings, and liquidity, but had not responded in a timely manner to the rapidly changing real estate conditions. As of March 31, 2009, the concentration in construction and land development loans represented high levels in relation to equity capital and reserves, although the exposures were declining over the prior few years. For example, management increased the ALLL in the second quarter of 2009, ordered new appraisals on property remargined collateral on loans, and was seeking sources for new equity capital. In addition, several transactions to reduce or restructure problem assets were in process. However, these actions had not resulted in material tangible improvements in the overall condition of the Bank as of the June 2009 examination. In addition, the June 2009 examination identified nine technical violations of Regulation Y Subpart B that deal with the failure to obtain the prescribed appraisals or evaluations on loan extensions or renewals. These violations of law were subsequently remedied.

- The June 2009 examination indicated that risk management practices needed improvement. Management information systems needed to be redesigned and implemented to more accurately measure fundamental exposures, such as the ongoing credit risk posed by the residential construction and land development loan portfolio and the emerging liquidity risks. The Bank needed to continue its efforts to address and reduce the increasing volume of problem assets. While the loan grading process showed improvement over the prior several examinations, the ALLL methodology was identified as flawed in the June 2009 examination. While the Board of Directors and management made some progress to address the findings of the June 2009 examination, management needed to make further progress on improving several key areas to identify, measure, monitor, and control the exposures presented by credit, liquidity, market, operational, reputation, and legal risks.

The result of significant increases in nonperforming assets, both classified loans and OREO, during 2008 and the first half of 2009 increased the overall risk profile of the Bank. The increased risk profile of the Bank included heightened concerns about the Bank's use of brokered and other wholesale funding sources which had been used to fund loan growth and reduce the Company's overall cost of interest bearing liabilities. With loan growth funded materially

from wholesale funding sources, liquidity risk increased, and higher levels of nonperforming assets increased risk to equity capital and potential volatility in earnings. In addition, the Federal Reserve Bank identified nine technical violations of Regulation Y Subpart B that deal with the failure to obtain the prescribed appraisals or evaluations on loan extensions or renewals. During the fourth quarter of 2010, the Company identified certain material weaknesses related to the allowance for loan losses and the completeness and accuracy of the provision for loan losses, as well as material weaknesses related to the valuation of OREO properties (*for further discussion see Item 9A Controls and Procedures.*)

As part of the Agreement, the Board of Directors of the Bank has appointed a Compliance Committee to monitor and coordinate the Bank's compliance with the provisions of the Agreement. The Compliance Committee is comprised of the outside Directors and they meet on a monthly basis.

Among other things, the Agreement required the Bank to submit a number of written plans to the Federal Reserve Bank within specified time frames. The following is a list of written plans required to be submitted to the Federal Reserve Bank.

- Plan to Strengthen Board Oversight – Includes actions that the Board of Directors will take to improve the Bank's condition, and maintain effective control and supervision over the Bank's operations including credit risk management, liquidity, and earnings. Also includes the Board's responsibility to monitor adherence to policies and procedures and applicable laws and regulations, and lists information and reports that will enable the Board to perform this oversight function.
- Plan to Strengthen Credit Risk Management Practices – Includes the responsibility of Board to establish appropriate risk tolerance guidelines and limits, timely and accurate identification and quantification of credit risk, strategies to minimize credit losses and reduce the level of problem assets, procedures for the ongoing review of the investment portfolio to evaluate other-than-temporary-impairment, stress testing for commercial real estate loans and portfolio segments, and measures to reduce the levels of other real estate owned.
- Plan to Improve Adversely Classified Assets – Includes specific plans and strategies to improve the Bank's asset position through repayment, amortization, liquidation, additional collateral, or other means on each loan, relationship, or other asset in excess of \$1.5 million including OREO, that are past due more than 90 days as of the date of the written agreement.

- Plan for Maintenance of Adequate Allowance for Loan Losses – Includes policies and procedures to ensure adherence to the Bank’s revised ALLL methodology, provides for periodic reviews of the methodology as appropriate, and provides for review of ALLL by the Board at least quarterly.
- Capital Plan – Includes guidelines and trigger points to ensure sufficient capital is maintained at the Bank and the Company, and that capital ratios are maintained at a level deemed appropriate under regulatory guidelines given the level of classified assets, concentrations of credit, ALLL, current and projected growth, and projected retained earnings. Also contains contingency strategies to obtain additional capital as required to fulfill future capital requirements.
- Plan to Improve Liquidity Position – Includes measures to enhance the monitoring, measurement, and reporting of the Bank’s liquidity to the Board, a timetable to reduce the Bank’s reliance on brokered deposits and other wholesale funding, and specific liquidity targets and parameters to meet contractual obligations and unanticipated demands.
- Contingency Funding Plan – Includes adverse scenario planning, and identifies and quantifies available sources of liquidity for each scenario.
- Earnings Plan and Budget – Includes a revised business plan for the remainder of 2010, including operating assumptions that support for projected income, expense, and balance sheet components.

As of June 30, 2010, the Bank had completed and submitted to the Federal Reserve Bank all the plans listed above within the designated timeframes. The Federal Reserve responded on July 27, 2010 by letter that stated “We have reviewed your submissions and acknowledge the steps taken by the Bank and Bancshares to achieve compliance with the Agreement’s provisions. However, we noted that the Plan to Strengthen Board Oversight omitted references to actions to be taken with regard to Bank earnings as required by the first provision.” At the August 24, 2010, regular meeting of the Board, an amended version of the Plan was approved and the amended Plan has been submitted to the Federal Reserve.

In addition to the submission of the above plans to the Federal Reserve Bank for approval, and implementation of the above plans, the Bank is required within 30 days after the end of each calendar quarter to submit written progress reports to the Federal Reserve Bank detailing actions taken to secure compliance with the Agreement. On April 23, 2013,

July 23, 2013, and October 22, 2013, respectively, the Bank submitted progress reports to the Federal Reserve for the first, second, and third quarters of 2013. As of January 30, 2014, the Company submitted a progress report for the fourth quarter of 2013. At this time the Company and the Bank believe they are in compliance with the Agreement, including remediation of technical violations of laws and regulations regarding stale loan appraisals.

Regulatory Order from the California Department of Business Oversight

During May of 2010, the California Department of Financial Institutions issued a written order (the “Order”) pursuant to section 1913 of the California Financial Code to the Bank as a result of a regulatory examination that was conducted by the Federal Reserve and the California Department of Financial Institutions in June 2009. The Order issued by the California Department of Financial Institutions is basically similar to the written agreement with the Federal Reserve Bank of San Francisco, except for certain additional requirements.

On September 24, 2013, the Bank entered into a Memorandum of Understanding (the “MOU”) with the California Department of Business Oversight (formerly known as the California Department of Financial Institutions). Effective October 15, 2013, the California Department of Business Oversight terminated the Order issued in May 2010. The additional requirements in the MOU for the Bank are as follows:

- Develop and adopt a capital plan to maintain a ratio of tangible shareholders’ equity to total tangible assets equal to or greater than 9% and include in such capital plan a capital contingency plan for raising additional capital in the event of various contingencies;
- Maintain a ratio of tangible shareholders’ equity to total tangible assets equal to or greater than 9%
- Maintain an adequate allowance for loan losses and remedy any deficiency in the allowance for loan losses in the calendar quarter in which it is discovered; and
- Not establish any new branches or other offices without the prior written consent of the Commissioner of the California Department of Business Oversight
- Provide progress reports within 30 days after the end of each calendar quarter following the effective date of the MOU to the California Department of Business Oversight detailing the form and manner of all actions taken to secure compliance with the MOU and Agreement and the results of such actions.

- Within 180 days from the effective date of the MOU, reduce the assets classified “Substandard” to not more than 45% of total capital.
- Within 270 days from the effective date of the MOU, reduce the assets classified “Substandard” to not more than 40% of total capital.

The Bank is currently in full compliance with the requirements of the MOU including its deadlines.

(For more information on the Agreement see the “Regulatory Matters” section included in this Management’s Discussion and Analysis of Financial Condition and Results of Operations.)

The Bank currently has eleven banking branches, one construction lending office, and one financial services office, which provide banking and financial services in Fresno, Madera, Kern, and Santa Clara counties. As a community-oriented bank holding company, the Company continues to seek ways to better meet its customers’ needs for financial services, and to expand its business opportunities in today’s ever-changing financial services environment. The Company’s strategy is to be a better low-cost provider of services to its customer base while enlarging its market area and corresponding customer base to further its ability to provide those services.

Current Trends Affecting Results of Operations and Financial Position

The Company’s overall operations are impacted by a number of factors, including not only interest rates and margin spreads, which impact results of operations, but also the

composition of the Company’s balance sheet. One of the primary strategic goals of the Company is to maintain a mix of assets that will generate a reasonable rate of return without undue risk, and to finance those assets with a low-cost and stable source of funds. Liquidity and capital resources are considered as well in the planning process to mitigate risk and allow for growth. Net interest income has declined over the past two years, totaling \$21,391,000 and \$23,090,000 for the years ended December 31, 2013 and 2012, respectively. The decline in net interest income was primarily the result of declines in the rates on interest-earning assets which more than outweighed the decrease in interest expense during 2013. Average interest-earning assets increased approximately \$29,749,000 between 2013 and 2012, however, the rate on interest earning assets decreased 64bp during the two periods. The increase in average earning assets between 2013 and 2012 consisted of an increase of \$35,243,000 in interest-bearing deposits held at the Federal Reserve Bank and \$2,963,000 in loans, offset by a decrease of \$8,114,000 in investment securities. During the last two years, the Company’s cost of interest-bearing liabilities has declined significantly as market rates of interest declined, with the average cost of interest-bearing liabilities dropping from 0.60% during 2012 to 0.47% for the year ended December 31, 2013.

The following table summarizes the year-to-date averages of the components of interest-earning assets as a percentage of total interest earning assets, and the components of interest-bearing liabilities as a percentage of total interest-bearing liabilities:

	YTD Average December 31, 2013	YTD Average December 31, 2012
Loans	70.75%	74.20%
Investment securities available for sale	5.45%	7.30%
Interest-bearing deposits in other banks	0.27%	0.35%
Interest-bearing deposits in FRB	23.53%	18.15%
Total earning assets	100.00%	100.00%
NOW accounts	15.56%	14.44%
Money market accounts	41.96%	37.39%
Savings accounts	12.40%	11.99%
Time deposits	27.00%	33.44%
Other borrowings	—%	—%
Subordinated debentures	3.08%	2.74%
Total interest-bearing liabilities	100.00%	100.00%

In 2013, residential real estate markets in the five-county region from Merced to Kern showed strengthening improvement over the prior years. Home prices for residential real estate markets in the five-county region saw average price increases of 21% above 2012 levels. New home sales in the five-county region, excluding Merced, were up in December at 371 units compared with 360 units in 2012. The number of All Homes sold declined in December 2013 compared with a year earlier with 2,213 new and existing units sold in December 2013, compared with 2,429 units sold in 2012.

The market for OREO properties (foreclosed properties) owned by the Bank continue to strengthen. Even though a few properties were added to totals during 2013, those properties were subsequently sold during 2013, and the outstanding balance of OREO fell from \$23,932,000 at December 31, 2012 to \$13,946,000 at December 31, 2013.

Unemployment in Fresno County was 15.3% at year-end 2012 and 12.5% at the end of 2013. California improved from 10.5% to 7.9%, while the U.S. improved from 8.1% to 6.7% at December 31, 2013. Fresno is the largest agriculture-producing county in the U.S. and Agricultural production totaled \$7.2 billion in 2013, a 4.3% increase over the prior year. Of the five county region, Merced to Kern, four are in the top five counties in the U.S. for Agricultural production. The agricultural markets in this region strengthened in 2013 fueled in part by global demand for exports that drove agricultural product prices and demand for local agricultural land higher. The agriculture affect benefits the five-county economies.

Kern County varies slightly from Fresno County. Kern performed slightly better in unemployment at 10.7% for 2013, down from 13.5% for 2012.

Santa Clara County is one of the few areas with consistent job and income growth in 2013 based on the strength of its high-tech manufacturing sector that has benefited from increasing business investment. Unemployment rates were 5.7% at December 31, 2013, down from 7.5% in 2012.

During the year ended December 31, 2013, the Company experienced increases in real estate mortgage loans, but experienced decreases in real estate construction development and commercial and industrial loans, compared to the same period ended December 31, 2012. Loans decreased \$4,740,000 between December 31, 2012 and December 31, 2013. Commercial and industrial loans decreased \$1,431,000 between December 31, 2012 and December 31, 2013. Real estate mortgage loans increased

\$7,431,000 between December 31, 2012 and December 31, 2013. Agricultural loans decreased \$5,237,000 between December 31, 2012 and December 31, 2013. Commercial real estate loans (a component of real estate mortgage loans) have remained as a significant percentage of total loans over the past year, amounting to 36.41% and 33.39%, of the total loan portfolio at December 31, 2013 and December 31, 2012, respectively. Residential mortgage loans are not generally a large part of the Company's loan portfolio, but some residential mortgage loans have been made over the past several years to facilitate take-out loans for construction borrowers when they were not able to obtain permanent financing elsewhere. These loans are generally 30-year amortizing loans with maturities of between three and five years. Residential mortgages totaled \$52,036,000 or 13.16% of the portfolio at December 31, 2013, as compared to \$55,016,000, or 13.75% of the portfolio at December 31, 2012. Loan participations purchased have decreased from \$33,000 or 0.01% of the portfolio at December 31, 2012, to \$30,000 or less than 0.01% of the portfolio at December 31, 2013. Loan participations sold decreased from \$12,117,000 or 3.0% of the portfolio at December 31, 2012, to \$9,786,000, or 2.5%, at December 31, 2013.

Although market rates of interest are at historically low levels, the Company's disciplined deposit pricing efforts have helped maintain adequate margins. The Company's net interest margin decreased to 3.86% for the year ended December 31, 2013, when compared to 4.40% for the year ended December 31, 2012. The net interest margin has also been impacted by a decline in yield on loans, the Company's highest yielding asset, which has been partially offset by an increase in overnight investments with the Federal Reserve Bank, a much lower yielding asset. The Company has successfully sought to mitigate the low-interest rate environment with loan floors included in new and renewed loans when practical. Loans yielded 5.60% during the year ended December 31, 2013, as compared to 5.95% for the year ended December 31, 2012. The decrease in the Company's cost of funds over the past year has mitigated the impact of declining yields on earning assets. The Company's average cost of funds was 0.47% for the year ended December 31, 2013, as compared to 0.60% for the year ended December 31, 2012. Although the Company does not intend to increase its current level of brokered deposits, the levels of brokered deposits are expected to remain level at least in the short-term. The Company is currently only utilizing CDAR's reciprocal deposits as a concession to our customers. The \$11,500,000 in brokered deposits at December 31, 2013 continues to provide the Company with a low-cost source of

deposits. The Company will continue to utilize these funding sources when required to maintain prudent liquidity levels, while seeking to increase core deposits when possible.

Total noninterest income of \$3,968,000 reported for the year ended December 31, 2013 decreased \$1,508,000 or 27.54% as compared to the year ended December 31, 2012. Noninterest income continues to be driven by customer service fees, which totaled \$3,456,000 for the year ended December 31, 2013. However, the decrease in noninterest income between the years ended December 31, 2013 and December 31, 2012, was primarily the result of a \$1,739,000 decrease in gain on sale of other investments, partially offset by a decrease of \$284,000 on impairment losses on investment securities.

Noninterest expense decreased approximately \$862,000 or 4.32% between the years ended December 31, 2012 and December 31, 2013. The decreases experienced during the year ended December 31, 2013, were primarily the result of a decrease of \$663,000 in the net operating cost on OREO and decreases in amortization expenses, professional fees, regulatory insurance assessments, and amortization expenses.

Effective March 31, 2009, and beginning with the quarterly interest payment due October 1, 2009, the Company deferred interest payments on the Company's \$15.0 million of junior subordinated debentures relating to its trust preferred securities. This was the result of regulatory restraints which have precluded the Bank from paying dividends to the Holding Company. The Agreement with the Federal Reserve Bank entered into during March 2010 specifically prohibits the Company and the Bank from making any payments on the junior subordinated debt without prior approval of the Federal Reserve Bank. The terms of the debentures and trust indentures allow for the Company to defer interest payments for up to 20 consecutive quarters without default or penalty. During the period that the interest deferrals are elected, the Company will continue to record interest expense associated with the debentures. Upon the expiration of the deferral period, all accrued and unpaid interest will be due and payable. Under the terms of the debenture, the Company is precluded from paying cash dividends to shareholders or repurchasing its stock during the deferral period.

The Company has not paid any cash dividends on its common stock since the second quarter of 2008 and does not expect to resume cash dividends on its common stock for the foreseeable future. Because the Company has elected to defer the quarterly payments of interest on its junior subordinated debentures issued in connection with the trust preferred securities as discussed above, the Company

is prohibited under the subordinated debenture agreement from paying cash dividends on its common stock during the deferral period. In addition, pursuant to the Agreement entered into with the Federal Reserve Bank during March of 2010, the Company and the Bank are precluded from paying cash dividends without prior consent of the Federal Reserve Bank. On March 26, 2013, June 25, 2013, September 24, 2013, and December 17, 2013, the Company's Board of Directors declared a one-percent (1%) quarterly stock dividend on the Company's outstanding common stock. The Company believes, given the current uncertainties in the economy and unprecedented declines in real estate valuations in our markets, it is prudent to retain capital in this environment, and better position the Company for future growth opportunities. Based upon the number of outstanding common shares on the record date of April 12, 2013, July 12, 2013, October 11, 2013, and January 10, 2014, respectively, an additional 142,157, 143,613, 145,083, and 146,530 shares, respectively, were issued to shareholders. For purposes of earnings per share calculations, the Company's weighted average shares outstanding and potentially dilutive shares used in the computation of earnings per share have been restated after giving retroactive effect to the 1% stock dividends to shareholders for all periods presented.

The Company has sought to maintain a strong, yet conservative balance sheet while continuing to reduce the level of nonperforming assets and improve liquidity during the year ended December 31, 2013. Total assets decreased approximately \$12,948,000 during the year ended December 31, 2013, including a decrease of \$9,986,000 in OREO, a decrease of \$6,415,000 in cash and cash equivalents, and a decrease of \$4,224,000 in net loans. Total deposits decreased \$20,798,000, including a decrease of \$2,697,000 in noninterest-bearing deposits and by decreases of \$2,202,000 in savings and NOW and money market accounts, and \$15,899,000 in time deposits during the year ended December 31, 2013. Average loans comprised approximately 70.75% and 74.20% of overall average earning assets during the years ended December 31, 2013 and December 31, 2012, respectively.

Nonperforming assets, which are primarily related to the real estate loan and other real estate owned portfolio, remained high during the year ended December 31, 2013, but decreased \$15,025,000 from a balance of \$47,073,000 at December 31, 2012, to a balance of \$32,048,000 at December 31, 2013. Nonaccrual loans totaling \$12,341,000 at December 31, 2013, decreased \$1,084,000 from the balance of \$13,425,000 reported at December 31, 2012. In determining the adequacy of the underlying collateral related

to these loans, management monitors trends within specific geographical areas, loan-to-value ratios, appraisals, and other credit issues related to the specific loans. Impaired loans decreased \$3,799,000 during the year ended December 31, 2013, with a balance of \$18,132,000 at December 31, 2013. Other real estate owned through foreclosure decreased \$9,986,000 between December 31, 2012 and December 31, 2013, as a result of the sale of various properties. As a result of

the related events, nonperforming assets as a percentage of total assets decreased from 7.25% at December 31, 2012, to 5.04% at December 31, 2013.

The following table summarizes various nonperforming components of the loan portfolio, the related allowance for loan and lease losses and provision for credit losses for the periods shown.

<i>(in thousands)</i>	December 31, 2013	December 31, 2012	December 31, 2011
Provision for credit losses during period	\$ (1,098)	\$ 1,019	\$ 13,602
Allowance as % of nonperforming loans	60.70%	50.92%	45.52%
Nonperforming loans as % total loans	4.58%	5.78%	7.34%
Restructured loans as % total loans	2.29%	4.19%	4.74%

As the economy has declined along with asset valuations, increased emphasis has been placed on impairment analysis of both tangible and intangible assets on the balance sheet. As of March 31, 2013, the Company conducted annual impairment testing on the largest component of its outstanding balance of goodwill, that of the Campbell operating unit (resulting from the Legacy merger during February 2007.) During the second quarters of 2013 and 2012, the Company utilized an independent valuation service to determine the aggregate fair value of the individual assets, liabilities, and identifiable intangible assets of the Campbell operating unit in question to determine if the goodwill related to that operating unit was impaired, and if so, how much the impairment was. Management, with the assistance of the independent third-party, concluded that there was no impairment of the goodwill related to the Campbell operating unit for the years ended December 31, 2013 and 2012.

Management continues to monitor economic conditions in the real estate market for signs of further deterioration or improvement which may impact the level of the allowance for loan losses required to cover identified losses in the loan portfolio. As the real estate market declined through 2008, and that accelerated throughout much of 2009, the level of problem assets increased, and the estimated real estate values on many of those assets decreased resulting in increased charge-offs or write-downs of those assets. Greater focus has been placed on monitoring and reducing the level of problem assets, while working with borrowers to find more options, including loan restructures, to work through these difficult economic times. As a result of these

efforts, restructured loans decreased from 47 loans totaling \$24,634,000 at December 31, 2010, to approximately 41 loans totaling \$19,275,000 at December 31, 2011, decreasing to 58 loans totaling \$16,773,000 at December 31, 2012, and then decreasing to 35 loans totaling \$9,059,000 at December 31, 2013. A negative provision was made to the allowance for credit losses totaling \$1,098,000 during the year ended December 31, 2013, as compared to a provision of \$1,019,000 for the year ended December 31, 2012. The provisions made to the allowance for credit losses, totaling \$39,000 during the second quarter of 2013, and a negative provision of \$1,150,000 made during the third quarter of 2013, provided a level in the allowance for credit losses that is deemed adequate to cover inherent losses in the loan portfolio. Net loan and lease recoveries during the year ended December 31, 2013 totaled \$302,000, as compared to \$2,883,000 in net charge-offs for the year ended December 31, 2012. The Company charged-off approximately 24 loans during the year ended December 31, 2013, compared to 26 loans during the year ended December 31, 2012. Net loan and lease recoveries totaling \$302,000 during the year ended December 31, 2013, included \$372,000 in net charge-offs during the quarter ended March 31, 2013, \$285,000 in net charge-offs during the quarter ended June 30, 2013, \$545,000 in net recoveries during the quarter ended September 30, 2013, and \$414,000 in net recoveries during the fourth quarter of 2013. The percentage of net recoveries to average loans were 0.08%, net charge-off of 0.74%, and 3.9% for the years ended December 31, 2013, 2012, and 2011, respectively.

Deposits decreased by \$20,798,000 during the year ended December 31, 2013, with decreases in time, NOW, money

market, and non interest bearing deposits, partially offset by an increase in savings accounts. Decreases in time deposits experienced during the year ended December 31, 2013, were partially the result of decreases in brokered wholesale deposits, as the Company continues to reduce its reliance on brokered deposits and other wholesale funding sources, while enhancing liquidity.

Brokered deposits have provided the Company a relatively inexpensive funding source over the past several years totaling \$11,500,000 or 2.12% of total deposits at December 31, 2013, as compared to \$17,984,000 or 3.19% of total deposits at December 31, 2012. Brokered deposits and other wholesale funding sources were used to some degree to fund loan growth in 2007 and 2008, but the current state of the economy and the financial condition of the Company have made it increasingly important to continue to develop core deposits and reduce the Company's dependence on brokered and other wholesale funding sources, including lines of credit with the Federal Reserve Bank and the FHLB. The Company increased its efforts early in 2009 to develop core deposit growth with employee training throughout the entire organization and a deposit-gathering program that incented employees to bring in new deposits from our local market area and establish more extensive relationships with our customers. The Company continues its deposit gathering program and committed additional resources to its efforts during 2010 including two full time employees dedicated to business development. As part of its liquidity position improvement plan resulting from the formal agreement with the Federal Reserve Bank issued in March 2010, the Company has reduced its reliance on brokered deposits to levels more comparable with peers, which is currently about 5% of total deposits. .

While the Company still has a slightly higher percentage of brokered deposits than peers at December 31, 2013, the Company is well below the 5% maximum target set in 2010, with 2.1% in brokered deposits as a percentage of total deposits at year-end 2013. Total wholesale borrowings and brokered deposits decreased an additional \$6,484,000 during the year ended December 31, 2013 to a balance of \$11,500,000 at December 31, 2013.

Although the Company had no borrowings at December 31, 2013 and 2012, the Company will continue to utilize overnight borrowings and other term credit lines as deemed prudent. Use of such lines are monitored closely to ensure sound balance sheet management in light of the current economic and credit environment.

The cost of the Company's subordinated debentures issued by USB Capital Trust II has remained low as market rates have remained low over the last three or four years. With pricing at 3-month-LIBOR plus 129 basis points, the effective cost of the subordinated debt was 1.54% and 1.60% at December 31, 2013 and 2012, respectively. Pursuant to fair value accounting guidance, the Company has recorded \$776,000 in pretax fair value losses on its junior subordinated debt during the year ended December 31, 2013, bringing the total cumulative gain recorded on the debt to \$5,511,000 at December 31, 2013.

The Company continues to emphasize relationship banking and core deposit growth, and has focused greater attention on its market area of Fresno, Madera, and Kern Counties, as well as Campbell, in Santa Clara County. The San Joaquin Valley and other California markets continue to exhibit weak demand for construction lending and commercial lending from small and medium size businesses, as commercial and residential real estate markets have remained depressed since 2008. We have seen improvement during the later part of 2012 and through 2013, and are optimistic that these positive trends will continue. There are continued challenges for the banking industry with tight credit markets and relatively weak real estate markets adversely affecting the Banking industry and the Company.

The Company continually evaluates its strategic business plan as economic and market factors change in its market area. Balance sheet management, enhancing revenue sources, and maintaining market share will continue to be of primary importance during 2014 and beyond. The banking industry is still experiencing downward pressure on net margins as interest rates remain at historical lows. During March 2010, the Company and the Bank entered into a regulatory agreement with the Federal Reserve Bank which, among other things, requires improvements in the overall condition of the Company and the Bank. As a result, market rates of interest, asset quality, as well as regulatory oversight will continue to be an important factor in the Company's ongoing strategic planning process.

Application of Critical Accounting Policies and Estimates

The Company's consolidated financial statements are prepared in accordance with generally accepted accounting principles and follow general practices within the industry in which it operates. Application of these principles requires management to make estimates, assumptions, and judgments that affect the amounts reported in the financial statements and accompanying notes. These estimates,

assumptions, and judgments are based on information available as of the date of the financial statements; accordingly, as this information changes, the financial statements could reflect different estimates, assumptions, and judgments. Certain policies inherently have a greater reliance on the use of estimates, assumptions, and judgments and as such have a greater possibility of producing results that could be materially different than originally reported. Estimates, assumptions, and judgments are necessary when assets and liabilities are required to be recorded at fair value, when a decline in the value of an asset not carried on the financial statements at fair value warrants an impairment write-down or valuation reserve to be established, or when an asset or liability needs to be recorded contingent upon a future event. Carrying assets and liabilities at fair value inherently results in more financial statement volatility. The fair values and the information used to record valuation adjustments for certain assets and liabilities are based either on quoted market prices or are provided by other third-party sources, when available. When third-party information is not available, valuation adjustments are estimated using the Company's own assumptions about the assumptions that market participants would use in pricing the asset or liability.

The most significant accounting policies followed by the Company are presented in Note 1 to the Company's consolidated financial statements included herein. These policies, along with the disclosures presented in the other financial statement notes and in this financial review, provide information on how significant assets and liabilities are valued in the financial statements and how those values are determined. Based on the valuation techniques used and the sensitivity of financial statement amounts to the methods, assumptions, and estimates underlying those amounts, management has identified the determination of the allowance for credit losses, other real estate owned through foreclosure, impairment of collateralized mortgage obligations and other investment securities, and fair value estimates on junior subordinated debt, valuation for deferred income taxes, and goodwill, to be accounting areas that require the most subjective or complex judgments, and as such could be most subject to revision as new information becomes available.

Allowance for Credit Losses

The allowance for credit losses represents management's estimate of probable credit losses inherent in the loan portfolio. Determining the amount of the allowance for credit losses is considered a critical accounting estimate because it requires significant judgment and the use of estimates related

to the amount and timing of expected future cash flows on impaired loans, estimated losses on pools of homogeneous loans based on historical loss experience, and consideration of current economic trends and conditions, all of which may be susceptible to significant change. The loan portfolio also represents the largest asset type on the consolidated balance sheet. Note 1 to the consolidated financial statements describes the methodology used to determine the allowance for credit losses and a discussion of the factors driving changes in the amount of the allowance for credit losses is included in the Asset Quality and Allowance for Credit Losses section of this financial review.

Other Real Estate Owned

Real estate properties acquired through, or in lieu of, loan foreclosure are to be sold and are initially recorded at fair value of the property, less estimated costs to sell. The excess, if any, of the loan amount over the fair value of the collateral is charged to the allowance for credit losses. The determination of fair value is generally based upon pre-approved, external appraisals. Subsequent declines in the fair value of other real estate owned, along with related revenue and expenses from operations, are charged to noninterest expense. The fair market valuation of such properties is based upon estimates, and as such, is subject to change as circumstances in the Company's market area, or general economic trends, change.

Impairment of Investment Securities

Investment securities classified as available for sale ("AFS") are carried at fair value and the impact of changes in fair value are recorded on the Company's consolidated balance sheet as an unrealized gain or loss in "Accumulated other comprehensive income (loss)," a separate component of shareholders' equity. Securities classified as AFS or held to maturity ("HTM") are subject to review to identify when a decline in value is other than temporary. Factors considered in determining whether a decline in value is other than temporary include: whether the decline is substantial; the duration of the decline; the reasons for the decline in value; whether the decline is related to a credit event or to a change in interest rate; our ability and intent to hold the investment for a period of time that will allow for a recovery of value; and the financial condition and near-term prospects of the issuer.

Fair Value

Effective January 1, 2007, the Company adopted fair value option accounting standards choosing to apply the standards to its junior subordinated debt. The Company concurrently adopted the accounting standards related to fair value measurements. The accounting standards related to fair value

measurements defines how applicable assets and liabilities are to be valued, and requires expanded disclosures about financial instruments carried at fair value. The fair value measurement accounting standard establishes a hierarchical disclosure framework associated with the level of pricing observability utilized in measuring financial instruments at fair value. The degree of judgment utilized in measuring the fair value of financial instruments generally correlates to the level of pricing observability. Financial instruments with readily available active quoted prices or for which fair value can be measured from actively quoted prices generally will have a higher degree of pricing observability and a lesser degree of judgment utilized in measuring fair value. Conversely, financial instruments infrequently traded or not quoted in an active market will generally have little or no pricing observability and a higher degree of judgment utilized in measuring fair value. Pricing observability is impacted by a number of factors, including the type of financial instrument, whether the financial instrument is new to the market and not yet established and the characteristics specific to the transaction. Determining fair values under the accounting standards may include judgments related to measurement factors that may vary from actual transactions executed in the marketplace. For the years ended December 31, 2013 and 2012, the Company recorded fair value adjustments related to its junior subordinated debt totaling losses of \$776,000 and \$774,000, respectively. (See Notes 8 and 13 of the *Notes to Consolidated Financial Statements* for additional information about financial instruments carried at fair value.)

Goodwill

Business combinations involving the Company's acquisition of the equity interests or net assets of another enterprise or the assumption of net liabilities in an acquisition of branches constituting a business may give rise to goodwill. The acquisition of Taft National Bank during April 2004 gave rise to goodwill totaling approximately \$1.6 million, and the acquisition of Legacy Bank during February 2007 resulted in goodwill of approximately \$2.9 million. Goodwill represents the excess of the cost of an acquired entity over the net of the amounts assigned to assets acquired and liabilities assumed in transactions accounted for under the purchase method of accounting. The value of goodwill is ultimately derived from the Company's ability to generate net earnings after the acquisition. A decline in net earnings could be indicative of a decline in the fair value of goodwill and result in impairment. For that reason, goodwill is assessed for impairment at a reporting unit level at least annually using an internal discounted cash flow model. The Company recognized no impairment of goodwill during 2013 and

2012. While the Company believes all assumptions utilized in its assessment of goodwill for impairment are reasonable and appropriate, changes in earnings, the effective tax rate, historical earnings multiples and the cost of capital could all cause different results for the calculation of the present value of future cash flows.

Income Taxes

Deferred income taxes are provided for the temporary differences between the financial reporting basis and the tax basis of the Company's assets and liabilities. Deferred taxes are measured using current tax rates applied to such taxable income in the years in which those temporary differences are expected to be recovered. If the Company's future income is not sufficient to apply the deferred tax assets within the tax years to which they may be applied, the deferred tax asset may not be realized and the Company's income will be reduced. The Company had recorded a valuation allowance against its deferred tax assets of \$0 and \$2,686,000 at December 31, 2013 and 2012, respectively.

On January 1, 2007, the Company adopted the accounting standards related to uncertainty in income taxes. The standard prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. Under the accounting standards, an entity should recognize the financial statement benefit of a tax position if it determines that it is *more likely than not* that the position will be sustained on examination. The term "more likely than not" means a likelihood of more than 50 percent. In assessing whether the more-likely-than-not criterion is met, the entity should assume that the tax position will be reviewed by the applicable taxing authority.

The Company had no FIN 48 reserve as of December 31, 2013 and 2012.

Pursuant to the accounting standards related to uncertainty in income taxes, the Company will continue to re-evaluate existing tax positions, as well as new positions as they arise. If the Company determines in the future that its tax positions are not "more likely than not" to be sustained (as defined) by taxing authorities, the Company may need to recognize additional tax liabilities.

Revenue recognition

The Company's primary sources of revenue are interest income from loans and investment securities. Interest income is generally recorded on an accrual basis, unless the collection of such income is not reasonably assured or cannot

be reasonably estimated. Pursuant to accounting standards related to revenue recognition, nonrefundable fees and costs associated with originating or acquiring loans are recognized as a yield adjustment to the related loans by amortizing them into income over the term of the loan using a method which approximates the interest method. Other credit-related fees, such as standby letter of credit fees, loan placement fees and annual credit card fees are recognized as noninterest income during the period the related service is performed.

For loans placed on nonaccrual status, the accrued and unpaid interest receivable may be reversed at management's discretion based upon management's assessment of collectibility, and interest is thereafter credited to principal to the extent necessary to eliminate doubt as to the collectibility of the net carrying amount of the loan.

Results of Operations

On a year-to-date basis, the Company reported net income of \$7,269,000 or \$0.49 per share (\$0.49 diluted) for the year ended December 31, 2013, as compared to \$6,069,000 or \$0.41 per share (\$0.41 diluted) for the same period in 2012. The increase of \$1,200,000 between December 31, 2012 and

December 31, 2013 resulted from decreases in non interest expense, a negative provision for loan loss in 2013, in addition to a reversal of the allowance for deferred tax assets.

The Company's return on average assets was 1.13% for the year ended December 31, 2013, as compared to 0.97% for the year ended December 31, 2012. The Company's return on average equity was 10.09% for the year ended December 31, 2013, as compared to 9.20% for the year ended December 31, 2012.

As with variances in net income, changes in the return on average assets and average equity experienced by the Company during 2013 and 2012 were primarily the result of fluctuations in loan loss provisions taken during the past two years, as well as the reversal of the allowance for deferred tax assets and OREO-related expenses.

The following table sets forth certain selected financial data for the Bank for each of the years in the five-year periods ended December 31, 2013, and should be read in conjunction with the more detailed information and financial statements contained elsewhere herein (in thousands except per share data and ratios).

(in thousands except per share data and ratios)

	2013	2012	2011	2010	2009
Selected Financial Ratios:					
Return on average assets	1.13%	0.97%	(1.64)%	(0.63)%	(0.62)%
Return on average shareholders' equity	10.09%	9.23%	(15.86)%	(5.67)%	(5.77)%

Dividend payout ratio	—%	—%	—%	—%	—%

Net Interest Income

Net interest income, the most significant component of earnings, is the difference between the interest and fees received on earning assets and the interest paid on interest-bearing liabilities. Earning assets consist primarily of loans, and to a lesser extent, investments in securities issued by federal, state and local authorities, and corporations, as well as interest-bearing deposits and overnight funds with other financial institutions. These earning assets are funded by a combination of interest-bearing and noninterest-bearing liabilities, primarily customer deposits and short-term and long-term borrowings.

Net interest income before provision for credit losses totaled \$21,391,000 for the year ended December 31, 2013, representing a decrease of \$1,699,000, or 7.36%, when compared to the \$23,090,000 reported for the same period of the previous year. The Company's year-to-date net interest margin, as shown in Table 1, decreased to 3.86% at December 31, 2013 from 4.40% at December 31, 2012, a decrease of 54 basis points (100 basis points = 1%) between the two periods. Significant declines in the Company's cost of funds helped to mitigate declines in net interest income and minimized the decrease in the net margin between the two periods.

Interest expense as a percentage						
of average earning assets			0.29%			0.39%
Net interest margin			3.86%			4.40%

(1) Loan amounts include nonaccrual loans, but the related interest income has been included only if collected for the period prior to the loan being placed on a nonaccrual basis. Loan interest income includes loan fees of approximately \$10,000 and \$527,000 for the years ended December 31, 2013 and 2012, respectively.

The prime rate averaged 3.25% for the years ended December 31, 2013 and 2012.

Both the Company's net interest income and net interest margin are affected by changes in the amount and mix of interest-earning assets and interest-bearing liabilities, referred to as "volume change." Both are also affected by changes in yields on interest-earning assets and rates paid on interest-bearing liabilities, referred to as "rate change." The following

table sets forth the changes in interest income and interest expense for each major category of interest-earning asset and interest-bearing liability, and the amount of change attributable to volume and rate changes for the years indicated. Changes in interest income and expense, which are not attributable specifically to either rate or volume, are allocated proportionately between the two variances based on the absolute dollar amounts of the change in each.

Table 2. Rate and Volume Analysis

<i>(In thousands)</i>	2013 compared to 2012			2012 compared to 2011		
	Total	Rate	Volume	Total	Rate	Volume
Increase (decrease) in interest income:						
Loans	\$(1,205)	\$(1,380)	175	\$(2,389)	\$(268)	(2,121)
Investment securities	(1,017)	(706)	(311)	(421)	54	(475)
Interest-bearing deposits in other banks	(15)	(14)	(1)	(16)	(11)	(5)
Interest-bearing deposits in FRB	88	2	86	38	2	36
Total interest income	(2,149)	(2,098)	(51)	(2,788)	(223)	(2,565)
Increase (decrease) in interest expense:						
Interest-bearing demand accounts	(168)	(262)	94	(257)	(294)	37
Savings accounts	(14)	(18)	4	(35)	(41)	6
Time deposits	(279)	(137)	(142)	(537)	(160)	(377)
Other borrowings	—	—	—	(101)	(51)	(50)
Subordinated debentures	11	(23)	34	27	41	(14)
Total interest expense	(450)	(440)	(10)	(903)	(505)	(398)
Increase (decrease) in net interest income	\$(1,699)	\$(1,658)	(41)	\$(1,885)	\$ 282	(2,167)

For the year ended December 31, 2013, total interest income decreased approximately \$2,149,000 or 8.54% as compared to the year ended December 31, 2012. Earning asset volumes decreased in investment securities available for sale and interest-bearing deposits in other banks between the two periods with a large decrease experienced in securities, which on average decreased \$8,114,000 between the two periods. The average rates on loans decreased 35 basis points between the two periods, and the average rate on investment securities decreased approximately 216 basis points during the year ended December 31, 2013, as compared to the same period of 2012. The decrease in the average rate on investment securities is a result of the sale of \$7.5 million in impaired residential mortgage obligations during the fourth quarter of 2012.

For the year ended December 31, 2013, total interest expense decreased approximately \$450,000, or 21.83%, as compared

to the year ended December 31, 2012. Between those two periods, average interest-bearing liabilities increased by \$3,565,000, while the average rates paid on these liabilities decreased by 13 basis points.

Provision for Credit Losses

Provisions for credit losses are determined on the basis of management's periodic credit review of the loan portfolio, consideration of past loan loss experience, current and future economic conditions, and other pertinent factors. Such factors consider the allowance for credit losses to be adequate when it covers estimated losses inherent in the loan portfolio. Based on the condition of the loan portfolio, management believes the allowance is sufficient to cover risk elements in the loan portfolio.

For the year ended December 31, 2013, the provision to the allowance for credit losses amounted to a benefit of \$(1,098,000) as compared to a provision of \$1,019,000 for the year ended December 31, 2012.

The amount provided to the allowance for credit losses during the year ended December 31, 2013, brought the allowance to 2.78% of net outstanding loan balances at December 31, 2013, as compared to 2.95% of net

outstanding loan balances at December 31, 2012. The negative loan loss provision recorded during 2013 is a result of continuing improvements in the overall credit quality of the loan portfolio, overall improvement in the loss history over the last year, improvement in property values that serve as collateral for a large portion of loan portfolio, as well as modest reductions in the overall loan portfolio between December 31, 2012 and December 31, 2013.

Noninterest Income

The following table summarizes significant components of noninterest income for the years indicated and the net changes between those years:

<i>(In thousands)</i>	2013	2012	Amount of Change	Percent Change
Customer service fees	\$3,456	\$3,583	\$ (127)	(3.54)%
Increase in cash surrender value of BOLI	556	564	(8)	(1.42)%
Loss on disposition of securities	—	(195)	195	(100.00)%
Impairment loss on investment securities	—	(284)	284	(100.00)%
Loss on fair value option of financial liabilities	(776)	(774)	(2)	0.26%
Gain on other investments	—	1,739	(1,739)	(100.00)%
Other	732	843	(111)	(13.17)%
Total	\$3,968	\$5,476	\$(1,508)	(27.54)%

Noninterest income consists primarily of fees and commissions earned on services that are provided to the Company's banking customers and, to a lesser extent, gains on sales of Company assets and other miscellaneous income.

Noninterest income for the year ended December 31, 2013 decreased \$1,508,000 or 27.54% when compared to the same period of 2012. Customer service fees, the primary component of noninterest income, decreased \$127,000 or

3.54% between the two periods presented. The decrease in noninterest income of \$1,508,000 between the two periods includes a decrease in gain on sale of other investment due to a gain of \$1,739,000 realized in 2012 on the sale of a tax credit partnership and a decrease due to loss on fair value of financial liability, partially offset by an increase in impairment loss on investment securities and loss on disposition of securities.

Noninterest Expense

The following table sets forth the components of total noninterest expense in dollars and as a percentage of average earning assets for the years ended December 31, 2013 and 2012:

<i>(Dollars in thousands)</i>	2013		2012	
	Amount	% of Average Earning Assets	Amount	% of Average Earning Assets
Salaries and employee benefits	\$ 9,214	1.66%	\$ 9,082	1.73%
Occupancy expense	3,678	0.66%	3,548	0.68%
Data processing	185	0.03%	77	0.01%
Professional fees	1,275	0.23%	1,707	0.33%
FDIC/DFI assessments	1,150	0.21%	1,409	0.27%
Directors fees	232	0.04%	256	0.05%
Amortization of intangibles	187	0.03%	304	0.06%
Correspondent bank service charges	287	0.05%	313	0.06%
Loss on CA Tax Credit Partnership	253	0.05%	39	0.01%
OREO expense	271	0.05%	934	0.18%
Other	2,351	0.42%	2,276	0.43%
Total	\$19,083	3.44%	\$19,945	3.80%

Noninterest expense decreased \$862,000 between the years ended December 31, 2013 and 2012. The net decrease in noninterest expense between the comparative periods is primarily the result of a decrease on net cost of operation on OREO and decreases in regulatory assessments and professional fees.

Included in net costs on operations of OREO for the years ended December 31, 2013 and 2012, are gains on the sale of OREO totaling \$1,346,000 and \$278,000, respectively, which were offset by impairment losses of \$214,000 and \$463,000, as well as OREO operating expenses totaling \$1,403,000 and \$749,000, respectively.

During the years ended December 31, 2013 and 2012, the Company recognized stock-based compensation expense of \$29,000 and \$18,000, respectively (less than \$0.01 per share basic and diluted). This expense is included in noninterest expense under salaries and employee benefits. Under the current pool of stock options, the Company expects stock-based compensation expense to be about \$2,100 per quarter for 2014 through 2015, and about \$1,700 for the first quarter of 2016. If new stock options are issued, or existing options fail to vest due, for example, to forfeiture, actual stock-based compensation expense in future periods will change.

Income Taxes

The Company's income tax expense is impacted to some degree by permanent taxable differences between income reported for book purposes and income reported for tax purposes, as well as certain tax credits which are not reflected in the Company's pretax income or loss shown in the statements of operations and comprehensive income. As pretax income or loss amounts become smaller, the impact of these differences become more significant and are reflected as variances in the Company's effective tax rate for the periods presented. In general, the permanent differences and tax credits affecting tax expense have a positive impact and tend to reduce the effective tax rates shown in the Company's statements of operations and comprehensive income.

The Company reviews its current tax positions at least quarterly based upon accounting standards related to uncertainty in income taxes which includes the criteria that an individual tax position would have to meet for some or all of the income tax benefit to be recognized in a taxable entity's financial statements. Under the income tax guidelines, an entity should recognize the financial statement benefit of a tax position if it determines that it is *more likely than not* that the position will be sustained on examination. The term "more likely than not" means a likelihood of more than 50 percent."

In assessing whether the more-likely-than-not criterion is met, the entity should assume that the tax position will be reviewed by the applicable taxing authority.

The Company has reviewed all of its tax positions as of December 31, 2013, and has determined that, there are no material amounts that should be recorded under the current income tax accounting guidelines.

Financial Condition

Total assets decreased by \$12,948,000 or 2.00% during the year to \$635,929,000 at December 31, 2013, and decreased 15,403,000 or 1.99% from the balance of 651,332,000 at December 31, 2011. During the year ended December 31, 2013, decreases of \$4,224,000 were experienced in net loans. Overnight interest-bearing deposits in the Federal Reserve Bank and federal funds sold increased a net \$873,000, while investment securities increased by \$11,772,000 during the year ended December 31, 2013. Total deposits of \$542,489,000 at December 31, 2013, decreased \$20,798,000 or 3.69% from the balance reported at December 31, 2012, a \$31,938,000 or 3.62% decrease from the balance of \$574,427,000 reported at December 31, 2011.

During the year ended December 31, 2012, decreases of \$8,658,000 were experienced in net loans as real estate lending plateaued and approximately \$2.4 million in problem loans were transferred to OREO, while another \$4,278,000 was charged off against the allowance for loan losses.

Overnight interest-bearing deposits in the Federal Reserve Bank and federal funds sold, increased a net \$18,014,000, while investment securities decreased by \$6,614,000 during the year ended December 31, 2012. Total deposits of \$563,287,000 at December 31, 2012 decreased \$11,140,000 or 1.94% from the balance reported at December 31, 2011, a \$5,821,000 or 1.03% increase from the balance of \$557,466,000 reported at December 31, 2010.

Earning assets averaged approximately \$554,540,000 during the year ended December 31, 2013, as compared to \$524,791,000 for the year ended December 31, 2012. Average interest-bearing liabilities increased to \$345,364,000 for the year ended December 31, 2013, as compared to \$341,799,000 for the year ended December 31, 2012.

Loans

The Company's primary business is that of acquiring deposits and making loans, with the loan portfolio representing the largest and most important component of its earning assets. Loans totaled \$395,317,000 at December 31, 2013, representing a decrease of \$4,740,000 or 1.18% when compared to the balance of \$400,057,000 at December 31, 2012. During 2013 average loans increased 0.76% when compared to the year ended December 31, 2012. Average loans totaled \$392,340,000, \$389,377,000, and \$424,961,000 for the years ended December 31, 2012, 2012 and 2011, respectively.

The following table sets forth the amounts of loans outstanding by category and the category percentages as of the year-end dates indicated:

	2013		2012		2011		2010 (1)		2009 (1)	
	Dollar Amount	% of Loans								
<i>(In thousands)</i>

(1) See Notes to Financial Statements 1.r.

Loan volume continues to be greatest in what has historically been the Bank's primary lending emphasis: commercial, real estate mortgage, and construction lending. Although total loans decreased during 2013, with signs of recovery in the real estate markets, the Company experienced increases in real estate mortgage and a decrease in construction lending of \$7,431,000, or 3.9% and \$3,937,000, and 4.3%, respectively. All other loan categories decreased; commercial and industrial loans decreased \$1,431,000 or 1.98%, agriculture loans decreased \$5,237,000, or 14.5%, and installment loans decreased \$1,554,000, or 14.3% when compared to the previous year.

During 2012, the Company experienced an increase of \$20,064,000 or 28.3% in construction loans, an increase of \$7,803,000 or 4.3% in real estate mortgage loans, a decrease of \$9,314,000 or 20.5% in agricultural loans and a decrease of \$232,000 or 2.1% in installment loans. Lease financing also experienced moderate decreases, as the Company is no longer originating commercial leases.

At December 31, 2013, approximately 42.7% of commercial and industrial loans have floating rates and, although some may be secured by real estate, many are secured by accounts receivable, inventory, and other business assets. Residential housing markets regained some momentum in 2013, and as a result, real estate mortgage loans increased \$7,431,000, while real estate construction loans decreased \$3,937,000 or 4.3% during 2013, as compared to an increase

of \$20,064,000 or 28.3% during 2012. Construction loans are generally short-term, floating-rate obligations, which consist of both residential and commercial projects. Agricultural loans consisting of mostly short-term, floating rate loans for crop financing, decreased \$5,237,000 or 14.5% between December 31, 2012 and December 31, 2013; and commercial loans consisting primarily of loans for non real estate business operations, decreased \$1,431,000 or 1.98% and installment loans decreased \$1,554,000 or 14.3% during that same period.

The real estate mortgage loan portfolio totaling \$197,365,000 at December 31, 2013, consists of commercial real estate, residential mortgages, and home equity loans. Commercial real estate is the core of this segment of the portfolio, with balances of \$143,919,000, and \$133,599,000 at December 31, 2013 and 2012, respectively. Commercial real estate loans are generally a mix of short to medium-term, fixed and floating rate instruments and, are mainly tied to commercial income and multi-family residential properties. The Company does not currently offer traditional residential mortgage loans, but may purchase mortgage portfolios. During the fourth quarter of 2012, the Company purchased \$13.3 million in residential mortgage loans. The residential real estate mortgage portfolio had balances of \$52,036,000 and \$55,016,000 at December 31, 2013 and 2012, respectively. The Company also offers short to medium-term, fixed-rate, home equity loans, which totaled \$1,410,000 at December 31, 2013 and \$1,319,000 at December 31, 2012.

The following table sets forth the maturities of the Bank's loan portfolio at December 31, 2013. Amounts presented are shown by maturity dates rather than repricing periods:

<i>(In thousands)</i>	Due in one year or less	Due after one year through five years	Due after five years	Total
Commercial and agricultural	\$ 37,160	\$ 50,812	\$13,646	\$101,618
Real estate construction & development	55,450	31,554	—	87,004
Real estate – mortgage	29,946	97,301	70,118	197,365
All other loans	3,734	4,140	1,456	9,330
Total Loans	\$126,290	\$183,807	\$85,220	\$395,317

For the year ended December 31, 2013 and 2012, the average yield on loans was 5.60% and 5.95%, respectively. This consistent yield was due in part to the Company utilizing rate floors intended to mitigate interest rate risk as interest rates fall, as well as to compensate the Company for additional credit risk under current market conditions. The Bank's loan portfolio is generally comprised of short-term or floating rate

loans and is therefore susceptible to fluctuations in market rates of interest.

At December 31, 2013 and 2012, approximately 40.4% and 42.3% of the Bank's loan portfolio consisted of floating rate instruments, with the majority of those tied to the prime rate.

The following table sets forth the contractual maturities of the Bank's fixed and floating rate loans at December 31, 2013. Amounts presented are shown by maturity dates rather than repricing periods, and do not consider renewals or prepayments of loans:

<i>(In thousands)</i>	Due in one year or less	Due after one year through five years	Due after five years	Total
Accruing loans:				
Fixed rate loans	\$ 41,283	\$142,786	\$38,795	\$222,864

(1) Weighted average yields are not computed on a tax equivalent basis

At December 31, 2013 and 2012, available-for-sale securities with an amortized cost of approximately \$23,935,000 and \$26,695,000, respectively (fair value of \$26,695,000 and \$27,878,000, respectively) were pledged as collateral for public funds and FHLB borrowings.

Deposits

The Bank attracts commercial deposits primarily from local businesses and professionals, as well as retail checking

accounts, savings accounts and time deposits. Total deposits decreased \$20,798,000 or 3.69% during the year to a balance of \$542,489,000 at December 31, 2013. Core deposits, consisting of all deposits other than time deposits of \$100,000 or more and brokered deposits, continue to provide the foundation for the Bank's principal sources of funding and liquidity. These core deposits amounted to 87.8% and 84.9% of the total deposit portfolio at December 31, 2013 and 2012, respectively.

The following table sets forth the year-end amounts of deposits by category for the years indicated, and the dollar change in each category during the year:

(In thousands)	December 31,			Change during Year	
	2013	2012	2011	2013	2012
Noninterest-bearing deposits	\$214,317	\$217,014	\$224,907	\$ (2,697)	\$ (7,893)
Interest-bearing deposits:					
NOW and money market accounts	198,928	203,771	165,937	(4,843)	37,834
Savings accounts	45,758	43,117	40,099	2,641	3,018
Time deposits:					
Under \$100,000	28,825	32,532	53,271	(3,707)	(20,739)
\$100,000 and over	54,661	66,853	90,213	(12,192)	(23,360)
Total interest-bearing deposits	328,172	346,273	349,520	(18,101)	(3,247)
Total deposits	\$542,489	\$563,287	\$574,427	\$ (20,798)	\$ (11,140)

As a result of the March 2010 agreement with the Federal Reserve Bank, the Company has continued to reduce its reliance on brokered and other wholesale funding sources. The Company has a written plan, approved by the Federal Reserve Bank, to improve its liquidity position which included a timetable to reduce the Bank's reliance on brokered deposits and other wholesale funding, and specific liquidity targets and parameters to meet contractual obligations and unanticipated demands. Under the plan, the Company has systematically reduced the level of brokered deposits to peer levels (as percentage of total deposits) by letting some or all of the maturing brokered deposits run-off as needed. As of December 31, 2013, brokered deposits totaled 2.12% of total deposits which the Company believes to be in line with peers.

During the year ended December 31, 2013, decreases were experienced across all categories except for savings accounts. While total time deposits decreased \$15,899,000 or 4.59% during the year ended December 31, 2013, brokered deposits, a component of total time deposits, decreased \$6,484,000 or 2.12% during the year and non interest bearing deposits decreased \$2,697,000. These decreases were partially offset by increases in savings accounts of \$2,641,000 or 6.13% during the year ended December 31, 2013.

During the year ended December 31, 2012, increases in NOW and money market accounts of \$37,834,000, or 18.6%, and increases of \$3,018,000 in savings accounts were offset by decreases in time deposits under \$100,000 of \$20,739,000, or 38.9%, and decreases in time deposits of \$100,000 or more of \$23,360,000, or 25.9%, during the year ended December 31, 2012. Of the \$23,360,000 decrease in time deposits of \$100,000 or more, \$3,247,000 was attributable to increases in brokered deposits.

Pricing of brokered time deposits and other wholesale deposits have remained low over the past two years and have provided a viable alternate to borrowings from the Federal Reserve or the FHLB. The Company believes this rate structure will eventually turn, and wholesale funding sources, both deposits and borrowings, will again become expensive relative to other core deposits in the marketplace. Although the Company will continue to use pricing

strategies to control the overall level of time deposits and other borrowings as part of its balance sheet and liquidity planning process, the March 2010 agreement with the Federal Reserve Bank requires reductions in brokered deposits, which places increased emphasis on core deposits as part of the Company's long-term relationship banking strategy. As a result, core deposits, including NOW and money market accounts, and savings accounts, as well as noninterest-bearing checking accounts, continue to provide the Company's primary funding source.

The Company's deposit base consists of two major components represented by noninterest-bearing (demand) deposits and interest-bearing deposits. Interest-bearing deposits consist of time certificates, NOW and money market accounts and savings deposits. Total noninterest-bearing deposits decreased \$2,697,000 or 1.2% between December 31, 2012 and December 31, 2013, while interest-bearing deposits decreased \$18,101,000 or 5.2% during the same period. Between December 31, 2011 and December 31, 2012, total interest-bearing deposits increased \$3,247,000 or 0.6%, while noninterest-bearing deposits decreased \$7,893,000 or 3.6%.

On a year-to-date average basis, total deposits increased \$12,310,000 or 2.3% between the years ended December 31, 2012 and December 31, 2013. Of that total, interest-bearing deposits increased by \$2,310,000 or 0.7%, while noninterest-bearing deposits increased \$10,000,000 or 4.76% during 2013. On average, the Company experienced decreases in time deposits, while NOW accounts, money market and savings accounts increased between the years ended December 31, 2012 and December 31, 2013. On a year-to-date average basis, total deposits decreased \$10,043,000 or 1.8% between the years ended December 31, 2011 and December 31, 2012. Of that total, interest-bearing deposits decreased by \$40,807,000 or 10.9%, while noninterest-bearing deposits decreased \$30,764,000 or 17.2% during 2012. On average, the Company experienced decreases in NOW accounts and time deposits, while money market and savings accounts increased between the years ended December 31, 2011 and December 31, 2012.

The following table sets forth the average deposits and average rates paid on those deposits for the years ended December 31, 2013, 2012, and 2011:

	2013		2012		2011	
	Average Balance	Rate %	Average Balance	Rate %	Average Balance	Rate %
<i>(Dollars in thousands)</i>						
Interest-bearing deposits:						
Checking accounts	\$198,651	0.34%	\$177,142	0.48%	\$171,137	0.64%
Savings	42,837	0.20%	40,986	0.24%	39,174	0.34%
Time deposits (1)	93,236	0.61%	114,286	0.74%	162,910	0.85%
Noninterest-bearing deposits	220,003		210,003		179,239	

(1) Included at December 31, 2013, are \$54,661,000 in time certificates of deposit of \$100,000 or more, of which \$14,124,000 matures in three months or less, \$26,402,000 matures in 3 to 12 months, and \$10,535,000 matures in more than 12 months.

Short-term Borrowings

The Company has the ability to obtain borrowed funds consisting of federal funds purchased, securities sold under agreements to repurchase ("repurchase agreements") and Federal Home Loan Bank ("FHLB") advances as alternatives to retail deposit funds. The Company has established collateralized and uncollateralized lines of credit with several correspondent banks, as well as a securities dealer, for the purpose of obtaining borrowed funds as needed. The Company may continue to borrow funds in the future as part of its asset/liability strategy, and may use these funds to acquire certain other assets as deemed appropriate by management for investment purposes and to better utilize the capital resources of the Bank. Federal funds purchased represent temporary overnight borrowings from correspondent banks and are generally unsecured. Repurchase agreements are collateralized by mortgage backed securities and securities of U.S. Government agencies, and generally have maturities of one to six months, but may have longer maturities if deemed appropriate as part of the Company's asset/liability management strategy. FHLB advances are collateralized by the Company's investment in FHLB stock, securities, and certain qualifying mortgage loans. In addition, the Company has the ability to obtain borrowings from the Federal Reserve Bank of San Francisco ("FRB"), which would be collateralized by certain pledged loans in the Company's loan portfolio. The lines of credit are subject to periodic review of the Company's financial statements by the grantors of the credit lines. Lines of credit may be modified or revoked at any time if the grantors feel there are adverse trends in the Company's financial position.

The Company had collateralized lines of credit with the FRB of \$254,761,000 and \$254,761,000, as well as FHLB lines of credit

totaling \$7,094,000 and \$10,493,000 at December 31, 2013 and 2012, respectively. In addition, the Company obtained a \$10,000,000 uncollateralized line of credit during 2013 from Pacific Coast Bankers Bank. At December 31, 2013, the Company had no outstanding balances drawn against any of its lines of credit. These lines of credit generally have interest rates tied to the Federal Funds rate or are indexed to short-term U.S. Treasury rates or LIBOR.

Asset Quality and Allowance for Credit Losses

Lending money is the Company's principal business activity, and ensuring appropriate evaluation, diversification, and control of credit risks is a primary management responsibility. Losses are implicit in lending activities and the amount of such losses will vary, depending on the risk characteristics of the loan portfolio as affected by local economic conditions and the financial experience of borrowers.

As a result of the March 2010 agreement with the Federal Reserve Bank, the Company has written several plans to address the management of asset quality and the adequacy of the allowance for loan and lease losses. Specifically, the Company has three written plans which directly address these issues:

- Plan to Strengthen Credit Risk Management Practices – Includes the responsibility of the Board to establish appropriate risk tolerance guidelines and limits, timely and accurate identification and quantification of credit risk, strategies to minimize credit losses and reduce the level of problem assets, procedures for the ongoing review of the investment portfolio to evaluate other-than-temporary-impairment, stress testing for commercial real estate loans and portfolio segments,

and measures to reduce the levels of other real estate owned.

- Plan to Improve Adversely Classified Assets – Includes specific plans and strategies to improve the Bank’s asset position through repayment, amortization, liquidation, additional collateral, or other means on each loan, relationship, or other asset in excess of \$1.5 million including OREO, that are past due more than 90 days as of the date of the written agreement.
- Plan for Maintenance of Adequate Allowance for Loan Losses – Includes policies and procedures to ensure adherence to the Bank’s revised ALLL methodology, provides for periodic reviews of the methodology as appropriate, and provides for review of ALLL by the Board at least quarterly.

Also as part of the agreement with the Federal Reserve Bank, Board oversight has been enhanced to monitor the operations of the Company including, but not limited to, asset improvement and adequacy of the allowance for loan and lease losses. With regard to asset improvement, the Company will not, directly or indirectly, extend, renew, or restructure any loan to any borrower, including any related interest of the borrower, whose loans were criticized by the Federal Reserve Bank in their June 2009 examination, or any subsequent examination, without prior approval of a majority of the Board of Directors. Any extensions of credit, renewals, or restructurings on loans to such borrowers approved by the Board of Directors, will be supported with detailed written justification. Any additional loan, relationship, or asset in excess of \$1.5 million that becomes past due more than 90 days, will be subject to a written plan to improve the Company’s position with regard to the asset, and that plan will be submitted to the Federal Reserve Bank. The Company will submit written reports to the Federal Reserve Bank on a quarterly basis to include updates of progress made on asset improvement, as well as review and monitoring of the adequacy of the allowance for loan and lease losses.

The allowance for credit losses is maintained at a level deemed appropriate by management to provide for known and inherent risks in existing loans and commitments to extend credit. The adequacy of the allowance for credit losses is based upon management’s continuing assessment of various factors affecting the collectability of loans and commitments to extend credit; including current

economic conditions, past credit experience, collateral, and concentrations of credit. There is no precise method of predicting specific losses or amounts which may ultimately be charged off on particular segments of the loan portfolio. The conclusion that a loan may become uncollectible, either in part or in whole is judgmental and subject to economic, environmental, and other conditions which cannot be predicted with certainty. When determining the adequacy of the allowance for credit losses, the Company follows, in accordance with GAAP, the guidelines set forth in the Revised Interagency Policy Statement on the Allowance for Loan and Lease Losses (“Statement”) issued by banking regulators in December 2006. The Statement is a revision of the previous guidance released in July 2001, and outlines characteristics that should be used in segmentation of the loan portfolio for purposes of the analysis including risk classification, past due status, type of loan, industry or collateral. It also outlines factors to consider when adjusting the loss factors for various segments of the loan portfolio, and updates previous guidance that describes the responsibilities of the board of directors, management, and bank examiners regarding the allowance for credit losses. Securities and Exchange Commission Staff Accounting Bulletin No. 102 was released during July 2001, and represents the SEC staff’s view relating to methodologies and supporting documentation for the Allowance for Loan and Lease Losses that should be observed by all public companies in complying with the federal securities laws and the Commission’s interpretations. It is also generally consistent with the guidance published by the banking regulators.

The allowance for loan losses includes an asset-specific component, as well as a general or formula-based component. The Company segments the loan and lease portfolio into eleven (11) segments, primarily by loan class and type, that have homogeneity and commonality of purpose and terms for analysis under the formula-based component of the allowance. Those loans which are determined to be impaired under current accounting guidelines are not subject to the formula-based reserve analysis, and evaluated individually for specific impairment under the asset-specific component of the allowance. The eleven segments of the Company’s loan portfolio are as follows (subtotals are provided as needed to allow the reader to reconcile the amounts to the Company’s loan classification reported elsewhere in these financial statements):

Loan Segments for Loan Loss Reserve Analysis

(1) During 2012, the Company reviewed and revised the definition of the reporting segments within its loan portfolio to ensure proper uniformity of risk among such segments and has made specific reclassifications to the 2011 segments as reported for consistency. However, balances reported for years prior to 2011 were not subject to this reclassification and so are not comparable. None of the reclassifications had an impact on equity or net (loss) income.

The Company's methodology for assessing the adequacy of the allowance for credit losses consists of several key elements, which include:

- the formula allowance,
- specific allowances for problem graded loans identified as impaired
- and the unallocated allowance

The formula allowance is calculated by applying loss factors to outstanding loans and certain unfunded loan commitments. Loss factors are based on the Company's historical loss experience and on the internal risk grade of those loans and, may be adjusted for significant factors that, in management's judgment, affect the collectability of the portfolio as of the evaluation date. Factors that may affect collectability of the loan portfolio include:

- Levels of, and trends in delinquencies and nonaccrual loans;
- Trends in volumes and term of loans;

- Effects of any changes in lending policies and procedures including those for underwriting, collection, charge-off, and recovery;
- Experience, ability, and depth of lending management and staff;
- National and local economic trends and conditions and;
- Concentrations of credit that might affect loss experience across one or more components of the portfolio, including high-balance loan concentrations and participations.

Management determines the loss factors for problem graded loans (substandard, doubtful, and loss), special mention loans, and pass graded loans, based on a loss migration model. The migration analysis incorporates loan losses over the previous quarters as determined by management (time horizons adjusted as business cycles or environment changes) and loss factors are adjusted to recognize and quantify the loss exposure from changes in market conditions and trends in

the Company's loan portfolio. For purposes of this analysis, loans are grouped by internal risk classifications, which are "pass," "special mention," "substandard," "doubtful," and "loss". Certain loans are homogeneous in nature and are therefore pooled by risk grade. These homogeneous loans include consumer installment and home equity loans. Special mention loans are currently performing but are potentially weak, as the borrower has begun to exhibit deteriorating trends, which if not corrected, could jeopardize repayment of the loan and result in further downgrade. Substandard loans have well-defined weaknesses which, if not corrected, could jeopardize the full satisfaction of the debt. A loan classified as "doubtful" has critical weaknesses that make full collection of the obligation improbable. Classified loans, as defined by the Company, include impaired loans and loans categorized as substandard, doubtful, and loss which are not considered impaired. At December 31, 2013, "classified" loans totaled \$38,365,000 or 9.70% of gross loans as compared to \$35,036,000 or 8.8% of gross loans at December 31, 2012.

Loan participations are reviewed for allowance adequacy under the same guidelines as other loans in the Company's portfolio, with an additional participation factor added, if required, for specific risks associated with participations. In general, participations are subject to certain thresholds set by the Company, and are reviewed for geographic location as well as the well-being of the underlying agent bank.

The formula allowance includes reserves for certain off-balance sheet risks including letters of credit, unfunded loan commitments, and lines of credit. Reserves for undisbursed commitments are generally formula allocations based on the Company's historical loss experience and other loss factors,

rather than specific loss contingencies. At December 31, 2013 and 2012, the formula reserve allocated to undisbursed commitments totaled \$183,000 and \$164,000, respectively. The reserve for unfunded commitments is considered a reserve for contingent liabilities and is therefore carried as a liability on the balance sheet for all periods presented.

Specific allowances are established based on management's periodic evaluation of loss exposure inherent in impaired loans. For impaired loans, specific allowances are determined based on the collateralized value of the underlying properties, the net present value of the anticipated cash flows, or the market value of the underlying assets. Formula allowances for classified loans, excluding impaired loans, are determined on the basis of additional risks involved with individual loans that may be in excess of risk factors associated with the loan portfolio as a whole. The specific allowance is different from the formula allowance in that the specific allowance is determined on a loan-by-loan basis based on risk factors directly related to a particular loan, as opposed to the formula allowance which is determined for a pool of loans with similar risk characteristics, based on past historical trends and other risk factors which may be relevant on an ongoing basis.

The unallocated portion of the allowance is based upon management's evaluation of various conditions that are not directly measured in the determination of the formula and specific allowances. The conditions may include, but are not limited to, general economic and business conditions affecting the key lending areas of the Company, credit quality trends, collateral values, loan volumes and concentrations, and other business conditions.

The following table summarizes the specific allowance, formula allowance, and unallocated allowance at December 31, 2013, 2012 and 2011.

<i>(In thousands)</i>	December 31, 2013	December 31, 2012	December 31, 2011
Specific allowance – impaired loans	\$ 762	\$ 658	\$ 1,254
Formula allowance – classified loans not impaired	3,205	2,871	4,049
Formula allowance – special mention loans	31	113	450
Total allowance for special mention and classified loans	3,998	3,642	5,753
Formula allowance for pass loans	6,595	2,719	7,654
Unallocated allowance	395	5,423	241
Total allowance	\$10,988	\$11,784	\$13,648
Impaired loans	\$18,132	\$21,931	\$31,882
Classified loans not considered impaired	20,233	13,105	12,120
Total classified loans	\$38,365	\$35,036	\$44,002
Special mention loans not considered impaired	\$ 1,825	\$ 2,057	\$11,603

As the total loan portfolio has declined over the past three years from \$408,716,000 at December 31, 2011, to \$400,057,000 at December 31, 2012, and to \$395,317,000 at December 31, 2013, the level of nonperforming loans decreased to \$18,102,000 at December 31, 2013, from \$23,141,000 at December 31, 2012, and \$29,983,000 at December 31, 2011. During the same period, total classified loans increased from \$35,036,000 at December 31, 2012, to \$38,365,000 at December 31, 2013.

<i>(Dollars in thousands)</i>	December 31, 2013	December 31, 2012	December 31, 2011

Impaired loans decreased \$3,799,000 between December 31, 2012 and December 31, 2013, and the specific allowance related to those impaired loans increased \$104,000 between December 31, 2012 and December 31, 2013. The formula allowance related to loans that are not impaired (including special mention and substandard) increased by \$252,000 between December 31, 2012 and December 31, 2013. The level of "pass" loans decreased approximately \$1,905,000 between December 31, 2012 and December 31, 2013, while the related formula allowance increased \$3,876,000 during the period as the result of decreases in the level of "pass loans", the loan loss factors assigned to "pass" loans as determined under migration analysis and decreases in qualitative factors assigned to the formula allowance.

The Company's methodology includes features that are intended to reduce the difference between estimated and actual losses. The specific allowance portion of the analysis is designed to be self-correcting by taking into account the current loan loss experience based on that portion of the portfolio. By analyzing the estimated losses inherent in the loan portfolio on a quarterly basis, management is able to adjust specific and inherent loss estimates using the most recent information available. In performing the periodic migration analysis, management believes that historical loss factors used in the computation of the formula allowance need to be adjusted to reflect current changes in market conditions and trends in the Company's loan portfolio. There are a number of other factors which are reviewed when determining adjustments in the historical loss factors. Those factors include 1) trends in delinquent and nonaccrual loans, 2) trends in loan volume and terms, 3) effects of changes in lending policies, 4) concentrations of credit, 5) competition, 6) national and local economic trends and conditions, 7) experience of lending staff, 8) loan review and Board of Directors oversight, 9) high balance loan concentrations, and 10) other business conditions.

The general reserve requirements (ASC 450-70) decreased with the continued strengthening of local, state, and national economies and their impact on our local lending base, which has resulted in a lower qualitative component for the general reserve calculation. These positive factors were partially offset by the Company including OREO financial results in loss history and extending the look back period used to capture the loss history for the quantitative portion of the ALLL. In the third quarter of 2013, the look back period was changed from 4 years to stake-in-the-ground (December 31, 2005), in an effort to include higher losses experienced during the credit crisis. Changes in the mix of historical losses in the look back period resulted in a reallocation of the general reserve

component of the allowance amount withing the various loan segments as compared to December 31, 2012, as loss experience by segment has fluctuated over time. The stake-in-the-ground methodology requires the Company to use December 31, 2005 as the starting point of the look back period to capture loss history. Time horizons are subject to Management's assessment of the current period, taking into consideration changes in business cycles and environment changes.

Management and the Company's lending officers evaluate the loss exposure of classified and impaired loans on a weekly/monthly basis and through discussions and officer meetings as conditions change. The Company's Loan Committee meets weekly and serves as a forum to discuss specific problem assets that pose significant concerns to the Company, and to keep the Board of Directors informed through committee minutes. All special mention and classified loans are reported quarterly on Problem Asset Reports and Impaired Loan Reports and are reviewed by senior management. Migration analysis and impaired loan analysis are performed on a quarterly basis and adjustments are made to the allowance as deemed necessary. The Board of Directors is kept abreast of any changes or trends in problem assets on a monthly basis, or more often if required. In addition, pursuant to the regulatory agreement, quarterly updates are provided to the Federal Reserve Bank of San Francisco and the California Department of Business Oversight with regard to problem assets levels and trends, liquidity, and capital trends, among other things. (See regulatory section for more details.)

The specific allowance for impaired loans is measured based on the present value of the expected future cash flows discounted at the loan's effective interest rate or the fair value of the collateral if the loan is collateral dependent. The amount of impaired loans is not directly comparable to the amount of nonperforming loans disclosed later in this section. The primary differences between impaired loans and nonperforming loans are: i) all loan categories are considered in determining nonperforming loans while impaired loan recognition is limited to commercial and industrial loans, commercial and residential real estate loans, construction loans, and agricultural loans, and ii) impaired loan recognition considers not only loans 90 days or more past due, restructured loans and nonaccrual loans but may also include problem loans other than delinquent loans.

The Company considers a loan to be impaired when, based upon current information and events, it believes it is probable the Company will be unable to collect all amounts due

according to the contractual terms of the loan agreement. Impaired loans include nonaccrual loans, troubled debt restructures, and performing loans in which full payment of principal or interest is not expected. Management bases the measurement of these impaired loans either on the fair value of the loan's collateral or the expected cash flows on the loans discounted at the loan's stated interest rates. Cash receipts on impaired loans not performing to contractual terms and that are on nonaccrual status are used to reduce principal balances. Impairment losses are included in the allowance for credit losses through a charge to the provision, if applicable.

At December 31, 2013 and 2012, the Company's recorded investment in loans for which impairment has been recognized totaled \$18,132,000 and \$21,931,000, respectively. Included in total impaired loans at December 31, 2013, are \$5,460,000 of impaired loans for which the related specific allowance is \$762,000, as well as \$12,672,000 of impaired loans that as a result of write-downs or the fair value of the collateral, did not have a specific allowance. Total impaired loans at December 31, 2012 included \$8,479,000 of impaired loans for which the related specific allowance is \$658,000, as well as \$13,452,000 of impaired loans that as a result of write-downs or the fair value of the collateral, did not have a specific allowance. The average recorded investment in impaired loans was \$20,111,000 and \$27,039,000 during the

years ended December 31, 2013 and 2012, respectively. In most cases, the Company uses the cash basis method of income recognition for impaired loans. In the case of certain troubled debt restructuring for which the loan is performing under the current contractual terms, income is recognized under the accrual method.

The largest category of impaired loans at December 31, 2013 was real estate mortgage loans, comprising of 85.9% of total impaired loans at December 31, 2013. Impaired construction loans increased \$59,000, impaired commercial and industrial loans decreased \$754,000, impaired real estate mortgage loans decreased \$2,884,000, and impaired agricultural loans decreased \$147,000 during the year ended December 31, 2013. Specific collateral related to impaired loans is reviewed for current appraisal information, economic trends within geographic markets, loan-to-value ratios, and other factors that may impact the value of the loan collateral. Adjustments are made to collateral values as needed for these factors. Of total impaired loans, approximately \$17,361,000 or 95.8% are secured by real estate at December 31, 2013, as compared to \$20,488,000 or 93.4% of total impaired loans at December 31, 2012. The following table summarizes the components of impaired loans and their related specific allowance at December 31, 2013, 2012 and 2011.

<i>(In thousands)</i>	Balance December 31, 2013	Allowance December 31, 2013	Balance December 31, 2012	Allowance December 31, 2012	Balance December 31, 2011	Allowance December 31, 2011

Total impaired loans	\$18,132	\$762	\$21,931	\$658	\$31,881	\$1,254

Included in impaired loans are loans modified in troubled debt restructurings (TDRs), where concessions have been granted to borrowers experiencing financial difficulties in an attempt to enhance collection. The Company makes various types of concessions when structuring TDRs including rate reductions, payment extensions, and forbearance.

In December 31, 2013, \$5,273,000 of the total \$9,059,000 in TDRs was for residential mortgages and another \$1,551,000 was related to developers in commercial real estate.

Total TDRs declined 45.99% at December 31, 2013, compared to December 31, 2012. Nonaccrual TDRs declined by 53.83% and accruing TDRs declined by 40.18% over the same period. Within TDR categories total residential mortgage and construction TDRs showed a decrease of 46.69%. The majority of these credits are related to real estate construction projects that slowed significantly or stalled in 2011 and 2012, and the

Company pursued restructuring the qualified credits while the construction industry recovers and allow developers an opportunity to finish projects at a slower pace. Concessions granted in these circumstances include lengthened maturities, lower lot release prices, or rate reductions that enable the borrower to finish the construction projects and repay loans to the Company. The Company has had general success in its restructuring efforts even though not all restructured efforts will be entirely successful. In large part the successes are related to a recovering real estate market that began in late 2011 and is continuing into 2014.

The following tables summarizes TDRs by type, classified separately as nonaccrual or accrual, which are included in impaired loans at December 31, 2013 and December 31, 2012.

<i>(in thousands)</i>	Total TDRs December 31, 2013	Nonaccrual TDRs December 31, 2013	Accruing TDRs December 31, 2013

Total Troubled Debt Restructurings	\$16,773	\$7,143	\$9,630

Of the \$9,059,000 in total TDRs at December 31, 2013, \$3,298,000 were on nonaccrual status at period-end. Of the \$16,773,000 in total TDRs at December 31, 2012, \$7,143,000 were on nonaccrual status at period-end. As of December 31, 2013, the Company has no commercial real estate (CRE) workouts whereby an existing loan was restructured into multiple new loans (i.e., A Note/B Note structure).

For a restructured loan to return to accrual status there needs to be at least 6 months successful payment history. In addition, our Credit Administration performs a financial

analysis of the credit to determine whether the borrower has the ability to continue to perform successfully over the remaining life of the loan. This includes, but is not limited to, review of financial statements and cash flow analysis of the borrower. Only after determination that the borrower has the ability to perform under the terms of the loans, will the restructured credit be considered for accrual status.

The following table summarizes special mention loans by type for the years ended December 31, 2013 and December 31, 2012.

<i>(in thousands)</i>	December 31, 2013	December 31, 2012

Lease financing	—	—
Total Special Mention Loans	\$1,826	\$2,966

The Company focuses on competition and other economic conditions within its market area and other geographical areas in which it does business, which may ultimately affect the risk assessment of the portfolio. The Company continues to experience increased competition from major banks, local independents and non-bank institutions which creates pressure on loan pricing. Low interest rates and a weak economy continue to dominate, even though real estate prices show signs of stabilization. The Company continues to place increased emphasis on reducing both the level of nonperforming assets and the level of losses on the disposition of these assets. It is in the best interest of both the Company and the borrowers to seek alternative options to foreclosure in an effort to reduce the impacts on the real estate market. As part of this strategy, the Company has increased its level of troubled debt restructurings, when it makes economic sense. While business and consumer spending show improvement in recent quarters, current GDP remains anemic. It is difficult to forecast what impact the Federal Reserve actions to hold rates low will have on the economy. The local market has remained more relatively

stable economically during the past several years than some areas of the state and the nation, where more volatile economic impacts were experienced, including more severe deterioration of residential real estate markets. Although the local area residential housing markets have been hard hit, they continue to perform better than some parts of the state which bodes well for sustained, but slower growth in the Company's market areas of Fresno and Madera, Kern, and Santa Clara Counties. Local unemployment rates in the San Joaquin Valley remain high compared with other regions but are historically high as a result of the area's agricultural dynamics. The Company believes that the Central San Joaquin Valley will continue to grow and diversify as property and housing costs remain low relative to other areas of the state. Management recognizes increased risk of loss due to the Company's exposure to local and worldwide economic conditions, as well as potentially volatile real estate markets, and takes these factors into consideration when analyzing the adequacy of the allowance for credit losses.

The following table provides a summary of the Company's allowance for credit losses, provisions made to that allowance, and charge-off and recovery activity affecting the allowance for the years indicated.

(Dollars in thousands)	December 31,				
	2013	2012	2011	2010	2009

Allowance for credit losses to total loans at end of period	2.78 %	2.95%	3.34%	3.74%	2.95%
Net loan (recoveries) charge-offs to allowance for credit losses	(2.75)%	24.47%	120.71%	66.41%	65.85%
Net loan charge-offs to provision for credit losses	27.50%	282.92%	121.11%	87.94%	73.93%

Loan charge-offs decreased \$2,692,000 during the year ended December 31, 2013, when compared to the year ended December 31, 2012. Loan recoveries increased during the same period. Net loan recoveries totaled \$414,000 during the fourth quarter, consisting of multiple relationships.

Loan charge-offs of \$4,278,000 during the year ended December 31, 2012 included a \$1,864,000 agricultural relationship secured by real estate. Net loan recoveries totaled \$615,000 during the fourth quarter, consisting of multiple relationships.

The following is a summary of the quarterly activity in the allowance for loan losses for the year ended December 31, 2013 (in thousands).

Description	Loss	Recoveries	Provision	Balance
Balance Forward				11,784
1st quarter – 2013	416	44	(9)	11,403
2nd quarter – 2013	312	27	39	11,157
3rd quarter – 2013	474	1,019	(1,150)	10,552
4th quarter – 2013	384	798	22	10,988
Total YTD – 2013	\$1,586	\$1,888	\$(1,098)	\$10,988

At December 31, 2013 and 2012, \$183,000 and \$167,000, respectively, of the formula allowance is allocated to unfunded loan commitments and is, therefore, carried separately in other liabilities.

Management believes that the 2.78% credit loss allowance to total loans at December 31, 2013 is adequate to absorb known and inherent risks in the loan portfolio. No assurance can be given, however, that the economic conditions which may adversely affect the Company's service areas or other circumstances will not be reflected in increased losses in the loan portfolio. Management is not currently aware of

any conditions that may adversely affect the levels of losses incurred in the Company's loan portfolio.

Although the Company does not normally allocate the allowance for credit losses to specific loan categories, an allocation to the major categories has been made for the purposes of this report as set forth in the following table. The allocations are estimates based on the same factors as considered by management in determining the amount of additional provisions to the credit loss allowance and the overall adequacy of the allowance for credit losses.

	2013		2012		2011		2010		2009	
	Allowance for Credit Losses	% of Loans	Allowance for Credit Losses	% of Loans	Allowance For Credit Losses	% of Loans	Allowance for Credit Losses	% of Loans	Allowance for Credit Losses	% of Loans
<i>(Dollars in thousands)</i>										
Commercial and industrial	\$ 2,340	17.88%	\$ 1,614	18.0%	\$ 4,782	40.7%	\$ 8,209	36.0%	\$ 7,125	33.0%
Real estate – mortgage	1,862	49.93%	1,292	47.6%	2,070	35.4%	1,620	35.7%	1,426	32.6%
RE construction and development	5,533	22.01%	2,814	22.7%	5,634	12.3%	5,763	14.8%	5,561	20.7%
Agricultural	583	7.82%	352	9.0%	803	8.8%	850	10.5%	334	10.0%
Installment/other	275	2.36%	288	2.7%	117	2.8%	49	2.9%	535	3.6%
Lease financing	—	—%	1	—%	1	—%	3	0.1%	35	0.1%
Not allocated	395	—%	5,423	—%	241	—%	26	—%	—	—%
	\$10,988	100.0%	\$11,784	100.0%	\$13,648	100.0%	\$16,520	100.0%	\$15,016	100.0%

During 2013, reserve allocations increased in all categories during the year, except for small decreases in the reserve on installment loans. Increases in reserve allocations for most categories was the result of increased loss factors, which decreased the unallocated portion of the reserve.

During 2012, reserve allocations increased in installment and unallocated by \$171,000 and \$5,182,000, respectively, while

reserve allocation for all other categories decreased. The increase in unallocated was the result of reduced loss factors.

During 2011, reserve allocations decreased in commercial and industrial and real estate construction and development by \$3,427,000 and \$129,000, respectively, while reserve allocations increased in real estate mortgage, installment, and unallocated by \$450,000, \$68,000, and \$215,000, respectively.

The following summarizes the Company's allowance for credit losses related to the specific, formula, and unallocated reserves for the year-ends shown:

(In thousands)	December 31,				
	2013	2012	2011	2010	2009
Formula allowance	\$ 9,831	\$ 5,703	\$12,153	\$ 5,168	\$ 7,043
Specific allowance	762	658	1,254	11,326	7,973
Unallocated allowance	395	5,423	241	26	—
Total allowance	\$10,988	\$11,784	\$13,648	\$16,520	\$15,016

At December 31, 2013, the allowance for credit losses totaled \$10,988,000, and consisted of \$9,831,000 in formula allowance, \$762,000 in specific allowance, and \$395,000 in unallocated allowance. At December 31, 2013, \$753,000 of the specific allowance was allocated real estate loans, and the remaining \$9,000 was allocated to commercial and industrial loans.

At December 31, 2012, the allowance for credit losses totaled \$11,784,000, and consisted of \$5,703,000 in formula allowance, \$658,000 in specific allowance, and \$5,423,000 in unallocated allowance. At December 31, 2012, \$621,000 of the specific allowance was allocated real estate loans, and the remaining \$38,000 was allocated to commercial and industrial loans.

At December 31, 2011, the allowance for credit losses totaled \$13,648,000, and consisted of \$12,153,000 in formula allowance, \$1,254,000 in specific allowance, and \$241,000 in unallocated allowance. At December 31, 2011, \$523,000 of the specific allowance was allocated commercial real estate loans, and the remaining \$381,000, \$166,000, \$112,000, and \$71,000 were allocated to agricultural, commercial & industrial, residential mortgage loans, and real estate construction loans, respectively.

The total formula allowance increased \$4,128,000 between 2012 and 2013, due to an increase in the reserve factors as the Company reviewed and updated their allowance for loan loss methodology during the year.

The total formula allowance decreased approximately \$6,450,000 between 2011 and 2012, primarily due decrease in the percentage loss factors as well as the Company's internal review of loan classification definitions as they pertain to risk.

There were no loans classified as doubtful at December 31, 2013 or December 31, 2012.

The total formula allowance increased approximately \$6,985,000 between 2010 and 2011, primarily as the result of increased reserve factors resulting from losses incurred during the year. Between December 31, 2011 and December 31, 2012, substandard loans decreased \$4,914,000, while special mention decreased \$8,638,000.

The total formula allowance decreased approximately \$1,875,000 between 2009 and 2010, primarily as the result of increased loss factors applied to "pass loans" which more than outweighed the decline in volume of "pass" loans.

Although in some instances, the downgrading of a loan resulting from the factors used by the Company in its allowance analysis has been reflected in the formula allowance, management believes that in some instances, the impact of material events and trends has not yet been reflected in the level of nonperforming loans or the internal risk grading process regarding these loans. Accordingly, the Company's evaluation of probable losses related to these factors may be reflected in the unallocated allowance. The evaluation of the inherent losses concerning these factors

involves a higher degree of uncertainty because they are not identified with specific problem credits, and therefore the Company does not spread the unallocated allowance among segments of the portfolio. At December 31, 2013 and December 31, 2012, the Company had unallocated allowances of \$395,000 and \$5,423,000. Management's estimates of the unallocated allowance are based upon a number of underlying factors including 1) the effect of deteriorating national and local economic trends, 2) the effects of export market conditions on certain agricultural and manufacturing borrowers, 3) the effects of abnormal weather patterns on agricultural borrowers, as well as other borrowers that may be impacted by such conditions, 4) the effect of increased competition in the Company's market area and the resultant potential impact of more relaxed underwriting standards to borrowers with multi-bank relationships, 5) the effect of soft real estate markets, and 6) the effects of having a larger number of borrowing relationships which are close to the Company's lending limit,

any one if which were not to perform to contractual terms, would have a material impact on the allowance.

The Company's loan portfolio has concentrations in commercial real estate, commercial, and construction loans, however the portfolio percentages fall within the Company's loan policy guidelines.

It is the Company's policy to discontinue the accrual of interest income on loans for which reasonable doubt exists with respect to the timely collectibility of interest or principal due to the inability of the borrower to comply with the terms of the loan agreement. Such loans are placed on nonaccrual status whenever the payment of principal or interest is 90 days past due or earlier when the conditions warrant, and interest collected is thereafter credited to principal to the extent necessary to eliminate doubt as to the collectibility of the net carrying amount of the loan. Management may grant exceptions to this policy if the loans are well secured and in the process of collection.

The following table sets forth the Company's nonperforming assets as of the dates indicated:

<i>(Dollars in thousands, except footnote)</i>	December 31,				
	2013	2012	2011	2010	2009
Nonaccrual loans (1)	\$12,341	\$13,425	\$18,098	\$34,394	\$34,757
Restructured loans	5,761	9,716	11,885	12,554	16,026
Total non-performing loans	18,102	23,141	29,983	46,948	50,783
Other real estate owned	13,946	23,932	27,091	35,580	36,217
Total non-performing assets	\$32,048	\$47,073	\$57,074	\$82,528	\$87,000
Loans, past due 90 days or more, still accruing	\$ —	\$ —	\$ 74	\$ 547	\$ 486
Non-performing loans to total gross loans	4.58%	5.78%	7.34%	10.63%	9.99%
Non-performing assets to total gross loans	8.11%	11.77%	14.96%	20.63%	21.75%
Allowance for loan losses to nonperforming loans	60.70%	50.92%	45.52%	35.19%	29.57%

(1) Included in nonaccrual loans at December 31, 2013 and 2012 are restructured loans totaling \$3,298,000 and \$7,144,000, respectively.

Non-performing assets remain high at December 31, 2013, but have decreased \$15,025,000 between December 31, 2012 and December 31, 2013, due to decreases in restructured loans of \$7,714,000, and decreases in nonaccrual loans and other real estate owned of \$1,084,000 and \$9,986,000, respectively. The net decrease in other real estate owned consists of \$11,454,250 in gross sales, \$437,000 in properties transferred from loans, and write-downs of \$214,000 during the year ended December 31, 2013.

Non-performing assets decreased \$2,944,000 between December 31, 2011 and December 31, 2012. Nonaccrual loans decreased \$4,673,000 between December 31, 2011 and December 31, 2012, while restructured loans not included in the nonaccrual totals increased \$4,888,000. The net decrease

of \$3,159,000 in other real estate owned includes additions of approximately \$2,436,000 in properties transferred from loans, write-downs of \$463,000, and gross sales of more than \$7,472,000 during the year ended December 31, 2012.

Non-performing assets decreased \$25,454,000 between December 31, 2010 and December 31, 2011. While nonaccrual loans decreased \$16,296,000 between December 31, 2010 and December 31, 2011, restructured loans not included in the nonaccrual totals decreased \$669,000. The net decrease of \$8,489,000 in other real estate owned includes additions of approximately \$2,806,000 in properties transferred from loans, write-downs of \$3,434,000 and gross sales of more than \$8,209,000 during the year ended December 31, 2011.

The following table summarizes the nonaccrual totals by loan category for the periods shown:

<i>(In thousands)</i>	Balance			Change from	
	December 31, 2013	December 31, 2012	December 31, 2011	December 31, 2012	December 31, 2011
Commercial and industrial	\$ —	\$ 1,181	\$ 5,080	\$(1,181)	\$(5,080)
Real estate – mortgage	11,873	10,259	3,961	1,614	7,912
Real estate – construction	468	1,730	9,014	(1,262)	(8,546)
Agricultural	—	136	—	(136)	—
Installment/other	—	119	43	(119)	(43)
Lease financing	—	—	—	—	—
Total Nonaccrual Loans	\$12,341	\$13,425	\$18,098	\$(1,084)	\$(5,757)

Loans past due more than 30 days are receiving increased management attention and are monitored for increased risk. The Company continues to move past due loans to nonaccrual status in its ongoing effort to recognize loan problems at an earlier point in time when they may be dealt with more effectively. As impaired loans, nonaccrual and restructured loans are reviewed for specific reserve allocations and the allowance for credit losses is adjusted accordingly.

Except for the loans included in the above table, there were no loans at December 31, 2013, where the known credit problems of a borrower caused the Company to have serious doubts as to the ability of such borrower to comply with the present loan repayment terms and which would result in such loan being included as a nonaccrual, past due or restructured loan at some future date.

Liquidity and Asset/Liability Management

The primary function of asset/liability management is to provide adequate liquidity and maintain an appropriate balance between interest-sensitive assets and interest-sensitive liabilities.

Liquidity

Liquidity management may be described as the ability to maintain sufficient cash flows to fulfill both on- and off-balance sheet financial obligations, including loan funding commitments and customer deposit withdrawals, without straining the Company's equity structure. To maintain an adequate liquidity position, the Company relies on, in addition to cash and cash equivalents, cash inflows from deposits and short-term borrowings, repayments of principal on loans and investments, and interest income received. The Company's principal cash outflows are for loan origination, purchases of investment securities, depositor withdrawals

and payment of operating expenses. Other sources of liquidity not on the balance sheet at December 31, 2013, include unused collateralized and uncollateralized lines of credit from other banks, the Federal Home Loan Bank, Pacific Coast Banker's Bank, and from the Federal Reserve Bank totaling \$271,855,000.

Cash and cash equivalents have fluctuated during the three years ended December 31, 2013, 2012, and 2011, with period-end balances as follows (from Consolidated Statements of Cash Flows – in 000's):

	Balance
December 31, 2013	\$135,212
December 31, 2012	\$141,627
December 31, 2011	\$124,184

Cash and cash equivalents decreased \$6,415,000 during the year ended December 31, 2013, as compared to an increase of \$17,443,000 during the year ended December 31, 2012.

The Company had a net cash inflow from operations of \$11,903,000 for the year ended December 31, 2013, and a positive cash inflow from operations totaling \$9,711,000 for the period ended December 31, 2012. The Company experienced net cash inflows from investing activities totaling \$2,468,000 and \$18,577,000 during the years ended December 31, 2013 and December 31, 2012, respectively, as settlement of OREO properties and loan paydowns outweighed capital and investment expenditures.

During the year ended December 31, 2013, the Company experienced net cash outflows from financing activities totaling \$20,786,000, primarily as the result of decreases in certificates of deposit accounts. For the year ended December 31, 2012, the Company experienced net cash outflows of \$10,845,000 from financing activities due to decreases in brokered time deposits.

Liquidity risk arises from the possibility the Company may not be able to satisfy current or future financial commitments, or the Company may become unduly reliant on alternative funding sources. The Company maintains a liquidity risk management policy to address and manage this risk. The policy identifies the primary sources of liquidity, sets wholesale funding limits, establishes procedures for monitoring and measuring liquidity, and establishes minimum liquidity requirements, which comply with regulatory guidance. The liquidity position is continually

monitored and reported on a monthly basis to the Board of Directors.

The policy also includes a contingency funding plan to address liquidity needs in the event of an institution-specific or a systemic financial market crisis. In addition to unused lines of credit from other banks totaling \$271,855,000, the contingency plan includes identified funding sources, and steps that may be taken in the event the total liquidity ratio falls or is projected to fall below policy limits for any extended period of time. One of the primary directives of the contingency funding plan is to limit the Company's overall level of wholesale funding to no more than 40% of deposits. The current funding program uses both asset-based and liability-based principles, and identifies core deposits as the favored funding source when attainable at a reasonable cost. The policy identifies a number of funding sources or methods the Bank ALCO committee may utilize to fulfill the Company's liquidity funding requirements:

- 1) Local core deposits are the Company's primary funding source. The Company must expand its efforts to attract these deposits through service-related and competitive pricing tactics. Other liquidity funding sources should only be considered if local core deposits are not attractive because of maturity or pricing.
- 2) Unsecured Federal Funds lines with correspondent banks may be used to fund short-term peaks in loan demand or deposit run-off. Currently, unsecured borrowing lines with correspondents are limited and may not be reliable for long periods of time or in times of economic stress.
- 3) Other funding sources such as secured credit lines with the Federal Home Loan Bank or the Federal Reserve may be used for longer periods. The Company collateralized these available lines with a combination of investment securities and pledged loans. The Company has utilized specific loan pledging with both the FHLB and the Federal Reserve to better ensure the continued availability of those lines of credit.
- 4) The Company presently has a Discount Window facility available from the Federal Reserve Bank of San Francisco collateralized with loans as discussed above. At December 31, 2013, the Company had available credit of \$254,761,000 from the Federal Reserve based upon the loans pledged at that date. The Federal Reserve will monitor use of the Discount Window closely given the current status of the Company and the economy as a whole and. In addition, this credit

facility may not be competitively priced under normal economic conditions. As such, the Company does not expect to use this facility except in times of crises, but does consider this to be a key contingency funding source.

- 5) As long as the Bank remains "Well Capitalized" the Company may rely on brokered deposits when core deposit rates are higher in the marketplace or maturity structures are not desirable. The Company's current policy limit for brokered deposits is 25% of total deposits. The Company may also utilize other wholesale deposit sources such as memberships that advertise the Bank's time deposit rates to other subscribers, typically banks and credit unions. The Company's current policy limit on other wholesale deposits is 10% of total deposits.
- 6) The Bank may sell whole loans or participations in loans to provide additional liquidity. During economic downturns or other crises events, these funding sources may be difficult to achieve in a short period of time or at a reasonable price. As such, this strategy is better used as a long-term asset/liability management tool to effectively balance assets and liabilities to reduce liquidity risk.
- 7) The Company currently has Bank Owned Life Insurance (BOLI) policies issued by highly rated insurance companies which may be sold to increase liquidity.
- 8) The Company owns certain real estate including its administration building and several of its branches. These may be sold and vacated or leased back from the purchaser after sale to provide additional liquidity if needed. The sales process may require substantial time to complete, and may have an adverse impact on earnings depending on market rates and other factors at the time of sale.
- 9) Investments near maturity may be sold to meet temporary funding needs but may need to be replaced to maintain liquidity ratios within acceptable limits. At the current time much of the investment portfolio is pledged to secure public deposits and borrowing lines. As wholesale funding dependence is reduced, the available liquidity in the investment portfolio will increase. The Company seeks to maintain an investment-grade securities portfolio to ensure quality collateral for pledging against borrowing lines of credit as well as to provide liquidity in times of needs.

The Company continues to utilize liability management, when needed, as part of its overall asset/liability management strategy. Through the discretionary acquisition of short term borrowings, the Company has been able to provide liquidity to fund asset growth while, at the same time, better utilizing its capital resources, and better controlling interest rate risk. The borrowings are generally short-term and more closely match the repricing characteristics of floating rate loans, which comprise approximately 40.4% of the Company's loan portfolio at December 31, 2013. This does not preclude the Company from selling assets such as investment securities to fund liquidity needs but, with favorable borrowing rates, the Company has maintained a positive yield spread between borrowed liabilities and the assets which those liabilities fund. If, at some time, rate spreads become unfavorable, the Company has the ability to utilize an asset management approach and, either control asset growth or, fund further growth with maturities or sales of investment securities.

The Company's liquid asset base which generally consists of cash and due from banks, federal funds sold, securities purchased under agreements to resell ("reverse repos") and investment securities, is maintained at a level deemed sufficient to provide the cash outlay necessary to fund loan growth as well as any customer deposit runoff that may occur. Within this framework is the objective of maximizing the yield on earning assets. This is generally achieved by maintaining a high percentage of earning assets in loans, which historically have represented the Company's highest yielding asset. At December 31, 2013, the Bank had 62.12% of total assets in the loan portfolio and a loan to deposit ratio of 72.81%, as compared to 61.65% of total assets in the loan portfolio and a loan to deposit ratio of 71.02% at December 31, 2012. Liquid assets at December 31, 2013 include cash and cash equivalents totaling \$135,212,000, as compared to \$141,627,000 at December 31, 2012.

Liabilities used to fund liquidity sources include core and non-core deposits as well as short-term borrowings. Core deposits, which comprise approximately 86.73% of total deposits at December 31, 2013, provide a significant and stable funding source for the Company. At December 31, 2013, unused lines of credit with the Federal Home Loan Bank, Pacific Coast Banker's Bank, and the Federal Reserve Bank totaling \$271,855,000 are collateralized in part by certain qualifying loans in the Company's loan portfolio. The carrying value of loans pledged on these used and unused borrowing lines totaled \$334,299,000 at December 31, 2013. For further discussion of the Company's borrowing lines, see "Short Term Borrowings" included previously in the financial condition section of this financial review. The Federal Reserve Board

has notified the Bank that it will permit the Bank to draw on its line of credit with the Federal Reserve Bank only in limited circumstances and for a short duration.

The liquidity of the parent company, United Security Bancshares, is primarily dependent on the payment of cash dividends by its subsidiary, United Security Bank, subject to limitations imposed by the Financial Code of the State of California. The Bank currently has limited ability to pay dividends or make capital distributions (see Dividends section included in Regulatory Matters of this Management's Discussion). The limited ability of the Bank to pay dividends may impact the ability of the Company to fund its ongoing liquidity requirements including ongoing operating expenses, as well as quarterly interest payments on the Company's junior subordinated debt (Trust Preferred Securities.) Since the quarter ended March 31, 2009, the Bank has been precluded from paying a cash dividend to the Company. To conserve cash and capital resources, the Company elected at March 31, 2009 to defer the payment of interest on its junior subordinated debt beginning with the quarterly payment due October 1, 2009. The Company has not determined how long it will defer interest payments, but under the terms of the debenture, interest payments may be deferred up to five years (20 quarters). During such deferral periods, the Company is prohibited from paying dividends on its common stock (subject to certain exceptions) and will continue to accrue interest payable on the junior subordinated debt. The Bank paid no dividends to the parent company during the years ended December 31, 2013, 2012, and 2011.

Regulatory Matters

Regulatory Agreement with the Federal Reserve Bank of San Francisco

Effective March 23, 2010, United Security Bancshares (the "Company") and its wholly owned subsidiary, United Security Bank (the "Bank"), entered into a written agreement (the "Agreement") with the Federal Reserve Bank of San Francisco. Under the terms of the Agreement, the Company and the Bank agreed to strengthen board oversight of management and the Bank's operations; submit an enhanced written plan to strengthen credit risk management practices and improve the Bank's position on the past due loans, classified loans, and other real estate owned; maintain a sound process for determining, documenting, and recording an adequate allowance for loan and lease losses; improve the management of the Bank's liquidity position and funds management policies; maintain sufficient capital

at the Company and Bank level; and improve the Bank's earnings and overall condition. The Company and Bank have also agreed not to increase or guarantee any debt, purchase or redeem any shares of stock, declare or pay any cash dividends, or pay interest on the Company's junior subordinated debt or trust preferred securities, without prior written approval from the Federal Reserve Bank. The Company generates no revenue of its own and as such, relies on dividends from the Bank to pay its operating expenses and interest payments on the Company's junior subordinated debt. The inability of the Bank to pay cash dividends to the Company may hinder the Company's ability to meet its ongoing operating obligations.

This Agreement entered into with the Federal Reserve Bank of San Francisco was a result of a regulatory examination that was conducted by the Federal Reserve and the California Department of Financial Institutions in June 2009 ("Report of Examination"). The Agreement was the result of significant increases in nonperforming assets, both classified loans and OREO, during 2008 and 2009 increasing the overall risk profile of the Bank. The increased risk profile of the Bank included heightened concerns about the Bank's use of brokered and other whole funding sources which had been used to fund loan growth and reduce the Company's overall cost of interest bearing liabilities. With loan growth funded to some degree by wholesale funding sources, liquidity risk increased, and higher levels of nonperforming assets increased risk to equity capital and potential volatility in earnings.

The Agreement's major components and requirements for the Bank are as follows:

- Strengthen board oversight of the Bank's management and operations by the Bank submitting a written plan to the Federal Reserve Bank to address and include (i) the actions that the board will take to improve the Bank's conditions and maintain effective control over, and supervision of, the Bank's major operations and activities, (ii) the responsibility of the board to monitor management's adherence to approved policies and procedures, and applicable laws and regulations; and (iii) a description of the information and reports that are regularly reviewed by the board in its oversight of the operations and management of the Bank;
- Strengthen credit risk management practices of the Bank by the Bank submitting a written plan to the Federal Reserve Bank to address and include (i) the responsibility of the Board of Directors to establish appropriate risk tolerance guidelines and risk limits; (ii) timely and accurate identification and quantification

of credit risk within the loan portfolio; (iii) strategies to minimize credit losses and reduce the level of problem assets; (iv) procedures for the on-going review of the investment portfolio to evaluate other-than temporary-impairment (“OTTI”) and accurate accounting for OTTI; (v) stress testing of commercial real estate loan and portfolio segments; and (vi) measures to reduce the amount of other real estate owned;

- Strengthen asset quality at the Bank by (i) not extending, renewing, or restructuring any credit to or for the benefit of any borrower, including any related interest of the borrower, whose loans or other extensions of credit were criticized in the Report of Examination or in any subsequent report of examination, without appropriate underwriting analysis, documentation, board or committee approval and certification that the board or committee reasonably believes that the extension of credit will not impair the Bank’s interest in obtaining repayment of the already outstanding credit and that the extension of credit or renewal will be repaid according to its terms, (ii) submitting to the Federal Reserve Bank an acceptable written plan designed to improve the Bank’s position through repayment, amortization, liquidation, additional collateral, or other means on each loan or other asset in excess of \$1.5 million including other real estate owned that is past due as to principal or interest more than 90 days, on the Bank’s problem loan list, or was adversely classified in the Report of Examination or subsequent report of examination;
- Improve management of the Bank’s allowance for loan losses by (i) eliminating from its books, by charge-off or collection, all assets or portions of assets classified “loss” in the Report of Examination that have not been previously collected in full or charged off within 10 days of the Agreement, and, within 30 days from the receipt of any federal or state report of examination, charge off all assets classified “loss” unless otherwise approved in writing by the Federal Reserve Bank, (ii) maintain a sound process for determining, documenting, and recording an adequate allowance for loan and lease losses (“ALLL”) in accordance with regulatory reporting instructions and relevant supervisory guidance, and (iii) within 60 days of the date of the Agreement, submitting to the Federal Reserve Bank an acceptable written program for the maintenance of an adequate ALLL, including provision for a review of the ALLL by the board on at least a quarterly calendar basis and remedying any deficiency found in the ALLL in the quarter it

is discovered, and the board maintaining written documentation of its review of the ALLL;

- Maintain sufficient capital at the Company and Bank by submitting to the Federal Reserve Bank an acceptable written plan to maintain sufficient capital at the Company, on a consolidated basis, and the Company and the Bank shall jointly submit to the Reserve Bank an acceptable written plan to maintain sufficient capital at the Bank, as a separate legal entity on a stand-alone basis that (i) complies with the applicable bank and bank holding company capital maintenance regulations and regulatory guidelines and that also considers the adequacy of the Bank’s capital, (ii) takes into account the volume of classified credits, concentrations of credit, ALLL, current and projected asset growth, and projected retained earnings, the source and timing of additional funds to fulfill the Company’s and the Bank’s future capital requirements, and a provision to notify the Federal Reserve Bank when either entity falls below the capital ratios in the accepted plan;
- Submit a revised business plan and budget to the Federal Reserve Bank for 2010 and subsequent calendar years that the Bank is subject to the Agreement to improve the Bank’s earnings and overall condition, which plan at a minimum provides a realistic and comprehensive budget for the remainder of calendar year 2010, and description of the operating assumptions that form the basis for, and adequately support, major projected income, expense, and balance sheet components;
- Not make certain distributions, dividends, and payments, specifically that (i) the Company and Bank agreeing not to declare or pay any dividends without the prior written approval of the Federal Reserve Bank and the Director of the Division of Banking Supervision and Regulation of the Board of Governors (“Director”), (ii) the Company not taking any other form of payment representing a reduction in capital from the Bank without the prior written approval of the Federal Reserve Bank, and (iii) the Company and its nonbank subsidiaries not making any distributions of interest, principal, or other sums on subordinated debentures or trust preferred securities without the prior written approval of the Federal Reserve Bank and the Director;
- Not incur debt or redeem stock, without the prior written approval of the Federal Reserve Bank. The Company agrees not to incur, increase, or guarantee any debt or purchase or redeem any shares of its stock;

- Correct violations of the laws by (i) the Bank immediately taking all necessary steps to correct all violations of law and regulation cited in the Report of Examination, (ii) the board of the Bank taking the necessary steps to ensure the Bank's future compliance with all applicable laws and regulations, (iii) complying with the notice provisions of Section 32 of the FDI Act (12 U.S.C. § 1831i) and Subpart H of Regulation Y of the Board of Governors of the Federal Reserve System (12 C.F.R. §§ 225.71 *et seq*) prior to appointing any new director or senior executive officer, or changing the responsibilities of any senior executive officer so that the officer would assume a different senior executive officer position, and (iv) complying with the restrictions on indemnification and severance payments of Section 18(k) of the FDI Act (12 U.S.C. § 1828(k)) and Part 359 of the FDIC's regulations (12 C.F.R. Part 359);
- Comply with the Agreement by (i) appointing a compliance committee of the Bank ("Compliance Committee") within 10 days of the date of the Agreement to monitor and coordinate the Bank's compliance with the provisions of the Agreement, which Compliance Committee is composed of a majority of outside directors who are not executive officers or principal shareholders of the Bank and which is to meet at least monthly and report its findings to the board of directors of the Bank, and (ii) the Company and Bank within 30 days after the end of each calendar quarter following the date of the Agreement submitting to the Federal Reserve Bank written progress reports detailing the form and manner of all actions taken to secure compliance with the Agreement and the results of such actions.

For a copy of the Agreement with the Federal Reserve Bank of San Francisco, see the Company's Form 8-K filed with the Securities and Exchange Commission on March 25, 2010.

Since the effective date of the Agreement, the Bank submitted quarterly progress reports to the Federal Reserve. As of the January 30, 2014 progress report submitted for the fourth quarter of 2013, the Company and the Bank believe they are in compliance with the Agreement, including deadlines and remediation of violations of laws and regulations regarding stale loan appraisals.

Regulatory Order from the California Department of Business Oversight

During May of 2010, the California Department of Business Oversight (formerly known as the California Department

of Financial Institutions) issued a written order (the "Order") pursuant to section 1913 of the California Financial Code to the Bank as a result of a regulatory examination that was conducted by the Federal Reserve and the California Department of Business Oversight in June 2009. The Order issued by the California Department of Business Oversight was similar to the agreement with the Federal Reserve Bank of San Francisco, except for certain additional requirements.

On September 24, 2013, the Bank entered into a Memorandum of Understanding (the "MOU") with the California Department of Business Oversight (formerly known as the California Department of Financial Institutions). Effective October 15, 2013, the California Department of Business Oversight terminated the Order issued in May 2010. The additional requirements in the MOU for the Bank are as follows:

- Develop and adopt a capital plan to maintain a ratio of tangible shareholders' equity to total tangible assets equal to or greater than 9% and include in such capital plan a capital contingency plan for raising additional capital in the event of various contingencies;
- Maintain a ratio of tangible shareholders' equity to total tangible assets equal to or greater than 9%
- Maintain an adequate allowance for loan losses and remedy any deficiency in the allowance for loan losses in the calendar quarter in which it is discovered; and
- Not establish any new branches or other offices without the prior written consent of the Commissioner of the California Department of Business Oversight
- Provide progress reports within 30 days after the end of each calendar quarter following the effective date of the MOU to the California Department of Business Oversight detailing the form and manner of all actions taken to secure compliance with the MOU and Agreement and the results of such actions.
- Within 180 days from the effective date of the MOU, reduce the assets classified "Substandard" to not more than 45% of total capital.
- Within 270 days from the effective date of the MOU, reduce the assets classified "Substandard" to not more than 40% of total capital.

The Bank is currently in full compliance with the requirements of the MOU including its deadlines.

Capital Adequacy

The Board of Governors of the Federal Reserve System (“Board of Governors”) has adopted regulations requiring insured institutions to maintain a minimum leverage ratio of Tier 1 capital (the sum of common stockholders’ equity, noncumulative perpetual preferred stock and minority interests in consolidated subsidiaries, minus intangible assets, identified losses and investments in certain subsidiaries, plus unrealized losses or minus unrealized gains on available for sale securities) to total assets. Institutions which have received the highest composite regulatory rating and which are not experiencing or anticipating significant growth are required to maintain a minimum leverage capital ratio of 3% Tier 1 capital to total assets. All other institutions are required to maintain a minimum leverage capital ratio of at least 100 to 200 basis points above the 3% minimum requirement.

The Board of Governors has also adopted a statement of policy, supplementing its leverage capital ratio requirements, which provides definitions of qualifying total capital (consisting of Tier 1 capital and Tier 2 supplementary capital, including the allowance for loan losses up to a maximum of 1.25% of risk-weighted assets) and sets forth minimum risk-based capital ratios of capital to risk-weighted assets. Insured institutions are required to maintain a ratio of qualifying total capital to risk weighted assets of 8%, at least one-half (4%) of which must be in the form of Tier 1 capital.

Pursuant to the March 2010 Agreement with the Federal Reserve Bank, the Company and the Bank are required to maintain sufficient capital to support current and future capital needs, including compliance with Capital Adequacy Guidelines taking into account the volume of classified assets, concentrations of credit, the level of the allowance for loan

losses, current and projected growth, and projected retained earnings. Pursuant to the MOU issued by the California Department of Business Oversight in October 2013, the Bank is required to maintain a ratio of tangible shareholders’ equity to total tangible assets equal to or greater than 9.0%. For purposes of the MOU, “tangible shareholders’ equity” is defined as shareholders’ equity minus intangible assets. The Bank’s ratio of tangible shareholders’ equity to total tangible assets was 13.19% at December 31, 2013.

As part of the March 2010 Agreement, the Company has written, and submitted to the Federal Reserve Bank, a capital plan that includes guidelines and trigger points to ensure sufficient capital is maintained at the Bank and the Company, and that capital ratios are maintained at a level deemed appropriate under regulatory guidelines given the level of classified assets, concentrations of credit, ALLL, current and projected growth, and projected retained earnings. The capital plan also contains contingency strategies to obtain additional capital as required to fulfill future capital requirements for both the Bank as a separate legal entity, and the Company on a consolidated basis. The capital plan also addresses the requirement of both the Bank and the Company to comply with the Federal Banks’ Capital Adequacy Guidelines, and contingency plans to ensure the maintenance of adequate capital levels under those guidelines.

The following table sets forth the Company’s and the Bank’s actual capital positions at December 31, 2013, as well as the minimum capital requirements and requirements to be well capitalized under prompt corrective action provisions (Bank required only) under the regulatory guidelines discussed above:

	Company Actual Capital Ratios	Bank Actual Capital Ratios	Minimum Capital Ratios	To Be Well Capitalized under Prompt Corrective Action Provisions
Total risk-based capital ratio	17.20%	17.41%	10.00%	10.00%
Tier 1 capital to risk-weighted assets	15.93%	16.15%	9.00%	6.00%
Leverage ratio	11.19%	11.43%	9.00%	5.00%

As is indicated by the above table, and the above discussion of the required ratio of tangible shareholders' equity to total tangible assets under the MOU, the Company and the Bank exceeded all applicable regulatory capital guidelines at December 31, 2013. Management believes that, under the current regulations, both will continue to meet their minimum capital requirements in the foreseeable future.

Dividends

Dividends paid to shareholders by the Company are subject to restrictions set forth in the California General Corporation Law. The California General Corporation Law provides that a corporation may make a distribution to its shareholders if retained earnings immediately prior to the dividend payout are at least equal to the amount of the proposed distribution. The primary source of funds with which dividends will be paid to shareholders will come from cash dividends received by the Company from the Bank.

As noted earlier, the Company and the Bank have entered into an agreement with the Federal Reserve Bank that, among other things, requires prior approval before paying a cash dividend or otherwise making a distribution of stock, increasing debt, repurchasing the Company's common stock, or any other action which would reduce capital of either the Bank or the Company. In addition, effective October 2009, the Company elected to defer regularly scheduled quarterly interest payments on its junior subordinated debentures issued in connection with its trust preferred securities. Under the subordinated debenture agreement, the Company is prohibited from paying any dividends or making any other distribution on its common stock for so long as interest payments are being deferred. In addition, under the agreement with the Federal Reserve Bank, the Company is now prohibited from making interest payments on the junior subordinated debentures without prior approval of the Federal Reserve Bank. During the year ended December 31, 2013, the Company received no cash dividends from the Bank.

The Bank, as a state-chartered bank, is subject to dividend restrictions set forth in California state banking law and administered by the Commissioner of the California Department of Business Oversight ("Commissioner"). Under such restrictions, the Bank may not pay cash dividends in an amount which exceeds the lesser of the retained earnings of the Bank or the Bank's net income for the last three fiscal years (less the amount of distributions to shareholders during that period of time). If the above test is not met, cash dividends may only be paid with the prior approval of the Commissioner, in an amount not exceeding the Bank's net income for its last fiscal year or the amount of its net income for the current fiscal year. Such restrictions do not apply to stock dividends, which generally require neither the satisfaction of any tests nor the approval of the Commissioner. Notwithstanding the foregoing, if the Commissioner finds that the shareholders' equity is not adequate or that the declarations of a dividend would be unsafe or unsound, the Commissioner may order the state bank not to pay any dividend. The FRB may also limit dividends paid by the Bank. As noted above, the terms of the regulatory agreement with the Federal Reserve prohibit both the Company and the Bank from paying dividends without prior approval of the Federal Reserve.

Reserve Balances

The Bank is required to maintain average reserve balances with the Federal Reserve Bank. During 2005, the Company implemented a deposit reclassification program, which allows the Company to reclassify a portion of transaction accounts to non-transaction accounts for reserve purposes. The deposit reclassification program was provided by a third-party vendor, and has been approved by the Federal Reserve Bank. At December 31, 2013, the bank was not subject to a reserve requirement.
